Independent Auditor's Report

To the Board of Directors and Shareholders of Makedonski Telekom AD Skopje

Report on separate financial statements

We have audited the accompanying separate financial statements of Makedonski Telekom AD Skopje (the "Company") which comprise the separate statement of financial position as of 31 December 2010 and the separate statement of comprehensive income, separate statement of changes in equity and separate statement of cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Separate Financial Statements

Management is responsible for the preparation and fair presentation of these separate financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these separate financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the separate financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the separate financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying separate financial statements present fairly in all material respects the financial position of the Company as of 31 December 2010 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Notes to the separate financial statements

1. GENERAL INFORMATION

1.1. About the Company

These separate financial statements relate to Makedonski Telekom AD - Skopje, (hereinafter referred as: "the Company"), a joint stock company incorporated and domiciled in the Republic of Macedonia.

In 2008 the Company adopted the T-Home brand and on 1 May 2008 changed its legal name from AD Makedonski Telekomunikacii Skopje into Makedonski Telekom AD - Skopje and its products are now marketed under the brand T-Home.

The Company's immediate parent company is AD Stonebridge Communications – Skopje, under voluntary liquidation, solely owned by Magyar Telekom Plc. registered in Hungary. The ultimate parent company is Deutsche Telekom AG registered in Federal Republic of Germany.

The Company is the leading fixed line service provider in Macedonia.

The Macedonian telecommunications sector is regulated by the Electronic Communications Law (ECL) enacted in March 2005. Under the ECL, the Company has been designated as a Significant Market Power operator (SMP) in the market for fixed line voice telephone networks and services, including the market for access to the networks for data transmission and leased lines. With the changes of the ECL published on 4 August 2008, the Concession Contracts of the Company ceased to be valid as of 5 August 2008. On 5 September 2008 the Agency for Electronic Communications ("The Agency"), ex officio, has issued a notification to the Company for those public electronic communication networks and/or services which have been allocated thereto under the Concession Contracts. Radiofrequency licenses were issued to the operators for the bands granted with the Concession Contracts in a form prescribed by the ECL. With the latest amendments on ECL, as of 1 July 2010 data retention obligation was introduced for the Company to keep unprocessed traffic data for 24 months. It is expected the Broadcasting Council to intensify actions against CaTV operators due to retransmission of TV Channels without regulated Intellectual property (IP) rights.

The Company is using Long run incremental costs methodology (LRIC) for wholesale regulated services. On 4 October 2010 the Agency has implemented LRIC Bottom – up costing model and published final results on 20 December 2010, which will be applicable from March 2011.

Based on the ECL, the Agency may prescribe retail regulation of fixed telephony services. The Agency finished the procedure for analyzes of relevant markets and based on the analysis conclusions, the Agency is planning to impose retail price regulation on the Company. In addition bigger pressure on retail pricing is expected due to the Guideline for price squeeze testing introduced by the Agency in 2010.

Additionally, the Agency organized public debate upon regulatory challenges in relation with the next generation access networks.

Based on several enacted bylaws published in second half of 2008 the Company has introduced several new regulated wholesale products, as Wholesale Line Rental, Wholesale Leased Line and Local Bit stream access. New Rulebook on access and use of specific network assets was published by the Agency in December 2010. According to the new Rulebook the Company has obligation to offer access to ducts and dark fibre.

On 27 May, 2010 new number portability (NP) service was introduced: WLR with NP, giving option for all WLR users to migrate their numbers into the Company's Wholesale Partner network.

Starting with August 2006 the Company has more than 100 shareholders, as a result of the sale of Governmental shares through auction organized by the Government during June 2006. According to the Law on securities it qualifies as company with special reporting obligations, which mainly, encompasses provision of quarterly, semi-annual and annual financial information to the Securities Exchange Commission of the Republic of Macedonia.

The Company's registered address is "Orce Nikolov" Street bb, 1000, Skopje, Republic of Macedonia. The average number of employees during 2010 was 1,265 (2009: 1,287).

1.2. Investigation into certain consultancy contracts

On 13 February 2006, Magyar Telekom Plc., the controlling owner of the Company, (via Stonebridge Communications AD - Skopje (under liquidation), majority shareholder of the Company), announced that it was investigating certain contracts entered into by another subsidiary of Magyar Telekom Plc. to determine whether the contracts were entered into in violation of

Notes to the separate financial statements

Magyar Telekom Plc. policy or applicable law or regulation. Magyar Telekom's Audit Committee retained White & Case, as its independent legal counsel to conduct the internal investigation. Subsequent to this on 19 February 2007, the Board of Directors of the Company, based on the recommendation of the Audit Committee of the Company and the Audit Committee of Magyar Telekom Plc., adopted a resolution to conduct an independent internal investigation regarding certain contracts in Macedonia.

For further information about the internal investigation, please refer to the consolidated financial statements of the Company for the year ended 31 December 2009.

According to the information provided to the Company by Magyar Telekom Plc., on 2 December 2009, the Audit Committee of Magyar Telekom Plc., provided the Magyar Telekom's Board of Directors with a "Report of Investigation to the Audit Committee of Magyar Telekom Plc." dated 30 November 2009 (the "Final Report"). The Audit Committee indicated that it considers that, with the preparation of the Final Report based on currently available facts, White & Case has completed its independent internal investigation.

According to the information provided to the Company by Magyar Telekom Plc., the Final Report includes the following findings and conclusions related to Magyar Telekom's Macedonian affiliates, based upon the evidence available to the Audit Committee of Magyar Telekom Plc. and its counsel:

- As previously disclosed, there is evidence that certain former employees intentionally destroyed documents relating to activities undertaken in Macedonia by Magyar Telekom Plc. and its affiliates.
- Between 2000 and 2006 a small group of former senior executives at Magyar Telekom and Magyar Telekom's Macedonian affiliates, authorized the expenditure of approximately EUR 24 million through over twenty suspect consultancy, lobbying, and other contracts (including certain contracts between Magyar Telekom and its subsidiaries on one hand, and affiliates of a Cyprus-based consulting company on the other hand). The Final Report concludes that "the available evidence does not establish that the contracts under which these expenditures were made were legitimate."
- "The evidence shows that, contrary to their terms, a number of these contracts were undertaken to obtain specific regulatory and other benefits from the government of Macedonia. The Companies generally received the benefits sought and then made expenditures under one or more of the suspect contracts. There is evidence that the remaining contracts were also illegitimate and created a pool of funds available for purposes other than those stated on the face of the agreements." However, the Magyar Telekom Audit Committee's counsel did not have access to evidence that would allow it to identify the ultimate beneficiaries of these expenditures.
- In entering into these contracts and approving expenditures under them, the former senior executives knowingly caused, structured, or approved transactions that shared most or all of the following characteristics:
 - intentional circumvention of internal controls;
 - false and misleading corporate documents and records;
 - lack of due diligence concerning, and failure to monitor performance of, contractors and agents in circumstances carrying a high risk of corruption; lack of evidence of performance; and
 - expenditures that were not for the purposes stated in the contracts under which they were made, but rather were intended to obtain benefits for the Magyar Telekom subsidiaries that could only be conferred by government action.
- The Final Report states that "the Investigation did not uncover evidence showing receipt of payments by any Macedonian government officials or political party officials."

As previously disclosed, Magyar Telekom has taken remedial steps to address issues previously identified by the independent investigation, including steps designed to revise and enhance the Magyar Telekom Group's internal controls. According to the information provided to the Company by Magyar Telekom, the Audit Committee of Magyar Telekom has not made recommendations relating to Magyar Telekom's compliance program or internal controls in connection with the issuance of the Final Report and Magyar Telekom is considering, in consultation with its Audit Committee, whether and to what extent the Final Report warrants additional remedial actions, including any personnel actions and/or changes in internal control policies and procedures at Magyar Telekom or its subsidiaries that have been or will be implemented to address the findings of the Final Report.

In relation to the issuance of the Final Report and the information provided to the Company by Magyar Telekom, in January 2010 the Chairman of the Company's Board of Directors requested third party legal and tax expertise for assessment of the

Notes to the separate financial statements

potential accounting and tax implications arising from the transactions conducted by the Company and its subsidiary subject to the Final Report.

The external experts prepared reports (the "Reports") on their assessment and submitted the Reports to the Chairman of the Company's BoD and the Management of the Company and its subsidiary accordingly. As a result, based on the analysis of the Tax and Legal experts and information available to the Management related to the transactions subject of the Final Report, amount of MKD 216,577 thousand has been identified as potential tax impact (together with related penalty interest) as of 31 December 2009 arising from the transactions conducted by the Company and its subsidiary subject to the Final Report (see note 15). In 2010 the amount related to the identified potential tax impact (together with related penalty interest) amounted to MKD 227,972 thousand, which were paid in 2010 upon an executive decision issued by the Public Revenue Office. In addition, the value of one contract MKD 105,147 thousand capitalised within treasury shares is now corrected and accounted for as though these payments had been expensed in 2006 rather than capitalized as part of treasury shares as originally reported. The other contracts that were identified by the Final Report and the reports of the tax and legal experts related to transactions undertaken by the Company were expensed in the related periods (2001-2007).

In May 2008, the Ministry of Interior ("MOI") of the Republic of Macedonia ("RoM") submitted to the Company an official written request for information and documentation regarding certain payments for consultancy services and advance dividend, as well as certain procurements and contracts. In June 2008 the Company submitted copies from the requested documents.

In October 2008 the Investigation Judge from the Primary Court Skopje 1 – Skopje (the criminal court), has issued an official written order to the Company to handover certain original documentation. Later in October 2008, the Company officially and personally handed over the requested documentation. Additional MOI requests in written were submitted and the Company provided the requested documentation.

We understand, based on public information available as of 10 December 2008, that the MOI Organized Crime Department submitted the files to the Basic Public Prosecution Office of Organized Crime and Corruption, with a proposal to bring criminal charges against Attila Szendrei (former CEO of Makedonski Telekom AD - Skopje), Rolf Plath (former CFO of Makedonski Telekom AD - Skopje), Mihail Kefaloyannis (former member of the Board of Directors in Stonebridge and former member of the Board of Directors in Telemacedonia) and Zoltan Kisjuhász (former CEO of Stonebridge and former non-executive member of the Board of Directors of Makedonski Telekom AD - Skopje) on the account of a reasonable doubt for committed criminal act. These individuals are proposed to be charged with having "abuse of office and authorizations" in their position in Makedonski Telekom AD - Skopje by concluding consultancy contracts for which there was no intention or need for any services in return.

The Primary Court Skopje 1 in Skopje, Investigative Department for Organized Crime delivered a summon to the Company in connection with the criminal charges against the above stated persons and asked for a statement whether the Company has suffered any damages on the basis of the said consultancy contracts.

After several postponements of the court hearing related to the investigation procedure handled in the Primary Court Skopje 1 Skopje, on the hearing held on 13 April 2009, the representatives of Makedonski Telekom AD Skopje declared the position of the Company that taking into consideration the ongoing independent internal investigation conducted by White & Case, approved by the Company's BoD, it was premature to preannounce any damage which may be caused by means of the implementation of the mentioned contracts or with reference to them. Upon completion of the independent internal investigation, the Company will inform the court on its final position in respect of the possible damage and the criminal prosecution of the accused persons. On 9 April 2010 the Company received notification from the Bureau of judicial expertise that based on the order of the Primary Court Skopje 1 Skopje the Bureau will perform expertise on the case. The expertise was performed on 11 May 2010 and the experts from Ministry of Justice of the Republic of Macedonia – Court Expertise Office – Skopje, asked for some additional documents from Company's side in order to prepare the expertise. The Company received Notification from the Court Expertise Office – Skopje that the expertise will continue on 18 October 2010. The experts asked additional information related to certain agreements concluded in 2005 and 2006, and related invoices. The Company has collected and submitted requested information/documentation to the Court Expertise Office on 1 November 2010. After preparation the expertise will be submitted from the responsible Judge to the Public Prosecutor. The Public Prosecutor should decide whether he/she will initiate prosecution act against accused persons or not depending on the expertise and other relevant proofs collected in the phase of investigation.

MOI of the RoM - Organized Crime Department, approached to the Company during August 2009, with request some additional documentation to be submitted to the MOI. The Company collected and submitted requested documentation on 27 August 2009.

Notes to the separate financial statements

The Chairman of the Company's BoD and the Company's Management have received information that the contents of the Final Report has also been made available to the Macedonian Public Prosecution Office. The Company's Management cannot foresee whether the Macedonian Public Prosecution Office will initiate any legal procedure or the type and scope of legal actions on the basis of the information contained in the Final Report.

We have become aware of no information as a result of a request from any regulators or other external parties, other than as described above, from which we have concluded that the financial statements may be misstated, including from the effects of a possible illegal act.

Notes to the separate financial statements

2. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these separate financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1. Basis of preparation

The company has prepared these separate financial statements to file with the Macedonian Stock Exchange in accordance with International Financial Reporting Standards (IFRS).

The Company has also prepared consolidated financial statements in accordance with IFRS for the Company and its subsidiaries. In the consolidated financial statements, subsidiary undertakings – which are those companies in which the group, directly or indirectly, has an interest of more than half of the voting rights or otherwise has power to exercise control over the operations – have been fully consolidated. The consolidated financial statements can be obtained from the Company.

Users of these separate financial statements should read them together with the Company's consolidated financial statements as at 31 December 2010 and for the year then ended in order to obtain full information on the financial position, results of operations and changes in financial position of the group as a whole.

The separate financial statements are presented in Macedonian denars rounded to the nearest thousand.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the separate financial statements are disclosed in note 4. Actual results may differ from those estimated.

2.1.1. Standards, amendments and interpretations effective and adopted by the Company in 2010

- IAS 7 (amended) Statements of cash flows. Amendment requires that only expenditures that result in a recognised asset in the statement of financial position can be classified as investing activities. Effective for periods beginning on or after 1 January 2010. The Company applied the amended standard from 1 January 2010, which did not cause changes in the presentation of the Company's separate statements of cash flows.
- IFRS 3, IAS 27 (amended). In January 2008 the IASB published the amended Standards IFRS 3 - Business Combinations and IAS 27 - Consolidated and Separate Financial Statements. The major changes compared to the current version of the standards are summarized below:
 - With respect to accounting for non-controlling interest an option is added to IFRS 3 to permit an entity to recognize 100% of the goodwill of the acquired entity, not just the acquiring entity's portion of the goodwill ('full goodwill' option) or to measure non-controlling interest at its fair value. This option may be elected on a transaction-by-transaction basis.
 - In a step acquisition, the fair values of the acquired entity's assets and liabilities, including goodwill, are measured on the date when control is obtained. Accordingly, goodwill will be measured as the difference at the acquisition date between the fair value of any investment the business held before the acquisition, the consideration transferred and the net asset acquired.
 - A partial disposal of an investment in a subsidiary while control is retained is accounted for as an equity transaction with owners, and gain or loss is not recognized.
 - A partial disposal of an investment in a subsidiary that results in loss of control triggers re-measurement of the residual interest to fair value. Any difference between fair value and carrying amount is a gain or loss on the disposal, recognized in profit or loss.
 - Acquisition related costs will be accounted for separately from the business combination, and therefore, recognized as expenses rather than included in goodwill. An acquirer will have to recognize at the acquisition date a liability for any contingent purchase consideration. If the amount of contingent consideration accounted for as a liability changes as a result of a post-acquisition event (such as meeting an earnings target), it will be recognized in accordance with other applicable IFRSs, as appropriate rather than as an adjustment of goodwill.

Notes to the separate financial statements

- The revised standards require an entity to attribute their share of losses to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- Effects resulting from an effective settlement of pre-existing relationships (relationships between acquirer and acquiree before the business combination) must not be included in the determination of the consideration.
- In contrast to current IFRS 3, the amended version of this standard provides rules for rights that have been granted to the acquiree (e.g. to use its intellectual property) before the business combination and are re-acquired with the business combination.
- The revised IFRS 3 brings into scope business combinations involving only mutual entities and business combinations achieved by contracts alone.

The amended version of IFRS 3 has to be applied for Business Combinations with effective dates in annual periods beginning on or after 1 July 2009. The Company applied the amended standard from 1 January 2010. The amended standards did not have an impact on the Company's separate financial statements since the Company has no acquisitions or investment transactions.

- IFRS 2 (amended) Share-based Payment. The amendments related to Company Cash-settled Share-based Payment Transactions were published in June 2009. Previously effective IFRSs required attribution of group share-based payment transactions only if they are equity-settled. The amendments resolve diversity in practice regarding attribution of cash-settled share-based payment transactions and require an entity receiving goods or services in either an equity-settled or a cash-settled payment transaction to account for the transaction in its separate or individual financial statements. The Company has no share based compensations; therefore, we do not expect the amended standard to have an effect on the Company when applied. Amendments to IFRS 2 shall be applied retrospectively for annual periods beginning on or after 1 January 2010. The amendments also incorporate the guidance contained in IFRIC 8 (Scope of IFRS 2) and in IFRIC 11 (IFRS 2 - Group and Treasury Share Transactions). As a result, the Board withdrew IFRIC 8 and IFRIC 11.
- IFRS 5 (amended) Non-current assets held for sale and discontinued operations. Amendment to clarify that IFRS 5, specifies the disclosures required in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations. Also clarifies that the general requirements of IAS 1 still apply, particularly paragraph 15 (to achieve a fair presentation) and paragraph 125 (sources of estimation uncertainty) of IAS 1. The effective date for this amendment is the period beginning on or after 1 January 2010.

2.1.2. Standards, amendments and interpretations effective in 2010 but not relevant for the Company

- IAS 17 (amended) Leases. Deletion of specific guidance regarding classification of leases of land, so as to eliminate inconsistency with the general guidance on lease classification. As a result, leases of land should be classified as either finance or operating, using the general principles of IAS 17. Effective for periods beginning on or after 1 January 2010. The amendment is not relevant for the Company's separate financial statements.
- IAS 36 (amended) Impairment of assets. Amendment to clarify that the largest cash generating unit (or group of units) to which goodwill should be allocated for the purposes of impairment testing is an operating segment as defined by paragraph 5 of IFRS 8, 'Operating segments' (that is, before the aggregation of segments with similar economic characteristics permitted by paragraph 12 of IFRS 8). Effective for periods beginning on or after 1 January 2010. The amendment is not relevant for the Company's separate financial statements.
- IAS 38 (amended) Intangible assets. Amendments to paragraphs 36 and 37 of IAS 38, to clarify the requirements under IFRS 3 (revised) regarding accounting for intangible assets acquired in a business combination. In addition, paragraphs 40 and 41 are amended to clarify the description of valuation techniques commonly used by entities when measuring the fair value of intangible assets acquired in a business combination that are not traded in active markets. The effective date for this amendment is the period beginning on or after 1 January 2010. The amendment is not relevant for the Company's separate financial statements, since the Company does not have any intangible assets acquired in a business combination.
- IAS 39 (amended) Financial Instruments: Recognition and Measurement. The major amendments of the standard are summarized below:
 - The IASB published an amendment in August 2008 to IAS 39 with respect to hedge accounting. The amendment "Eligible Hedged Items" allows to designate only changes in the cash flows or fair value of a hedged item above or

Notes to the separate financial statements

below a specified price or other variable (IAS 39.AG99BA). The amendment of IAS 39 shall be applied retrospectively for annual periods beginning on or after 1 July 2009. The amendment will not affect the Company's accounts as the Company does not apply hedge accounting.

- In addition, the IASB published an amendment in the treatment of loan pre-payment penalties as closely related derivatives. Namely, the amendment clarifies that, prepayment options, the exercise price of which compensates the lender for loss of interest by reducing the economic loss from investment risk, should be considered closely related to the host debt contract. The effective date for this amendment is the period beginning on or after 1 January 2010.
- Amendments to the scope exemption in paragraph 2(g) of IAS 39 to clarify that: (a) it only applies to binding (forward) contracts between an acquirer and a vendor in a business combination to buy an acquiree at a future date; (b) the term of the forward contract should not exceed a reasonable period normally necessary to obtain any required approvals and to complete the transaction; and (c) the exemption should not be applied to option contracts (whether or not currently exercisable) that on exercise will result in control of an entity, nor by analogy to investments in associates and similar transactions. The effective date for this amendment is the period beginning on or after 1 January 2010.
- Amendments regarding cash flow hedge accounting. Amendment to clarify when to recognise gains or losses on hedging instruments as a reclassification adjustment in a cash flow hedge of a forecast transaction that results subsequently in the recognition of a financial instrument. The amendment clarifies that gains or losses should be reclassified from equity to profit or loss in the period in which the hedged forecast cash flow affects profit or loss. The effective date for this amendment is the period beginning on or after 1 January 2010.
- IFRS for Small and Medium-sized Entities. In July 2009 the IASB issued its IFRS for Small and Medium-sized Entities, which is not relevant for the Company.
- IFRS 1 (amended) Additional Exemptions for First-time Adopters. The IASB issued the amendments to IFRS 1 in July 2009. As the Company has been reporting according to IFRS for many years, neither the original standard, nor any revision to that is relevant for the Company.
- IFRIC 17 Distributions of Non-cash Assets to Owners. This interpretation issued in November 2008 refers to the issue when to recognize liabilities accounted for non-cash dividends payable (e.g. property, plant, and equipment) and how to measure them. In addition, the interpretation refers to the issue how to account for any difference between the carrying amount of the assets distributed and the carrying amount of the dividend payable. IFRS 5 has also been amended to require that assets are classified as held for distribution only when they are available for distribution in their present condition and the distribution is highly probable. The interpretation shall be applied for annual periods beginning on or after 1 July 2009. As the Company does not distribute non-cash dividends, IFRIC 17 will have no impact on the Company's separate financial statements.
- IFRIC 18 Transfers of Assets from Customers. The Interpretation clarifies the requirements of IFRSs for agreements in which an entity receives from a customer an item of property, plant and equipment (or cash to be used explicitly for the acquisition of property, plant and equipment) that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services. The Interpretation is effective for annual periods beginning on or after 1 July 2009 and applies prospectively. However, limited retrospective application is permitted. IFRIC 18 is not expected to have any impact on the Company's separate financial statements.

2.1.3. Standards, amendments and interpretations that are not yet effective and have not been early adopted by the Company

- IAS 24 (revised) Related Party Disclosures. In November 2009, the IASB issued a revised version of IAS 24. Until now, if a government controlled, or significantly influenced, an entity, the entity was required to disclose information about all transactions with other entities controlled, or significantly influenced by the same government. The revised standard still requires disclosures that are important to users of financial statements but eliminates requirements to disclose information that is costly to gather and of less value to users. It achieves this balance by requiring disclosure about these transactions only if they are individually or collectively significant. Furthermore the IASB has simplified the definition of related party and removed inconsistencies. The revised standard shall be applied retrospectively for annual periods beginning on or after 1 January 2011. Earlier application is permitted.
- IFRS 9 Financial Instruments. The standard forms the first part of a three-phase project to replace IAS 39 (Financial Instruments: Recognition and Measurement) with a new standard, to be known as IFRS 9 Financial

Notes to the separate financial statements

Instruments. IFRS 9 prescribes the classification and measurement of financial assets and liabilities. The remaining phases of this project, dealing with the impairment of financial instruments and hedge accounting, as well as a further project regarding derecognition, are in progress.

Financial assets - At initial recognition, IFRS 9 requires financial assets to be measured at fair value. After initial recognition, financial assets continue to be measured in accordance with their classification under IFRS 9. Where a financial asset is classified and measured at amortized cost, it is required to be tested for impairment in accordance with the impairment requirements in IAS 39. IFRS 9 defines the below rules for classification.

- IFRS 9 requires that financial assets are classified as subsequently measured at either amortized cost or fair value. There are two conditions needed to be satisfied to classify financial assets at amortized cost: (1) The objective of an entity's business model for managing financial assets has to be to hold assets in order to collect contractual cash flows; and (2) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Where either of these conditions is not satisfied, financial assets are classified at fair value.
- Fair Value Option: IFRS 9 permits an entity to designate an instrument, that would otherwise have been classified in the amortized cost category, to be at fair value through profit or loss if that designation eliminates or significantly reduces a measurement or recognition inconsistency ('accounting mismatch').
- Equity instruments: The default category for equity instruments is at fair value through profit or loss. However, the standard states that an entity can make an irrevocable election at initial recognition to present all fair value changes for equity investments not held for trading in other comprehensive income. These fair value gains or losses are not reported as part of a reporting entity's profit or loss, even when a gain or loss is realized. Only dividends received from these investments are reported in profit or loss.
- Embedded derivatives: The requirements in IAS 39 for embedded derivatives have been changed by no longer requiring that embedded derivatives be separated from financial asset host contracts.
- Reclassification: IFRS 9 requires reclassification between fair value and amortized cost when, and only when there is a change in the entity's business model. The 'tainting rules' in IAS 39 have been eliminated.

Financial liabilities - IFRS 9 "Financial Instruments" sets the requirements on the accounting for financial liabilities and replaces the respective rules in IAS 39 "Financial Instruments: Recognition and Measurement". The new pronouncement:

- Carries forward the IAS 39 rules for the recognition and derecognition unchanged.
- Carries forward most of the requirements in IAS 39 for classification and measurement.
- Eliminates the exception from fair value measurement for derivative liabilities that are linked to and must be settled by delivery of an unquoted equity instrument.
- Changes the requirements related to the fair value option for financial liabilities to address own credit risk.

An entity shall apply IFRS 9 for annual periods beginning on or after January 1, 2013. Earlier adoption is permitted. A reporting entity must apply IFRS 9 retrospectively. For entities that adopt IFRS 9 for periods before January 1, 2012 the IFRS provides transition relief from restating comparative information. The Company is currently analyzing the possible changes in the separate financial statements of the Company that will be a result of the adoption of the new standard.

- IFRS 7 (amended) - The IASB published an amendment to IFRS 7 Amendments to IFRS 7 Financial Instruments: Disclosures in October 2010. The amendment requires quantitative and qualitative disclosures regarding transfers of financial assets that do not result in entire derecognition, or that result in continuing involvement. This is intended to allow users of financial statements improve their understanding of such transactions (for example, securitizations), including understanding the possible effects of any risks that may remain with the entity that transferred the assets. The amendments also require additional disclosures if a disproportionate amount of such transactions are undertaken around the end of a reporting period. The application of the amendment is required for annual periods beginning on or after July 1, 2011. An earlier application is permitted. We do not expect that the adoption of the amended standard would result in significant changes in the separate financial statements disclosures of the Company.

Notes to the separate financial statements

2.1.4. Standards, amendments and interpretations that are not yet effective and not relevant for the Company's operations

- IAS 32 (amended) Financial Instruments: Presentation on classification of rights issue. The amendment clarifies the classification of rights issues as equity or liabilities for rights issues that are denominated in a currency other than the functional currency of the issuer. These rights issues are recorded as derivative liabilities before the amendment. The amendment requires that such right issues offered pro rate to all of an entity's existing shareholders are classified as equity. The classification is independent of the currency in which the exercise price is denominated. The application of the amendment is required for annual periods beginning on or after 1 February 2010. An earlier application is permitted. The amendment will have no impact on the Company's separate financial statements.
- IFRS 1 The IASB amended IFRS 1 in January 2010 and in December 2010. As the Company has been reporting according to IFRS for many years, neither the original standard, nor any revision to that is relevant for the Company.
- IFRIC 14 (amended) IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. In November 2009, the IASB issued an amendment to IFRIC 14, which corrects an unintended consequence of IFRIC 14. Without the amendments, in some circumstances entities are not permitted to recognize some voluntary prepayments for minimum funding contributions as an asset. The amendment permits such an entity to treat the benefit of such an early payment as an asset. The amendments are effective for annual periods beginning 1 January 2011. The amendments must be applied retrospectively to the earliest comparative period presented. The amended interpretation is not applicable to the Company as the Company has no funded defined post-retirement benefit schemes.
- IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments. This interpretation issued in November 2009 clarifies the requirements of IFRSs when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially. The interpretation is effective for annual periods beginning on or after 1 July 2010 with earlier application permitted. The interpretation shall be applied retrospectively. The interpretation is not applicable to the Company as the Company does not extinguish any of its financial liabilities with equity instruments.
- IAS 12 (amended) In December 2010, the IASB issued published the pronouncement "Deferred Tax: Recovery of Underlying Assets - Amendments to IAS 12". The new pronouncement "Deferred Tax: Recovery of Underlying Assets - Amendments to IAS 12" sets presumptions for the recovery (e.g. use or sale) of certain assets. This is relevant in cases where the type of recovery has different tax consequences. The pronouncement sets the rebuttable presumption that the carrying amount of investment property that is measured using the fair value model in IAS 40 will be recovered through sale. Moreover, the carrying amount of a non-depreciable asset measured using the revaluation model in IAS 16 is always deemed to be recovered through sale. The amendment supersedes SIC 21 and shall be applied for annual periods beginning on or after 1 January 2012. Earlier application is permitted. As the Company does not have investment properties or non-depreciable asset measured using the revaluation model in IAS 16, the amended standard will not have any impact on the Company's separate financial statements.

2.2. Investments in subsidiaries

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of investment.

The subsidiaries of the Company and the ownership interest are presented below:

	Country of incorporation	Ownership interest As at 31 December 2010	Ownership interest As at 31 December 2009
T-Mobile Macedonia AD	Macedonia	100	100
e-Makedonija	Macedonia	100	100

T-Mobile Macedonia AD is the leading mobile service provider in Macedonia, while e-Makedonija is a foundation, established to support application and development of information technology in Macedonia.

Notes to the separate financial statements

2.3. Foreign currency translation

2.3.1. Functional and presentation currency

The separate financial statements are presented in thousands of Macedonian denars, which is the Company's functional and presentation currency.

2.3.2. Transactions and balances

Transactions in foreign currencies are translated to denars at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the financial statement date are translated to denars at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the Profit for the year (Finance income/expenses). Non-monetary financial assets and liabilities denominated in foreign currency are translated to denars at the foreign exchange rate ruling at the date of transaction.

The foreign currencies deals of the Company are predominantly EURO (EUR) and United States Dollars (USD), based.

The exchange rates used for translation at 31 December 2010 and 31 December 2009 were as follows:

	2010	2009
	MKD	MKD
1 USD	46.31	42.67
1 EUR	61.51	61.17
1 CHF	49.30	41.12

2.4. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets of the Company include, cash and cash equivalents, deposits with banks, equity instruments of another entity (available-for-sale and at fair value through profit or loss) and contractual rights to receive cash (trade and other receivables) or another financial asset from another entity.

Financial liabilities of the Company include liabilities that originate from contractual obligations to deliver cash or another financial asset to another entity (non-derivatives). In particular, financial liabilities include trade and other payables.

2.4.1. Financial assets

The Company classifies its financial assets in the following categories:

- (a) financial assets at fair value through profit or loss
- (b) loans and receivables
- (c) available-for-sale financial assets (AFS)

The classification depends on the purpose for which the financial asset was acquired. Management determines the classification of financial assets at their initial recognition.

Regular way purchases and sales of financial assets are recognized on the trade-date, the date on which the Company commits to purchase or sell the asset. Investments are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the Profit for the year.

The Company assesses at each financial statement date whether there is objective evidence that a financial asset is impaired. There is objective evidence of impairment if as a result of loss events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Impairment losses of financial assets are recognized in the Profit for the year against allowance accounts to reduce the carrying amount until the derecognition of the financial asset, when the net carrying amount (including any allowance for

Notes to the separate financial statements

impairment) is derecognized from the Statement of financial position. Any gains or losses on derecognition are calculated and recognized as the difference between the proceeds from disposal and the (net) carrying amount derecognized.

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

(a) Financial assets at fair value through profit or loss

This category comprises those financial assets designated at fair value through profit or loss at inception. A financial asset is classified in this category if the Company manages such asset and makes purchase and sale decisions based on its fair value in accordance with the Company investment strategy for keeping investments within portfolio until there are favourable market conditions for their sale.

'Financial assets at fair value through profit or loss' are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are recognized in the Profit for the year (Finance income/expenses) in the period in which they arise.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except those with maturities over 12 months after the financial statement date. These are classified as non-current assets.

The following items are assigned to the "loans and receivables" measurement category:

- cash and cash equivalents
- deposits with bank
- trade receivables
- other receivables
- employee loans
- receivables and loans to third parties

Loans and receivables are initially recognized at fair value and subsequently carried at amortized cost using the effective interest method.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, call deposits held with banks and other short-term highly liquid investments with original maturities of three months or less.

Should an impairment on cash and cash equivalents occur, it would be recognized in the Profit for the year (Finance expenses).

Trade and other receivables

Trade and other receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the trade receivable is impaired.

If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in the Profit for the year (Other operating expenses – Impairment losses on trade and other receivables).

The Company's policy for collective assessment of impairment is based on the aging of the receivables due to the large number of relatively similar type of customers.

Notes to the separate financial statements

Individual valuation is carried out for the largest customers and international customers and also for customers under litigation and bankruptcy proceedings. Itemized valuation is also performed in special circumstances.

When a trade receivable is established to be uncollectible, it is written off against Other operating expenses in the Profit for the Year (Impairment losses on trade and other receivables) with a parallel release of the cumulated impairment on the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against the recognized loss in the Profit for the year.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss shall be reversed by adjusting an allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed. The amount of the reversal shall be recognized in the Profit for the year as a reduction to Other operating expenses (Impairment losses on trade and other receivables).

Amounts due to, and receivable from, other network operators are shown net where a right of set-off exists and the amounts are settled on a net basis (such as receivables and payables related to international traffic).

Employee loans

Employee loans are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

Difference between the nominal value of the loan granted and the initial fair value of the employee loan is recognized as prepaid employee benefits. Interest income on the loan granted calculated by using the effective interest method is recognized as finance income, while the prepaid employee benefits are amortized to Personnel expenses evenly over the term of the loan.

Impairment losses on Employee loans, if any, are recognized in the Profit for the year (Personnel expenses).

(c) Available-for-sale financial assets (AFS)

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the financial statement date. Purchases and sales of investments are recognised on the trade-date – the date on which the Company commits to purchase or sell the asset.

Subsequent to initial recognition all available-for-sale financial assets are measured at fair value, except that any instrument that does not have a quoted market price in an active market and whose fair value cannot be reliably measured is stated at cost, including transaction costs, less impairment losses. The intention of the Company is to dispose these assets when there are favourable market conditions for their sale. Changes in the fair value of financial assets classified as available for sale are recognised in equity. When financial assets classified as available for sale are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the Profit for the year as gains and losses from investment securities.

The Company assesses at each financial statement date whether there is objective evidence that a financial asset is impaired. There is objective evidence of impairment if as a result of loss events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If any such evidence exists for AFS financial assets, the cumulative unrealized gain (if any) is reclassified from Other comprehensive income to Profit for the year, and any remaining difference is also recognized in the Profit for the year (Finance income). Impairment losses recognized on equity instruments are not reversed through the Profit for the year.

When AFS financial assets are sold or redeemed, therefore derecognized, the fair value adjustments accumulated in equity are reclassified from Other comprehensive income to Profit for the year (Finance income).

2.4.2. Financial liabilities

Trade and other payables

Trade and other payables (including accruals) are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. The carrying values of trade and other payables approximate their fair values due to their short maturity.

Notes to the separate financial statements

2.5. Inventories

Inventories are stated at the lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

The cost of inventories is based on weighted average cost formula and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition.

Phone sets are often sold for less than cost in connection with promotions to obtain new subscribers with minimum commitment periods. Such loss on the sale of equipment is only recorded when the sale occurs as they are sold as part of a profitable service agreement with the customer and if the normal resale value is higher than the cost of the phone set. If the normal resale value is lower than costs, the difference is recognized as impairment immediately.

Impairment losses on Inventories are recognized in Other operating expenses (Write down of inventories to net realisable value).

2.6. Non current assets held for sale

An asset is classified as held for sale if it is no longer needed for the future operations of the Company, and has been identified for sale, which is highly probable and expected to take place within 12 months. These assets are accounted for at the lower of carrying value or fair value less cost to sell. Depreciation is discontinued from the date of designation to the held for sale status. When an asset is designated for sale, and the fair value is determined to be lower than the carrying amount, the difference is recognized in the Profit for the year (Depreciation and amortization) as an impairment loss.

2.7. Property, plant and equipment (PPE)

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses (see note 2.9).

The cost of an item of PPE comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the costs if the obligation incurred can be recognized as a provision according to IAS 37 – Provisions, Contingent Liabilities and Contingent Assets.

The cost of self-constructed assets includes the cost of materials and direct labour.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the Profit for the year during the financial period in which they are incurred.

When assets are scrapped, the cost and accumulated depreciation are removed from the accounts and the loss is recognized in the Profit for the year as depreciation expense.

When assets are sold, the cost and accumulated depreciation are removed from the accounts and any related gain or loss, determined by comparing proceeds with carrying amount, is recognized in the Profit for the year (Other operating income).

Depreciation is charged to the Profit for the year on a straight-line basis over the estimated useful lives of items of property, plant and equipment. Assets are not depreciated until they are available for use. Land is not depreciated. The assets useful lives and residual values are reviewed, and adjusted if appropriate, at least once a year. For further details on the groups of assets impacted by the most recent useful life revisions see note 12.

Notes to the separate financial statements

The estimated useful lives are as follows:

	2010	2009
	Years	Years
Buildings	20-40	20-40
Aerial and cable lines	20-25	20-25
Telephone exchanges	10	10
Computers	4	4
Furniture and fittings	4-10	4-6
Vehicles	4-10	4-10
Other	2-15	2-15

2.8. Intangible assets

Intangible assets that are acquired by the Company are stated at cost less accumulated amortisation and impairment losses (see note 2.9).

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

The useful lives of concession and licenses are determined based on the underlying agreements and are amortized on a straight line basis over the period from availability of the frequency for commercial use until the end of the initial concession or license term. No renewal periods are considered in the determination of useful life (see note 13).

The estimated useful lives are as follows:

	2010	2009
	Years	Years
Software and software licences	2-5	2-5
Concession	18	18

Amortisation is charged to the Profit for the year on a straight-line basis over the estimated useful lives of intangible assets. Intangible assets are amortised from the date they are available for use. The assets useful lives are reviewed, and adjusted if appropriate, at least once a year.

In determining whether an asset that incorporates both intangible and tangible elements should be treated under IAS 16 - Property, Plant and Equipment or as an intangible asset under IAS 38 - Intangible Assets, management uses judgment to assess which element is more significant and recognizes the assets accordingly.

2.9. Impairment of PPE and intangible assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment.

Assets that are subject to amortization or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units - CGUs).

Impairment losses are recognized in the Profit for the year (Depreciation and amortization). Non-financial assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

2.10. Provisions and contingent liabilities

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

Notes to the separate financial statements

Provisions are measured and recorded as the best estimate of the expenditure required to settle the present obligation at the financial statement date. The provision charge is recognized in the Profit for the year within the expense corresponding to the nature of the provision.

No provision is recognized for contingent liabilities. A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

2.11. Share capital

Ordinary shares are classified as equity.

2.12. Treasury shares

When the Company purchases its equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes), is deducted from equity attributable to the Company's equity holders until the shares are cancelled or reissued. When such shares are subsequently reissued, any consideration received (net of any directly attributable incremental transaction costs and the related income tax effects) is included in equity attributable to the Company's equity holders.

2.13. Other reserves

Under local statutory legislation, the Company is required to set aside 15 percent of its net statutory profit for the year in a statutory reserve until the level of the reserve reaches 1/5 of the share capital. These reserves are used to cover losses and are not distributed to shareholders except in the case of bankruptcy of the Company.

2.14. Revenues

Revenues for all services and equipment sales (see note 17) are shown net of VAT and discounts. Revenue is recognized when the amount of the revenue can be reliably measured, and when it is probable that future economic benefits will flow to the Company and specific criteria of IAS18 on the sale of goods and rendering of services are met for the provision of each of the Company's services and sale of goods.

Customers of the Company are granted loyalty awards (credit points) based on their usage of the Company's services including timely payment of their invoices. Loyalty awards can be accumulated and redeemed to obtain future benefits (e.g. handsets, telecommunication equipment, etc.) from the Company. When customers earn their credit points, the fair value of the credit points earned are deducted from the revenue invoiced to the customer, and recognized as Other liabilities (deferred revenue). On redemption (or expiry) of the points, the deferred revenue is released to revenue as the customer collected (or waived) the undelivered element of the deemed bundle.

Revenues from operating leases are recognized on a straight line basis over the period the services are provided.

2.14.1. Fixed line telecommunications revenues

Revenue is primarily derived from services provided to customer subscribers and other third parties using telecommunications network, and equipment sales.

Customer subscriber arrangements typically include an equipment sale, subscription fee and charge for the actual voice, internet, data or multimedia services used. The Company considers the various elements of these arrangements to be separate earnings processes for IFRS purposes and recognizes the revenue for each of the deliverables using the residual method. These units are identified and separated, since they have value on a standalone basis and are sold not only in a bundle, but separately as well. Therefore the Company recognizes revenues for all of these elements using the residual method that is the amount of consideration allocated to the delivered elements of the arrangements equals the total consideration less the fair value of the undelivered elements.

Notes to the separate financial statements

The Company provides customers with narrow and broadband access to its fixed and TV distribution networks. Service revenues are recognized when the services are provided in accordance with contractual terms and conditions. Airtime revenue is recognized based upon minutes of use and contracted fees less credits and adjustments for discounts, while subscription and flat rate revenues are recognized in the period they relate to.

Revenue and expenses associated with the sale of telecommunications equipment and accessories are recognized when the products are delivered, provided there are no unfulfilled company obligations that affect the customer's final acceptance of the arrangement.

Revenues from premium rate services (voice and non-voice) are recognized on a gross basis when the delivery of the service over the network is the responsibility of the Company, the Company establishes the prices of these services and bears substantial risks of these services, otherwise presented on a net basis.

Customers may also purchase prepaid public phone and internet credits ("prepaid cards") which allow those customers to use the telecommunication network for a selected amount of time. Customers must pay for such services at the date when the card is purchased. Revenues from the sale of prepaid cards are recognized when used by the customers or when the cards expired with unused traffic.

Third parties using the telecommunications network include other telecommunications providers which terminate or transit calls on the network. These wholesale (incoming) traffic revenues are recognized in the period of related usage. A proportion of the revenue received is often paid to other operators (interconnect) for the use of their networks, where applicable. The revenues and costs of these terminate or transit calls are stated gross in these separate financial statements as the Company is the principal supplier of these services using its own network freely defining the pricing of the service, and recognized in the period of related usage.

2.14.2. System integration and IT revenues

Contracts for network services consist of the installation and operation of communication networks for customers. Revenues for voice and data services are recognized under such contracts when used by the customer.

Revenue from system integration contracts requiring the delivery of customized products and/or services is generally covered by fixed-price contracts and revenue is recognized based on percentage of completion taking into account the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs.

Revenue from hardware and sales is recognized when the risk of ownership is substantially transferred to the customer, provided there are no unfulfilled obligations that affect the customer's final acceptance of the arrangement. Any costs of these obligations are recognized when the corresponding revenue is recognized.

Revenues from construction contracts are accounted for using the percentage-of-completion method. The stage of completion is determined on the basis of the costs incurred to date as a proportion of the estimated total costs. Receivables from construction contracts are classified in the Statement of financial position as Trade and other receivables.

2.15. Dividend Income

Dividend income is recognized in the Profit for the year when the Company's right to receive payments is established and inflow of economic benefits is probable.

2.16. Employee benefits

2.16.1. Short term employee benefits and pensions

The Company, in the normal course of business, makes payments on behalf of its employees for pensions, health care, employment and personnel tax which are calculated according to the statutory rates in force during the year, based on gross salaries and wages. Food allowances, travel expenses and holiday allowances are also calculated according to the local legislation. The Company makes these contributions to the Governmental and private funds. The cost of these payments is charged to the Profit for the year in the same period as the related salary cost. No provision is created for holiday allowances for non-used holidays as according the local legislation the employer is obliged to provide condition for usage, and the employee to use the annual holiday within one year. This is also exercised as Company policy and according the historical data employees use their annual holiday within the one year legal limit. The Company does not operate any other pension

Notes to the separate financial statements

scheme or post retirement benefits plan and consequently, has no obligation in respect of pensions. The Company has legal obligation to pay to employees two average monthly salaries in Republic of Macedonia at their retirement date, for which appropriate liability is recognized in the separate financial statements measured at the present value of two average monthly salaries together with adjustments incorporated in the actuarial calculation. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high quality bonds that are denominated in the currency in which the benefits will be paid. In addition, the Company is not obligated to provide further benefits to current and former employees.

2.16.2. Bonus plans

The Company recognises a liability and an expense for bonuses taking into consideration the financial and operational results. The Company recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.16.3. Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the nominal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognizes termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without the possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy.

2.17. Marketing expenses

Marketing costs are expensed as incurred. Marketing expenses are disclosed in note 19.

2.18. Income taxes

2.18.1. Income tax

Companies do not have to pay income tax on their profit before tax (earned since 1 January 2009) until that profit is distributed in a form of dividend or other forms of profit distributions. If dividend is paid, 10% income tax is payable at the moment of the dividend payment, regardless of whether in monetary or non-monetary form, to the foreign non resident legal entities and, foreign and domestic individuals. The dividends paid out to the resident legal entities are tax exempted. Apart of distribution of dividends, the tax is still payable on the non-deductable expenses incurred in that fiscal year, decreased by the amount of tax credits and other tax relief's (see note 2.19).

2.18.2. Deferred income tax

Due to the changes in the Macedonian tax legislation effective from 1 January 2009, the tax rate for undistributed profits was effectively reduced to zero, as tax is only payable when profits are distributed. According IAS 12.52A, deferred tax assets and liabilities should be measured using the undistributed rate. This resulted in reversal of part of the deferred tax asset and all deferred tax liability balances as of 31 December 2009, and reversal of all deferred tax assets as of 31 December 2010. In line with the requirements of SIC 25, the Company accounted the impact of this change in the profit and loss in 2009 and 2010, respectively (see note 9).

Notes to the separate financial statements

2.19. Tax on non-deductable expenses

At the end of fiscal year the companies are liable to pay tax on non deductible expenses, regardless of their financial results. The basis is expenses which are not within the scope of the company business i.e. non deductible expenses (representation expenses, provisions, gifts etc) less tax credits and other tax relief's. The tax on non-deductable expenses is recognized in the Profit for the year (Other operating expenses) against Other taxes (see note 8).

2.20. Leases

2.20.1. Operating lease – Company as lessor

Assets leased to customers under operating leases are included in Property, plant and equipment in the Statement of financial position. They are depreciated over their expected useful lives on a basis consistent with similar fixed assets. Rental income is recognized on a straight-line basis over the lease term.

2.20.2. Operating lease – Company as lessee

Costs in respect of operating leases are charged to the Profit for the year on a straight-line basis over the lease term.

2.21. Earnings per share

Basic earnings per share is calculated by dividing profit attributable to the equity holders of the Company for the period by the weighted average number of common stocks outstanding.

2.22. Dividends declared by the Company

Dividends are recognised as a liability and debited against equity in the Company's separate financial statements in the period in which they are approved by the Company's shareholders.

2.23. Comparative information

The comparative information as presented in these separate financial statements is consistent with the current year presentation.

3. FINANCIAL RISK MANAGEMENT

3.1. Financial risk factors

The Company does not apply hedge accounting for its financial instruments, all gains and losses are recognized in the Profit for the year except financial assets classified as available for sale that are recognised in Other comprehensive income. The Company is exposed in particular to credit risks related to its financial assets and risks from movements in exchange rates, interest rates, and market prices that affect its assets and liabilities. Financial risk management aims to limit these market risks through ongoing operational and finance activities.

The detailed descriptions of risks, the management thereof as well as sensitivity analyses are provided below. Sensitivity analyses include potential changes in profit before tax. The potential impacts disclosed (less tax) are also applicable to the Company's Equity.

3.1.1. Market risk

Market risk is defined as the 'risk that the fair value or value or future cash flows of a financial instrument will fluctuate because of changes in market prices' and includes interest rate risk, currency risk and other price risk.

As the vast majority of the revenues and expenses of the Company arise in MKD, the functional currency of the Company is MKD, and as a result, the Company objective is to minimize the level of its financial risk in MKD terms.

For the presentation of market risks, IFRS 7 requires sensitivity analyses that show the effects of hypothetical changes of relevant risk variables on profit or loss and shareholders' equity. The periodic effects are determined by relating the

Notes to the separate financial statements

hypothetical changes in the risk variables to the balance of financial instruments at the financial statement date. The balances at the end of the reporting period are usually representative for the year as a whole, therefore the impacts are calculated using the year end balances as though the balances had been constant throughout the reporting period. As the global economic situation has not changed significantly compared to the end of the previous reporting period, the methods and assumptions used in the sensitivity calculations did not change significantly.

a) Foreign currency risk

The functional currency of the Company is the Macedonian denar.

The foreign exchange risk exposure of the Company is related to holding foreign currency cash balances, and operating activities through revenues from and payments to international telecommunications carriers as well as capital expenditure contracted with vendors in foreign currency.

The currencies giving rise to this risk are primarily EUR. The Company uses cash deposits in foreign currency, predominantly in EUR, and cash deposits in denars linked to foreign currency, to economically hedge its foreign currency risk as well as local currency risk in accordance with the available banks offers. The Company manages the foreign exchange risk exposure through maintaining higher amount of deposits in EUR as a proven stable currency and by striving to lower the number of contracts with foreign operators in USD as relatively unstable currency in the period and by executing payments in USD from cash reserves in that currency.

The foreign currency risk sensitivity information required by IFRS 7 is limited to the risks that arise on financial instruments denominated in currencies other than the functional currency in which they are measured.

The Company accumulated more cash in EUR and USD than its trade payables in EUR and USD. At 31 December 2010, if MKD would have been 1% (2009: 1%) weaker or stronger against EUR, profit would have been MKD 41,500 thousand (2009: 35,867 MKD thousand) in net balance higher or lower, respectively. At 31 December 2010, if MKD would have been 1% (2009: 1%) weaker or stronger against USD, profit would have been MKD 1,022 thousand (2009: MKD 373 thousand) in net balance higher or lower, respectively.

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Change in the interest rates and interest margins may influence financing costs and returns on financial investments.

The interest rate risk and return on investment is of secondary importance compared to the safety and liquidity objectives described above. The Company is minimizing interest rate risk through defining of fixed interest rates in the period of the validity of certain financial investments. The investments are limited to relatively low risk financial investment forms in anticipation of earning a fair return relative to the risk being assumed.

The Company has no interest bearing liabilities, while it incurs interest rate risk on cash deposits with banks and loans to employees. No policy to hedge the interest rate risk is in place. Changes in market interest rates affect the interest income on deposits with banks.

The Company had MKD 6,786,872 thousand deposits (including call deposits) as of 31 December 2010, 1% rise in market interest rate would have caused (ceteris paribus) the interest received to increase with approx. MKD 67,869 thousand annually, while similar decrease would have caused the same decrease in interest received. Amount of deposit is MKD 7,726,842 thousand (including call deposits) as of 31 December 2009, therefore 1% rise in market interest rate would have caused (ceteris paribus) the interest received to increase with approx. MKD 77,268 thousand annually, while similar decrease would have caused the same decrease in interest received.

c) Other price risk

The Company's investments are in equity of other entities that are publically traded on the Macedonian Stock Exchange, both on its Official and Regular market. The management continuously monitors the portfolio equity investments based on fundamental and technical analysis of the shares. All buy and sell decisions are subject to approval by the relevant Company's bodies. In line with the Company strategy, the investments within portfolio are kept until there are favourable market conditions for their sale.

Notes to the separate financial statements

As part of the presentation of market risks, IFRS 7 also requires disclosures on how hypothetical changes in risk variables affect the price of financial instruments. As of 31 December 2009 and 31 December 2010, the Company holds investments, which could be affected by risk variables such as stock exchange prices.

The Company had MKD 65,125 thousand investments in equity of other entities that are publically traded on the Macedonian Stock Exchange as of 31 December 2010, 20% rise in market price would have caused (ceteris paribus) MKD 13,025 thousand gain, while similar decrease would have caused the same loss in the Profit for the year. The amount of the investments in equity of other entities that are publically traded on the Macedonian Stock Exchange is MKD 61,376 thousand as of 31 December 2009, therefore 20% rise in market price would have caused (ceteris paribus) MKD 12,275 thousand gain, while similar decrease would have caused the same loss in the Profit for the year.

3.1.2. Credit risk

Credit risk is defined as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Company is exposed to credit risk from its operating activities and certain financing activities.

Counterparty limits are determined based on the provided Letter of guarantees in accordance with the market conditions of those banks willing to issue a bank guarantee. The total amount of bank guarantees that will be provided should cover the amount of the projected free cash of the Company.

With regard to financing activities, transactions are primarily to be concluded with counterparties (banks) that have at least a credit rating of BBB+ (or equivalent) or where the counterparty has provided a guarantee where the guarantor has to be at least BBB+ (or equivalent).

In cases where Company's available funds are exceeding the total amount of the provided bank guarantees mentioned above, the financial investment of the available free cash is to be performed in accordance to the evaluation of the bank risk based on CAEL methodology ratings as an off – site rating system.

The depositing decisions are made based on the following priorities:

- To deposit in banks (Deutsche Telekom core banks, if possible) with provided bank guarantee from the banks with the best rating and the best quality wording of the bank guarantee.
- To deposit in banks with provided bank guarantee from the banks with lower rating and poorer quality wording of the bank guarantee.
- If the total amount of deposits can not be placed in banks covered with bank guarantees with at least BBB+ rating (or equivalent credit rating), then depositing will be performed in local banks without bank guarantee. In this case, the determination of counterparty limits per banks shall be performed in accordance with CAEL methodology (evaluation of bank risk components – capital, assets, earning and liquidity).

CAEL methodology evaluates banks' financial ratios as an integral part of the four CAEL components - Capital, Assets, Earnings and Liquidity. The final score of the banks (on a scale from 1 to 5) is related to the banks' operations and performance for the analysed period. The Company policy is to invest in banks, which final score varies within following 3 ranges:

A - Banks with evaluation from 1.84 to 2.45 – investments not exceeding 80% from the bank shareholder's capital.

B - Banks with evaluation from 2.46 to 3.07 – investments not exceeding 70% from the bank shareholder's capital.

C - Banks with evaluation from 3.08 to 3.69 – investments not exceeding 60% from the bank shareholder's capital.

The process of managing the credit risk from operating activities includes preventive measures such as creditability checking and prevention barring, corrective measures during legal relationship for example reminding and disconnection activities, collaboration with collection agencies and collection after legal relationship as litigation process, court proceedings, involvement of the executive unit and factoring. The overdue payments are followed through a debt escalation procedure based on customer's type, credit class and amount of debt.

The credit risk is controlled through credibility checking – which determines that the customer is not indebted and the customers credit worthiness and through preventive barring – which determinates the credit limit based on the customer's previous traffic revenues.

Notes to the separate financial statements

The Company has no significant concentration of credit risk with any single counter party or group of counter parties having similar characteristics.

The Company's procedures ensure on a permanent basis that sales are made to customers with an appropriate credit history and not exceed an acceptable credit exposure limit.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the Statement of financial position. Consequently, the Company considers that its maximum exposure is reflected by the amount of debtors net of provisions for impairment recognized and the amount of cash deposits in banks at the financial statement date.

The following table represents Company exposure to credit risk in 2010 and 2009:

In thousands of denars	2010	2009
Deposits with banks	5,777,401	7,126,056
Cash and cash equivalents	1,009,471	600,786
Trade debtors – domestic	1,556,551	1,475,611
Trade debtors – foreign	39,057	34,818
Loans to employees	123,035	121,924
Receivables from related parties	251,470	205,889
Other receivables	11,443	16,212
	<u>8,768,428</u>	<u>9,581,296</u>

Cash and cash equivalents in the table above exclude cash on hand as no credit risk exists for this category.

Largest amount of one deposit in 2010 is MKD 1,383,862 thousand, denominated in EUR 22,500 thousand, (2009: MKD 1,260,000 thousand). In addition, the Company has deposits with 5 domestic banks (2009: 5 domestic banks).

3.1.3. Liquidity risk

Liquidity risk is the risk that an entity may encounter difficulty in meeting obligations associated with financial liabilities.

Liquidity risk is defined as the risk that the Company could not be able to settle or meet its obligations on time.

The investment portfolio shall remain sufficiently liquid to meet all operating requirements that can be reasonably anticipated. This is accomplished by structuring the portfolio so that financial instruments mature concurrently with cash needs to meet anticipated demands.

The Company's policy is to maintain sufficient cash and cash equivalents to meet its commitments in the foreseeable future. Any excess cash is mostly deposited in commercial banks.

The Company's liquidity management process includes projecting cash flows by major currencies and considering the level of necessary liquid assets, considering business plan, historical collection and outflow data. Monthly, semi-annually and annually cash projections are prepared and updated on a daily basis by the Cash Management Department.

3.2. Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The total amount of equity managed by the Company, as at 31 December 2010, is MKD 17,470,439 thousand, as per local GAAP (2009: MKD 17,970,698 thousand). Out of this amount MKD 9,583,888 thousand (2009: MKD 9,583,888 thousand) represent share capital and MKD 1,916,777 thousand (2009: MKD 1,916,777 thousand) represent statutory reserves, which are not distributable (see note 2.13). The Company has also acquired treasury shares (see notes 2.12 and 16.1). The transaction is in compliance with the local legal requirements that by acquiring treasury shares the total equity of the Company shall not be less than the amount of the share capital and reserves which are not distributable to shareholders by law or by Company's statute. In addition, according the local legal requirements dividends can be paid out to the shareholders in amount that shall not exceed the net profit for the year as presented in the separate financial statements of the Company, increased for the undistributed net profit from previous years or increased for the other distributable reserves, i.e. reserves that exceed the statutory reserves and other reserves defined by the Company's statute. The Company is in compliance with all statutory capital requirements.

Notes to the separate financial statements

3.3. Fair value estimation

Cash and cash equivalents, trade receivables and other current financial assets mainly have short term maturity. For this reason, their carrying amounts at the reporting date approximate their fair values.

The fair value of non current portion of trade receivables comprising of employee loans are determined by using discounted cash-flow valuation technique.

Financial assets available for sale include investment in equity instruments that are measured at fair value.

The fair value of publicly traded financial assets at fair value through profit and loss is based on quoted market prices at the financial statement date.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Company makes estimates and assumptions concerning the future. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The most critical estimates and assumptions are outlined below.

4.1. Useful lives of assets

The determination of the useful lives of assets is based on historical experience with similar assets as well as any anticipated technological development and changes in broad economic or industry factors. The appropriateness of the estimated useful lives is reviewed annually, or whenever there is an indication of significant changes in the underlying assumptions. We believe that the accounting estimate related to the determination of the useful lives of assets is a critical accounting estimate since it involves assumptions about technological development in an innovative industry and heavily dependent on the investment plans of the Company. Further, due to the significant weight of depreciable assets in our total assets, the impact of any changes in these assumptions could be material to our financial position, and results of operations. As an example, if the Company was to shorten the average useful life of its assets by 10%, this would result in additional annual depreciation and amortization expense of approximately MKD 194,410 thousand (2009: MKD 168,824 thousand). See note 12 for the changes made to useful lives in the reported years.

The Company constantly introduces a number of new services or platforms including, but not limited to the fiber-to-the-home rollout. In case of the introduction of such new services, the Company conducts a revision of useful lives of the already existing platforms, but in the vast majority of the cases these new services are designed to co-exist with the old platforms, resulting in no change-over to the new technology. Consequently, the useful lives of the older platforms usually do not require shortening.

4.2. Estimated impairment of investments in subsidiaries

We assess the impairment of investments in subsidiaries whenever there is a reason to believe that the carrying value may materially exceed the recoverable amount and where impairment of value is anticipated. In 2010 there are no indicators for impairment of investment in subsidiaries.

4.3. Estimated impairment of property, plant and equipment, and intangibles

We assess the impairment of identifiable property, plant, equipment and intangibles whenever there is a reason to believe that the carrying value may materially exceed the recoverable amount and where impairment of value is anticipated. The calculations of recoverable amounts are primarily determined by value in use calculations, which use a broad range of estimates and factors affecting those. Among others, we typically consider future revenues and expenses, technological obsolescence, discontinuance of services and other changes in circumstances that may indicate impairment. If impairment is identified using the value in use calculations, we also determine the fair value less cost to sell (if determinable), to calculate the exact amount of impairment to be charged. As this exercise is highly judgmental, the amount of a potential impairment may be significantly different from that of the result of these calculations. Management has performed an impairment test based on a 10 years cash flow projection and used a perpetual growth rate of 2% (2009: 1%) to determine the terminal value after 10 years. Value in use was determined using discounted cash flow analysis. The discount rate used was 9.38% (2009: 8.55%).

Notes to the separate financial statements

4.4. Estimated impairment of trade and other receivables

We calculate impairment for doubtful accounts based on estimated losses resulting from the inability of our customers to make the required payments. For the largest customers and international customers, impairment is calculated on an individual basis, while for other customers it is estimated on a portfolio basis, for which we base our estimate on the ageing of our account receivables balance and our historical write-off experience, customer credit-worthiness and recent changes in our customer payment terms (see note 2.4.1 (b)). These factors are reviewed periodically, and changes are made to the calculations when necessary. If the financial condition of our customers were to deteriorate, actual write-offs of currently existing receivables may be higher than expected and may exceed the level of the impairment losses recognized so far (see note 3.1.2).

4.5. Provisions

Provisions in general are highly judgmental, especially in case of legal disputes. The Company assesses the probability of an adverse event as a result of a past event and if the probability of an outflow of economic benefits is evaluated to be more than 50%, the Company fully provides for the total amount of the estimated liability. As the assessment of the probability is highly judgmental, in some cases the evaluation may not prove to be in line with the eventual outcome of the case.

4.6. Subscriber acquisition costs

Subscriber acquisition costs primarily include the loss on the equipment sales (revenues and costs disclosed separately) and fees paid to subcontractors that act as agents to acquire new customers. The Company's agents also spend a portion of their agent fees for marketing the Company's products, while a certain part of the Company's marketing costs could also be considered as part of the subscriber acquisition costs. The up-front fees collected from customers for activation or connection are marginal compared to the acquisition costs. These revenues and costs are recognized when the customer is connected to the Company's fixed network. No such costs or revenues are capitalized or deferred. These acquisition costs (losses) are recognized immediately as they are not accurately separable from other marketing costs. The total amount of agent fees in 2010 is MKD 7,778 thousand (2009: MKD 12,526 thousand).

5. CASH AND CASH EQUIVALENTS

In thousands of denars	2010	2009
Call deposits	1,009,471	600,786
Cash on hand	40	33
	<u>1,009,511</u>	<u>600,819</u>

The interest rate on call deposits is in range from 0.50% p.a. to 2.00% p.a. (2009: from 2.21% p.a. to 4.10% p.a.). These deposits have maturities of less than 3 months.

The carrying amounts of the cash and cash equivalents are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	993,990	452,593
EUR	15,404	146,964
USD	113	1,250
Other	4	12
	<u>1,009,511</u>	<u>600,819</u>

Notes to the separate financial statements

Following is the breakdown of call deposits by categories and by credit rating of the Guarantor (see note 3.1.2):

In thousands of denars	2010	2009
Credit rating of the Guarantor : A+	816,177	-
Credit rating of the Guarantor : A	142,576	83
Credit rating of the Guarantor : A-	44,965	1,513
Credit rating of the Guarantor : BB+	5,753	-
Credit rating of the Guarantor : BBB+	-	599,190
	<u>1,009,471</u>	<u>600,786</u>

6. DEPOSITS WITH BANKS

Deposits with banks represent cash deposits in reputable domestic banks, with interest rates in range from 1.00% p.a. to 4.35% p.a. (2009: from 2.00% p.a. to 4.85% p.a.) and with maturity between 3 and 12 months.

The carrying amounts of the deposits with banks are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	1,317,224	3,112,436
EUR	4,460,177	4,013,620
	<u>5,777,401</u>	<u>7,126,056</u>

Following is the breakdown of deposits with banks by categories and by credit rating of the Guarantor (see note 3.1.2):

In thousands of denars	2010	2009
Credit rating of the Guarantor : A+	1,634,103	927,013
Credit rating of the Guarantor : A	1,238,307	528,237
Credit rating of the Guarantor : A-	2,904,952	3,097,995
Credit rating of the Guarantor : BB+	39	-
Credit rating of the Guarantor : BBB+	-	2,572,811
	<u>5,777,401</u>	<u>7,126,056</u>

Notes to the separate financial statements

7. TRADE AND OTHER RECEIVABLES

In thousands of denars	2010	2009
Trade debtors – domestic	2,690,041	2,901,596
Less: allowance for impairment	(1,133,490)	(1,425,985)
Trade debtors – domestic – net	1,556,551	1,475,611
Trade debtors – foreign	39,057	34,818
Receivables from related parties	251,470	205,889
Loans to third parties	3,088	3,033
Less: allowance for impairment	(3,088)	(3,033)
Loans to third parties– net	-	-
Loans to employees	123,035	121,924
Other receivables	11,443	16,212
Financial assets	1,981,556	1,854,454
Advances given to suppliers	80,296	103,445
Less: allowance for impairment	(74,050)	(74,050)
Advances given to suppliers – net	6,246	29,395
Prepayments and accrued income	51,565	36,602
	<u>2,039,367</u>	<u>1,920,451</u>
Less non-current portion: Other receivables	(8,714)	(6,841)
Less non-current portion: Loans to employees	(99,363)	(101,076)
Less non-current portion: Trade debtors -domestic	(207,202)	-
Current portion	<u>1,724,088</u>	<u>1,812,534</u>

Receivables from related parties represent receivables from T-Mobile Macedonia AD Skopje, Magyar Telekom Group and Deutsche Telekom Group (see note 29).

Loans to employees are collateralised by mortgages over real estate or with promissory note.

Loans to third parties represent loan with reference interest rate of 6 months EURIBOR with margin of 0.3%. Loans granted to employees carry effective interest rates of 6.25% p.a., 7% p.a. and 9.45% p.a. (2009: 4.55% and 7% p.a.).

Other receivables contain restricted cash in amount of MKD 9,570 thousand (2009: MKD 13,966 thousand) representing performance guaranties issued for sales projects.

All non-current receivables are due within 15 years of the financial statement date.

As of 31 December 2010, domestic trade debtors of MKD 1,503,455 thousand (2009: MKD 1,750,705 thousand) are impaired. The ageing of these receivables is as follows:

In thousands of denars	2010	2009
Less than 30 days	172,964	183,007
Between 31 and 180 days	226,489	199,001
Between 181 and 360 days	55,956	101,147
More than 360 days	1,048,046	1,267,550
	<u>1,503,455</u>	<u>1,750,705</u>

The total amount of the provision for domestic trade debtors is MKD 1,133,490 thousand (2009: MKD 1,425,985 thousand). Out of this amount MKD 1,125,017 thousand (2009: MKD 1,380,783 thousand) relate to provision made according the ageing structure of the above receivables, while, the amount of MKD 1,007 thousand (2009: MKD 4,560 thousand) is from customers under liquidation and bankruptcy which are fully impaired. In addition, the Company has a specific provision calculated in respect of a certain group of customers in amounting to MKD 7,466 thousand (2009: MKD 40,642 thousand).

The amount of impairment compared to the gross value of the domestic trade receivables is mainly a result of receivables which are overdue more than 360 days. The total amount of fully impaired receivables is MKD 923,264 thousand (2009 MKD 1,174,233 thousand). These receivables are mainly from two way disconnected customers, dismantled customers, litigated customers and customers that are no longer using the Company services.

Notes to the separate financial statements

The fair values of trade and other receivables are as follows:

In thousands of denars	2010	2009
Trade debtors – domestic	1,556,551	1,475,611
Trade debtors – foreign	39,057	34,818
Receivables from related parties	251,470	205,889
Loans to employees	123,035	121,924
Other receivables	11,443	16,212
Financial assets	1,981,556	1,854,454
Advances given to suppliers	6,246	29,395
Prepayments and accrued income	51,565	36,602
	<u>2,039,367</u>	<u>1,920,451</u>

Movement in allowance for impairment of domestic trade debtors

In thousands of denars	2010	2009
Impairment losses at 1 January	1,425,985	1,469,889
Charged to expense	18,845	68,434
Write off	(311,340)	(112,338)
Impairment losses at 31 December	<u>1,133,490</u>	<u>1,425,985</u>

Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.

As of 31 December 2010, foreign trade receivables in amount of MKD 27,009 thousand (2009: MKD 24,601 thousand) were past due but not impaired. These relate to a number of international customers assessed on individual basis in accordance with past Company experience and current expectations. The analysis of these past due foreign trade receivables is as follows:

In thousands of denars	2010	2009
Less than 30 days	3,299	6,099
Between 31 and 60 days	624	906
Between 61 and 90 days	426	8,638
Between 91 and 180 days	7,565	460
Between 181 and 360 days	7,448	1,279
More than 360 days	7,647	7,219
	<u>27,009</u>	<u>24,601</u>

There are no other past due but not impaired receivables except above mentioned.

The Company has renegotiated domestic trade receivables in carrying amount of MKD 33,437 thousand (2009: MKD 19,269 thousand). The carrying amount of loans and receivables, which would otherwise be past due, whose terms have been renegotiated is not impaired if the collectability of the renegotiated cash flows are considered ensured.

The carrying amounts of the Company's non-current trade and other receivables are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	315,279	102,263
EUR	-	5,654
	<u>315,279</u>	<u>107,917</u>

Notes to the separate financial statements

The carrying amounts of the Company's current trade and other receivables are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	1,580,309	1,721,000
EUR	138,812	85,474
USD	280	762
Other	4,687	5,298
	<u>1,724,088</u>	<u>1,812,534</u>

The credit quality of trade receivables that are neither past due nor impaired is assessed based on historical information about counterparty default rates.

Following is the credit quality categories of neither past due nor impaired domestic trade receivables:

In thousands of denars	2010	2009
Group 1	632,897	761,688
Group 2	110,937	259,796
Group 3	235,550	129,407
	<u>979,384</u>	<u>1,150,891</u>

Following is the credit quality categories of neither past due nor impaired foreign trade receivables:

In thousands of denars	2010	2009
Group 1	9,419	7,969
Group 2	2,629	2,248
	<u>12,048</u>	<u>10,217</u>

Group 1 –customers that on average are paying their bills before due date.

Group 2 –customers that on average are paying their bills on due date.

Group 3 –customers that on average are paying their bills after due date.

8. OTHER TAXES

Commencing from 1 January 2009 and during 2010 the Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year, while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. Therefore as of 31 December 2010 the tax computed on non-deductable expenses are presented as part of Other operating expenses in the Profit for the year and Other taxes in the Financial position statement (see note 24).

8.1. Other taxes receivable

In thousands of denars	2010	2009
VAT receivable	62,611	2,195
Tax on non-deductable expenses receivable	29,550	-
	<u>92,161</u>	<u>2,195</u>

8.2. Other taxes payable

In thousands of denars	2010	2009
VAT payable	-	21,285
Other taxes payable	-	581
	<u>-</u>	<u>21,866</u>

Notes to the separate financial statements

9. DEFERRED INCOME TAX

Recognised deferred income tax (assets)/liabilities

Deferred income tax (assets)/liabilities are attributable to the following items:

In thousands of denars	Assets		Liabilities		Net	
	2010	2009	2010	2009	2010	2009
Property, plant and equipment	-	(1,951)	-	-	-	(1,951)
Trade and other receivables	-	(1,426)	-	-	-	(1,426)
Financial assets at fair value through profit and loss	-	(1,555)	-	-	-	(1,555)
Trade and other payables	-	(5,284)	-	-	-	(5,284)
Provisions	-	(25,437)	-	-	-	(25,437)
Tax (assets)/liabilities	-	(35,653)	-	-	-	(35,653)
Net tax assets/(liabilities)	-	(35,653)	-	-	-	(35,653)

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The offset amounts are as follows:

In thousands of denars	2009
Deferred income tax assets:	
Deferred income tax asset to be recovered after more than 12 months	21,535
Deferred income tax asset to be recovered within 12 months	14,118
	<u>35,653</u>
Deferred tax liabilities:	
Deferred income tax liability to be recovered after more than 12 months	-
Deferred income tax liability to be recovered within 12 months	-
	<u>-</u>
Deferred income tax assets/(liabilities) net	<u>35,653</u>

Due to the changes in the Macedonian tax legislation, part of the deferred tax asset and all the liability balances were reversed as of 31 December 2009 and all deferred tax assets were reversed as of 31 December 2010 (see note 2.18.2).

Movement in temporary differences during the year

In thousands of denars	Balance 1 January 2010	Recognised in income	Balance 31 December 2010
Property, plant and equipment	(1,951)	1,951	-
Trade and other receivables	(1,426)	1,426	-
Financial assets at fair value through profit and loss	(1,555)	1,555	-
Trade and other payables	(5,284)	5,284	-
Provision	(25,437)	25,437	-
	<u>(35,653)</u>	<u>35,653</u>	<u>-</u>

Notes to the separate financial statements

In thousands of denars	Balance 1 January 2009	Recognised in income	Balance 31 December 2009
Property, plant and equipment	368,433	(370,384)	(1,951)
Intangible assets	8,026	(8,026)	-
Inventory	(34)	34	-
Trade and other receivables	(154,394)	152,968	(1,426)
Financial assets at fair value through profit and loss	1,591	(3,146)	(1,555)
Trade and other payables	(6,523)	1,239	(5,284)
Provision	(90,740)	65,303	(25,437)
	<u>126,359</u>	<u>(162,012)</u>	<u>(35,653)</u>

Due to the changes in the Macedonian tax legislation, the temporary differences in 2009 relate to non-deductible expenses giving rise to future tax credits, mainly for provisions charged to the Profit for the year (see note 2.18 and note 24).

10. INVENTORIES

In thousands of denars	2010	2009
Materials	131,972	73,919
Inventory for resale	87,681	68,890
Write down of inventories to net realisable value	<u>(4,429)</u>	<u>(7,894)</u>
	<u>215,224</u>	<u>134,915</u>

Movement in allowance for inventories to net realizable value:

In thousands of denars	2010	2009
Allowance at 1 January	7,894	16,382
Charged to expense	4,872	12,464
Write off	<u>(8,337)</u>	<u>(20,952)</u>
Allowance at 31 December	<u>4,429</u>	<u>7,894</u>

Allowance for inventory mainly relates to obsolete materials.

11. ASSETS HELD FOR SALE

Assets held for sale represent property, plant and equipment which are unusable within the Company and are identified for sale. Management intentions are to sell these assets within one year, subject to extension in certain circumstances. There is a plan to sell these assets and management has started to actively market them at a reasonable price.

Notes to the separate financial statements

12. PROPERTY, PLANT AND EQUIPMENT

At 31 December 2010	541,449	68,781	1,811	612,041

The transfer between asset categories had no impact on depreciation expense.

The review of the useful lives of intangible assets during 2010 confirmed the useful lives of these assets.

Notes to the separate financial statements

14. TRADE AND OTHER PAYABLES

In thousands of denars	2010	2009
Trade payables		
-Domestic	720,424	551,924
-Foreign	156,340	175,341
Liabilities to related parties	469,354	270,933
Other liabilities	112,249	44,749
Financial liabilities	1,458,367	1,042,947
Accrued expenses	721,270	815,847
Deferred revenue	54,570	56,076
Advances received	40,208	34,265
Other	34,765	34,765
	<u>2,309,180</u>	<u>1,983,900</u>

Liabilities to related parties represent liabilities to T-Mobile Macedonia AD Skopje, Magyar Telekom Group and Deutsche Telekom Group (see note 29).

The ageing analysis of domestic and foreign trade payables are as follows:

In thousands of denars	2010	2009
Less than 90 days	797,071	683,038
Between 90 and 180 days	42,610	10,826
More than 181 days	37,083	33,401
	<u>876,764</u>	<u>727,265</u>

The table above does not represent a contractual maturity but rather an aging analysis where the major part of the payables are within 90 days which is the Company's regular term for payment to suppliers.

The carrying amounts of trade and other payables are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	1,724,747	1,266,384
EUR	464,429	665,014
USD	102,550	39,359
Other	17,454	13,143
	<u>2,309,180</u>	<u>1,983,900</u>

15. PROVISION FOR OTHER LIABILITIES AND CHARGES

In thousands of denars	Legal cases	Other	Total
1 January 2010	625,802	231,758	857,560

31 December 2010	<u>560,813</u>	<u>20,329</u>	<u>581,142</u>

In thousands of denars	Legal cases	Severance	Other	Total
1 January 2009	741,384	153,720	212,030	1,107,134
Additional provision	140,095	2,673	23,053	165,821
Unused amount reversed	(26,794)	(54,729)	(3,068)	(84,591)
Used during period	(228,883)	(101,664)	(257)	(330,804)
31 December 2009	<u>625,802</u>	<u>-</u>	<u>231,758</u>	<u>857,560</u>

Notes to the separate financial statements

Analysis of total provisions:

In thousands of denars	2010	2009
Non current (legal cases and other)	520,389	311,767
Current	60,753	545,793
	<u>581,142</u>	<u>857,560</u>

Provisions for legal cases mainly relate to certain legal and regulatory claims brought against the Company. There are numerous legal cases for which provisions were recognized, none of which are individually material, therefore not disclosed. For certain legal cases information required under IAS 37 is not disclosed, if we have concluded that the disclosure can be expected to seriously prejudice the outcome of the proceedings.

Based on legal advice, the management does not expect that the outcome of these legal claims will give rise to any significant loss beyond the amounts provided at 31 December 2010.

Other includes provision made for the legal obligation of the Company to pay to employees two average monthly salaries in Republic of Macedonia at their retirement date (see note 2.16.1) and provision made for MTIP (see note 30). The provision is recognized against Personnel expenses in the Profit for the year. In addition, as a result of the findings of the Investigation, the identified impact was recognized under Provision for other liabilities and charges (see note 1.2).

16. CAPITAL AND RESERVES

Share capital consists of the following:

In thousands of denars	2010	2009
Ordinary shares	9,583,878	9,583,878
Golden share	10	10
	<u>9,583,888</u>	<u>9,583,888</u>

Share capital consists of one golden share with a nominal value of MKD 9,733 and 95,838,780 ordinary shares with a nominal value of MKD 100 each.

The golden share with a nominal value of MKD 9,733 is held by the Government of the Republic of Macedonia. In accordance with Article 16 of the Statute, the golden shareholder has additional rights not vested in the holders of ordinary shares. Namely, no decision or resolution of the Shareholders' Assembly related to: generating, distributing or issuing of share capital; integration, merging, separation, consolidation, transformation, reconstruction, termination or liquidation of the Company; alteration of the Company's principal business activities or the scope thereof; sale or abandonment either of the principal business activities or of significant assets of the Company; amendment of the Statute of the Company in such a way so as to modify or cancel the rights arising from the golden share; or change of the brand name of the Company; is valid if the holder of the golden share, votes against the respective resolution or decision. The rights vested in the holder of the golden share are given in details in the Company's Statute.

As of 31 December 2010, the ordinary shares of the Company were held as follows:

In thousands of denars	2010	%
Stonebridge AD Skopje, in liquidation	4,887,778	51.00
Government of the Republic of Macedonia	3,336,497	34.81
The Company (treasury shares)	958,388	10.00
International Finance Corporation (IFC)	179,698	1.88
Other minority shareholders	221,527	2.31
	<u>9,583,888</u>	<u>100.00</u>

16.1. Treasury shares

The Company acquired 9,583,878 of its own shares, representing 10% of its shares, through the Macedonian Stock Exchange during June, 2006. The total amount paid to acquire the shares, net of income tax, was MKD 3,843,505 thousand. The shares are held as treasury shares.

Notes to the separate financial statements

As a result of the findings of the Investigation, for one consultancy contract, the payments of which was erroneously capitalized as part of treasury shares in 2006 has been retrospectively derecognized from treasury shares (see note 1.2).

The amount of treasury shares of MKD 3,738,358 thousand (after restatement), has been deducted from shareholders' equity. The Company has the right to reissue these shares at a later date. All shares issued by the Company were fully paid.

17. REVENUES

In thousands of denars	2010	2009
Voice retail	3,401,760	4,367,896
Voice wholesale	1,922,963	1,317,792

Data	1,036,982	961,012
Equipment	359,350	373,178
TV	298,534	224,613
Other revenues	180,065	295,784
	<u>8,483,703</u>	<u>8,719,574</u>

18. PERSONNEL EXPENSES

In thousands of denars	2010	2009
Salaries	747,027	666,428
Contributions on salaries	242,725	230,637
Bonus payments	152,974	120,709
Other staff costs	92,754	113,954
Capitalised personnel costs	(88,501)	(66,230)
	<u>1,146,979</u>	<u>1,065,498</u>

Other staff costs mainly include holiday's allowance, termination benefits for 15 employees leaving the Company in 2010 (2009: 12 employees) and other benefits.

Bonus payments also include the cost for the Magyar Telekom's Mid Term Incentive Plan ("MTIP") (see note 30).

19. OTHER OPERATING EXPENSES

In thousands of denars	2010	2009
Services	406,969	426,443
Purchase cost of goods sold	405,602	469,063
Materials and maintenance	365,208	384,074
Premium rate services	216,232	232,450
Marketing and donations	203,045	225,761
Energy	180,222	152,651
Consultancy	75,070	53,958
Rental fees	37,322	40,236
Fees, levies and local taxes	36,584	181,467
Tax on non-deductable expenses	22,405	-
Impairment losses on trade and other receivables	18,845	68,434
Insurance	13,780	13,406
Write down of inventories to net realisable value	4,872	12,464
Other	89,613	(17,435)
	<u>2,075,769</u>	<u>2,242,972</u>

Services mainly include postal expenses, expenses for maintenance of IT equipment and other service fees (such as cleaning, security and mobile telecommunication services).

Notes to the separate financial statements

Commencing from 1 January 2009 and during 2010 the Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year, while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. Therefore as of 31 December 2010 the tax computed on non-deductible expenses are presented as part of Other operating expenses in the Profit for the year and as part of Other taxes in the Financial position statement (see note 24).

20. DIVIDEND INCOME

The major part of dividend income in 2010 is dividend received from T-Mobile Macedonia AD Skopje in the amount of MKD 4,019,131 thousand (2009: MKD 4,355,314 thousand).

21. OTHER OPERATING INCOME

Other operating income represents gain on sale of PPE.

22. FINANCE EXPENSES

In thousands of denars	2010	2009
Interest expense	41,660	8,681
Bank charges and other commissions	26,083	18,112
Fair value and available for sale – loss	646	3,133
Net foreign exchange loss	-	27,791
	<u>68,389</u>	<u>57,717</u>

23. FINANCE INCOME

In thousands of denars	2010	2009
Interest income	270,891	301,939
Net foreign exchange gain	40,254	-
Fair value gain	3,750	-
	<u>314,895</u>	<u>301,939</u>

Interest income is generated from financial assets classified as loans and receivables.

24. INCOME TAX EXPENSE

Recognized in the Profit for the year:

In thousands of denars	2010	2009
Current tax expense		
Current year	<u>17,416</u>	<u>31,323</u>
Deferred tax expense		
Origination and reversal of temporary differences	<u>35,653</u>	<u>(162,012)</u>
Total income tax in profit for the year	<u>53,069</u>	<u>(130,689)</u>

Commencing from 1 January 2009 and during 2010 The Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. In addition, the income tax shall apply at the moment of the distribution of the profits in a form of dividends. Subsequently, as long as the undistributed profits are retained within the company the income tax would not be applied (see note 2.18).

Notes to the separate financial statements

Up to now the tax authorities had carried out a full-scope tax audits at the Company for 2005 and the years preceding. Additionally, audit of personal income tax was carried out by the tax authorities for the period 1 January 2005 to 31 March 2006. During 2010 there was tax audit conducted by the Public revenue office for income tax for 2008 and 2009, withholding tax for 2007 and 2008 and VAT for 2009. The tax authorities may at any time inspect the books and records within 5 years subsequent to the reported tax year, and may impose additional tax assessments and penalties. In a case of tax evasion or tax fraud the statute of limitations may be extended up to 10 years. The Company's management is not aware of any circumstances, which may give rise to a potential material liability in this respect other than those provided for in these separate financial statements.

25. DIVIDENDS

The Shareholders' Assembly of the Company, at its meeting, held on 2 July 2010 adopted a Resolution for the dividend payment for the year 2009. The Resolution on dividend payment for 2009 is in the amount of MKD 6,470,029 thousand from the net profit for the year 2009. The dividend was paid out on July 2010. Up to date of issuing of these separate financial statements, no dividends have been declared for 2010.

26. LEASES AND OTHER COMMITMENTS

26.1. Operating lease commitments – where the Company is the lessee:

Operating lease commitments – where the Company is the lessee, are mainly from lease of business premises and other telecommunications facilities.

The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

In thousands of denars	2010	2009
Not later than 1 year	28,095	14,338
Later than 1 year and not later than 5 years	37,341	36,464
Later than 5 years	276	391
	<u>65,712</u>	<u>51,193</u>

26.2. Operating lease commitments – where the Company is the lessor:

Operating lease commitments – where the Company is the lessor are mainly from lease of working premises.

The future aggregate minimum lease receivables under non-cancellable operating leases are as follows:

In thousands of denars	2010	2009
Not later than 1 year	554	581
Later than 1 year and not later than 5 years	378	718
	<u>932</u>	<u>1,299</u>

26.3. Capital commitments

The amount authorized for capital expenditure as at 31 December 2010 was MKD 244,821 thousand (2009: MKD 382,583 thousand).

27. ADDITIONAL DISCLOSURES ON FINANCIAL ASSETS

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (a) quoted prices (unadjusted) in active markets for identical assets (Level 1);
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly (Level 2); and
- (c) inputs for the asset that are not based on observable market data (Level 3).

Notes to the separate financial statements

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The significance of an input is assessed against the fair value measurement in its entirety.

There was no transfer between Level 1 and Level 2 financial assets.

27.1. Financial assets – Carrying amounts and fair values

The table below shows the categorization of financial assets as at 31 December 2009.

Assets In thousands of denars	Loans and receivables	Financial assets			At fair value through profit and loss (Level 1)	Carrying amount	Fair value
		Held-to- maturity	Available-for- sale (Level 2)				
Cash and cash equivalents	600,819	-	-	-	-	-	600,819
Deposits with banks	7,126,056	-	-	-	-	-	7,126,056
Trade and other receivables	1,812,534	-	-	-	-	-	1,812,534
Available-for-sale financial assets	-	-	591	-	-	-	591
Financial assets at fair value through profit and loss	-	-	-	61,376	61,376	61,376	61,376

The table below shows the categorization of financial assets as at 31 December 2010.

Assets In thousands of denars	Loans and receivables	Financial assets			At fair value through profit and loss (Level 1)	Carrying amount	Fair value
		Held-to- maturity	Available-for- sale (Level 2)				
Cash and cash equivalents	1,009,511	-	-	-	-	-	1,009,511
Deposits with banks	5,777,401	-	-	-	-	-	5,777,401
Trade and other receivables	1,724,088	-	-	-	-	-	1,724,088
Financial assets at fair value through profit and loss	-	-	-	65,125	65,125	65,125	65,125

Loans and receivables are measured at amortized cost, while available-for-sale and held-for-trading assets are measured at fair value.

Cash and cash equivalents, trade receivables and other current financial assets mainly have short times to maturity. For this reason, their carrying amounts at the end of the reporting period approximate their fair values.

Financial assets available for sale include insignificant investment in equity instruments, measured at fair value.

Financial assets at fair value through profit or loss include investments in equity instruments in the amount of MKD 65,125 thousand (2009: MKD 61,376 thousand) calculated with reference to the Macedonian Stock Exchange quoted bid prices. Changes in fair values of other financial assets at fair value through profit or loss are recorded in finance income/expenses in the Profit for the year (see note 22 and 23). The cost of these equity investments is MKD 31,786 thousand (2009: MKD 31,786 thousand).

27.2. Other disclosures about financial instruments

The Company is also exposed to risks that arise from the possible drawdown of guarantees in a nominal amount of MKD 9,570 thousand as at 31 December 2010 (2009: MKD 13,966 thousand). These guarantees were issued by Macedonian

Notes to the separate financial statements

banks on behalf of Company as collaterals to secure the fulfilment of the Company's certain contractual obligations. The Company has been delivering on its contractual obligations and expects to continue doing so in the future, therefore no drawdown of the guarantees has happened so far, and is not expected to happen in the future.

There were no financial assets or liabilities, which were reclassified into another financial instrument category.

No financial assets were transferred in such a way that part or all of the financial assets did not qualify for de-recognition.

28. CONTINGENCIES

The Company has contingent liabilities in respect of legal and regulatory claims arising in the ordinary course of business. It is not anticipated by the management of the Company that any material liabilities will arise from the contingent liabilities other than those provided for (see note 15).

29. RELATED PARTY TRANSACTIONS

All transactions with related parties arise in the normal course of business and their value is not materially different from the terms and conditions that would prevail in arms-length transactions.

Transactions with related parties include provision and supply of telecommunication services and equipment, loans granted and supply of management consultancy services. The amounts receivable and payable are disclosed in the appropriate notes (see note 7 and 14).

The revenues and expenses with the Company's related parties are as follows:

In thousands of denars	2010		2009	
	Revenues	Expenses	Revenues	Expenses

30. KEY MANAGEMENT COMPENSATION

The compensation of key management from the Company, including taxation charges and contributions, is presented below:

In thousands of denars	2010	2009
Short-term employee benefits (including taxation)	115,636	99,672
State contributions on short-term employee benefits	6,185	5,599
Share-based payments	1,591	2,689
	<u>123,412</u>	<u>107,960</u>

The remuneration of the members of the Company's Board of Directors amounted to MKD 4,650 thousand (2009: MKD 6,120 thousand) included in Short-term employee benefits.

The share-based payments represent compensation of key management from the Company as part of a Mid Term Incentive Plan (MTIP) launched by Magyar Telekom Plc., whereby the targets to be achieved are based on the performance of the Magyar Telekom Plc. shares. Participants include top and senior managers of the Magyar Telekom Group.

The MTIP is operated by Magyar Telekom Plc. while the compensation of key management from the Company related to the MTIP is incurred by the Company (for MTIP programs launched 2008 and 2009) and is included in Personnel expenses (Bonus Payments) recognized against Other provisions (see notes 15 and 18).

31. EVENTS AFTER THE FINANCIAL STATEMENT DATE

There are no events after the financial statement date that would have impact on the 2010 profit for the year, separate statement of financial position or cash flows.

Independent Auditor's Report

To the Board of Directors and Shareholders of Makedonski Telekom AD Skopje

Report on consolidated financial statements

We have audited the accompanying consolidated financial statements of Makedonski Telekom AD Skopje (the "Company") and its subsidiaries T-Mobile Macedonia AD Skopje and E-Makedonija foundation – Skopje (together "the Group") which comprise the consolidated statement of financial position as of 31 December 2010 and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly in all material respects the financial position of the Group as of 31 December 2010 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Notes to the consolidated financial statements

1. GENERAL INFORMATION

1.1. About the Company

These consolidated financial statements relate to the group of Makedonski Telekom AD - Skopje, which includes Makedonski Telekom AD - Skopje, T-Mobile Macedonia AD Skopje and e-Makedonija foundation – Skopje (hereinafter referred as: “the Group”).

Makedonski Telekom AD – Skopje, (hereinafter referred as: “the Company”) is a joint stock company incorporated and domiciled in the Republic of Macedonia.

In 2008 the Company adopted the T-Home brand and on 1 May 2008 changed its legal name from AD Makedonski Telekomunikacii Skopje into Makedonski Telekom AD - Skopje and its products are now marketed under the brand T-Home.

The Group's immediate parent company is AD Stonebridge Communications – Skopje, under voluntary liquidation, solely owned by Magyar Telekom Plc. registered in Hungary. The ultimate parent company is Deutsche Telekom AG registered in Federal Republic of Germany.

The Company is the leading fixed line service provider while T-Mobile Macedonia AD (hereinafter referred as: “the subsidiary”) is the leading mobile service provider in Macedonia. e-Makedonija is a foundation, established to support application and development of information technology in Macedonia.

The Macedonian telecommunications sector is regulated by the Electronic Communications Law (“ECL”) enacted in March 2005. Under the ECL, the Company has been designated as a Significant Market Power operator (SMP) in the market for fixed line voice telephone networks and services, including the market for access to the networks for data transmission and leased lines. With the changes of the ECL published on 4 August 2008, the Concession Contracts of the Company and T-Mobile Macedonia ceased to be valid as of 5 August 2008. On 5 September 2008 the Agency for Electronic Communications (“The Agency”), ex officio, has issued a notification to both the Company and T-Mobile Macedonia for those public electronic communication networks and/or services which have been allocated thereto under the Concession Contracts. Radiofrequency licenses were issued to the operators for the bands granted with the Concession Contracts in a form prescribed by the ECL. With the latest amendments on ECL, as of 1 July 2010 data retention obligation was introduced for the Company to keep unprocessed traffic data for 24 months. It is expected the Broadcasting Council to intensify actions against CaTV operators due to retransmission of TV Channels without regulated Intellectual property (IP) rights. The license for radiofrequencies used by T-Mobile Macedonia with a bandwidth of 25 MHz in the GSM 900 band, was also issued in a form regulated in the ECL with a validity period until 5 September 2018, which can be renewed up to additional 20 years in accordance with the ECL.

The Company is using Long run incremental costs methodology (LRIC) for wholesale regulated services. On 4 October 2010 the Agency has implemented LRIC Bottom – up costing model and published final results on 20 December 2010, which will be applicable from March 2011.

Based on the ECL, the Agency may prescribe retail regulation of fixed telephony services. The Agency finished the procedure for analyses of relevant markets and based on the analysis conclusions, the Agency is planning to impose retail price regulation on the Company. In addition bigger pressure on retail pricing is expected due to the Guideline for price squeeze testing introduced by the Agency in 2010.

Additionally, the Agency organized public debate upon regulatory challenges in relation with the next generation access networks.

Based on several enacted bylaws published in second half of 2008 the Company has introduced several new regulated wholesale products, as Wholesale Line Rental, Wholesale Leased Line and Local Bit stream access. New Rulebook on access and use of specific network assets was published by the Agency in December 2010. According to the new Rulebook the Company has obligation to offer access to ducts and dark fibre.

On 27 May, 2010 new number portability (NP) service was introduced: WLR with NP, giving option for all WLR users to migrate their numbers into the Company's Wholesale Partner network.

T-Mobile Macedonia submitted Reference Interconnection Offer (RIO) to the Agency on 29 February 2008.

Second round analysis of Market 16 was concluded in May 2010 where all three mobile operators were designated as SMP on Market 16.

Notes to the consolidated financial statements

Based on the second round analysis on Market 16 and LRIC cost model, in July 2010 T-Mobile Macedonia received a Decision where the Mobile Termination Rate ("MTR") has been defined with a glide path decrease in a four years time frame (until 2013). In September 2010 the price for the national MTR was decreased to 3,2 MKD and will continue decreasing for 0,1 MKD each year down to 2,9 MKD/min in September 2013. At the same time the Agency regulated the MTR's for ONE and VIP with a respective 4 year glide path but introducing asymmetry between all three mobile operators which will lead to equal MTR of 2,9 MKD in September 2013.

On 7 July 2010, the Agency concluded market analysis on Market 15 (Service for access and call initiation in the public mobile communication networks) and on 28 July 2010 brought a decision by which T-Mobile Macedonia was designated with SMP status on Market 15 upon which T-Mobile Macedonia prepared and published Referent Access Offer ("RAO").

On a second tender for additional three 3G licenses published on 15 September 2008, T-Mobile Macedonia won one license which was granted to it on 17 December 2008 and paid MKD 613,837 thousand, equivalent to EUR 10 million as one-off fee. T-Mobile Macedonia started commercial operations of the 3G services on 11 June 2009. The validity of the license is 10 years i.e. 17 December 2018, with a possibility for extension for 20 years in accordance to the ECL.

On 10 January 2009 a public tender for awarding two licences for 2G radiofrequencies in the 1800 MHz band was published. T-Mobile Macedonia was awarded one license on 9 June 2009. T-Mobile Macedonia paid EUR 2 million (MKD 122,812 thousand) as one-off fee for the 2G license in the 1800 MHz band. The validity period is 10 years, with a possibility for extension for 20 years in accordance to the ECL.

Starting with August 2006, the Company has more than 100 shareholders, as a result of the sale of Governmental shares through auction organized by the Government during June 2006. According to the Law on securities it qualifies as company with special reporting obligations, which mainly, encompasses provision of quarterly, semi-annual and annual financial information to the Securities Exchange Commission of the Republic of Macedonia.

The Company's registered address is "Orce Nikolov" Street bb, 1000, Skopje, Republic of Macedonia. The average number of employees during 2010 was 1,726 (2009: 1,741).

1.2. Investigation into certain consultancy contracts

On 13 February 2006, Magyar Telekom Plc., the controlling owner of the Company, (via Stonebridge Communications AD - Skopje (under liquidation), majority shareholder of the Company), announced that it was investigating certain contracts entered into by another subsidiary of Magyar Telekom Plc. to determine whether the contracts were entered into in violation of Magyar Telekom Plc. policy or applicable law or regulation. Magyar Telekom's Audit Committee retained White & Case, as its independent legal counsel to conduct the internal investigation. Subsequent to this on 19 February 2007, the Board of Directors of the Company, based on the recommendation of the Audit Committee of the Company and the Audit Committee of Magyar Telekom Plc., adopted a resolution to conduct an independent internal investigation regarding certain contracts in Macedonia.

For further information about the internal investigation, please refer to the financial statements of the Company for the year ended 31 December 2009.

According the information provided to the Company by Magyar Telekom Plc., on 2 December 2009, the Audit Committee of Magyar Telekom Plc., provided the Magyar Telekom's Board of Directors with a "Report of Investigation to the Audit Committee of Magyar Telekom Plc." dated 30 November 2009 (the "Final Report"). The Audit Committee indicated that it considers that, with the preparation of the Final Report based on currently available facts, White & Case has completed its independent internal investigation.

According the information provided to the Company by Magyar Telekom Plc., the Final Report includes the following findings and conclusions related to Magyar Telekom's Macedonian affiliates, based upon the evidence available to the Audit Committee of Magyar Telekom Plc. and its counsel:

- As previously disclosed, there is evidence that certain former employees intentionally destroyed documents relating to activities undertaken in Macedonia by Magyar Telekom Plc. and its affiliates.
- Between 2000 and 2006 a small group of former senior executives at Magyar Telekom and Magyar Telekom's Macedonian affiliates, authorized the expenditure of approximately EUR 24 million through over twenty suspect consultancy, lobbying, and other contracts (including certain contracts between Magyar Telekom and its subsidiaries on one hand, and affiliates of a Cyprus-based consulting company on the other hand). The Final Report concludes that "the available evidence does not establish that the contracts under which these expenditures were made were legitimate."

Notes to the consolidated financial statements

- “The evidence shows that, contrary to their terms, a number of these contracts were undertaken to obtain specific regulatory and other benefits from the government of Macedonia. The Companies generally received the benefits sought and then made expenditures under one or more of the suspect contracts. There is evidence that the remaining contracts were also illegitimate and created a pool of funds available for purposes other than those stated on the face of the agreements.” However, the Magyar Telekom Audit Committee’s counsel did not have access to evidence that would allow it to identify the ultimate beneficiaries of these expenditures.
- In entering into these contracts and approving expenditures under them, the former senior executives knowingly caused, structured, or approved transactions that shared most or all of the following characteristics:
 - intentional circumvention of internal controls;
 - false and misleading corporate documents and records;
 - lack of due diligence concerning, and failure to monitor performance of, contractors and agents in circumstances carrying a high risk of corruption; lack of evidence of performance; and
 - expenditures that were not for the purposes stated in the contracts under which they were made, but rather were intended to obtain benefits for the Magyar Telekom subsidiaries that could only be conferred by government action.
- The Final Report states that “the Investigation did not uncover evidence showing receipt of payments by any Macedonian government officials or political party officials.”

As previously disclosed, Magyar Telekom has taken remedial steps to address issues previously identified by the independent investigation, including steps designed to revise and enhance the Magyar Telekom Group’s internal controls. According to the information provided to the Company by Magyar Telekom, the Audit Committee of Magyar Telekom has not made recommendations relating to Magyar Telekom’s compliance program or internal controls in connection with the issuance of the Final Report and Magyar Telekom is considering, in consultation with its Audit Committee, whether and to what extent the Final Report warrants additional remedial actions, including any personnel actions and/or changes in internal control policies and procedures at Magyar Telekom or its subsidiaries that have been or will be implemented to address the findings of the Final Report.

In relation to the issuance of the Final Report and the information provided to the Company by Magyar Telekom, in January 2010 the Chairman of the Company’s Board of Directors requested third party legal and tax expertise for assessment of the potential accounting and tax implications arising from the transactions conducted by the Company and its subsidiary subject to the Final Report.

The external experts prepared reports (the “Reports”) on their assessment and submitted the Reports to the Chairman of the Company’s BoD and the Management of the Company and its subsidiary accordingly. As a result, based on the analysis of the Tax and Legal experts and information available to the Management related to the transactions subject of the Final Report, amount of MKD 248,379 thousand has been identified as potential tax impact (together with related penalty interest) as of 31 December 2009 arising from the transactions conducted by the Company and its subsidiary subject to the Final Report (see note 15). In 2010 the amount related to the identified potential tax impact (together with related penalty interest) amounted to MKD 261,834 thousand out of which MKD 227,972 thousand related to the Company were paid in 2010 upon an executive decision issued by the Public Revenue Office. In addition, the value of one contract MKD 105,147 thousand capitalised within treasury shares is now corrected and accounted for as though these payments had been expensed in 2006 rather than capitalized as part of treasury shares as originally reported. The other contracts that were identified by the Final Report and the reports of the tax and legal experts related to transactions undertaken by the Company and its subsidiary were expensed in the related periods (2001-2007).

In May 2008, the Ministry of Interior (“MOI”) of the Republic of Macedonia (“RoM”) submitted to the Company an official written request for information and documentation regarding certain payments for consultancy services and advance dividend, as well as certain procurements and contracts. In June 2008 the Company submitted copies from the requested documents. In the same period, T-Mobile Macedonia has also received similar requests for provision of certain documentation to the Ministry of Interior of RM and they were submitted accordingly.

In October 2008 the Investigation Judge from the Primary Court Skopje 1 – Skopje (the criminal court), has issued an official written order to the Company to handover certain original documentation. Later in October 2008, the Company officially and personally handed over the requested documentation. Additional MOI requests in written were submitted and the Company provided the requested documentation.

Notes to the consolidated financial statements

We understand, based on public information available as of 10 December 2008, that the MOI Organized Crime Department submitted the files to the Basic Public Prosecution Office of Organized Crime and Corruption, with a proposal to bring criminal charges against Attila Szendrei (former CEO of Makedonski Telekom AD - Skopje), Rolf Plath (former CFO of Makedonski Telekom AD - Skopje), Mihail Kefaloyannis (former member of the Board of Directors in Stonebridge and former member of the Board of Directors in Telemacedonia) and Zoltan Kisjuhász (former CEO of Stonebridge and former non-executive member of the Board of Directors of Makedonski Telekom AD - Skopje) on the account of a reasonable doubt for committed criminal act. These individuals are proposed to be charged with having “abuse of office and authorizations” in their position in Makedonski Telekom AD - Skopje by concluding consultancy contracts for which there was no intention or need for any services in return.

The Primary Court Skopje 1 in Skopje, Investigative Department for Organized Crime delivered a summon to the Company in connection with the criminal charges against the above stated persons and asked for a statement whether the Company has suffered any damages on the basis of the said consultancy contracts.

After several postponements of the court hearing related to the investigation procedure handled in the Primary Court Skopje 1 Skopje, on the hearing held on 13 April 2009, the representatives of Makedonski Telekom AD Skopje declared the position of the Company that taking into consideration the ongoing independent internal investigation conducted by White & Case, approved by the Company's BoD, it was premature to preannounce any damage which may be caused by means of the implementation of the mentioned contracts or with reference to them. Upon completion of the independent internal investigation, the Company will inform the court on its final position in respect of the possible damage and the criminal prosecution of the accused persons. On 9 April 2010 the Company received notification from the Bureau of judicial expertise that based on the order of the Primary Court Skopje 1 Skopje the Bureau will perform expertise on the case. The expertise was performed on 11 May 2010 and the experts from Ministry of Justice of the Republic of Macedonia – Court Expertise Office – Skopje, asked for some additional documents from Company's side in order to prepare the expertise. The Company received Notification from the Court Expertise Office – Skopje that the expertise will continue on 18 October 2010. The experts asked additional information related to certain agreements concluded in 2005 and 2006, and related invoices. The Company has collected and submitted requested information/documentation to the Court Expertise Office on 1 November 2010. After preparation the expertise will be submitted from the responsible Judge to the Public Prosecutor. The Public Prosecutor should decide whether he/she will initiate prosecution act against accused persons or not depending on the expertise and other relevant proofs collected in the phase of investigation.

MOI of the RoM - Organized Crime Department, approached to the Company during August 2009, with request some additional documentation to be submitted to the MOI. The Company collected and submitted requested documentation on 27 August 2009.

The Chairman of the Company's BoD and the Company's Management have received information that the contents of the Final Report has also been made available to the Macedonian Public Prosecution Office. The Company's Management cannot foresee whether the Macedonian Public Prosecution Office will initiate any legal procedure or the type and scope of legal actions on the basis of the information contained in the Final Report.

We have become aware of no information as a result of a request from any regulators or other external parties, other than as described above, from which we have concluded that the financial statements may be misstated, including from the effects of a possible illegal act.

Notes to the consolidated financial statements

2. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1. Basis of preparation

The consolidated financial statements of Makedonski Telekom AD – Skopje have been prepared in accordance with International Financial Reporting Standards (IFRS).

The consolidated financial statements are presented in Macedonian denars rounded to the nearest thousand.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 4. Actual results may differ from those estimated.

2.1.1. Standards, amendments and interpretations effective and adopted by the Group in 2010

- IAS 7 (amended) Statements of cash flows. Amendment requires that only expenditures that result in a recognised asset in the statement of financial position can be classified as investing activities. Effective for periods beginning on or after 1 January 2010. The Group applied the amended standard from 1 January 2010, which did not cause changes in the presentation of the Group's statements of cash flows.
- IFRS 3, IAS 27 (amended). In January 2008 the IASB published the amended Standards IFRS 3 - Business Combinations and IAS 27 - Consolidated and Separate Financial Statements. The major changes compared to the current version of the standards are summarized below:
 - With respect to accounting for non-controlling interest an option is added to IFRS 3 to permit an entity to recognize 100% of the goodwill of the acquired entity, not just the acquiring entity's portion of the goodwill ('full goodwill' option) or to measure non-controlling interest at its fair value. This option may be elected on a transaction-by-transaction basis.
 - In a step acquisition, the fair values of the acquired entity's assets and liabilities, including goodwill, are measured on the date when control is obtained. Accordingly, goodwill will be measured as the difference at the acquisition date between the fair value of any investment the business held before the acquisition, the consideration transferred and the net asset acquired.
 - A partial disposal of an investment in a subsidiary while control is retained is accounted for as an equity transaction with owners, and gain or loss is not recognized.
 - A partial disposal of an investment in a subsidiary that results in loss of control triggers re-measurement of the residual interest to fair value. Any difference between fair value and carrying amount is a gain or loss on the disposal, recognized in profit or loss.
 - Acquisition related costs will be accounted for separately from the business combination, and therefore, recognized as expenses rather than included in goodwill. An acquirer will have to recognize at the acquisition date a liability for any contingent purchase consideration. If the amount of contingent consideration accounted for as a liability changes as a result of a post-acquisition event (such as meeting an earnings target), it will be recognized in accordance with other applicable IFRSs, as appropriate rather than as an adjustment of goodwill.
 - The revised standards require an entity to attribute their share of losses to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
 - Effects resulting from an effective settlement of pre-existing relationships (relationships between acquirer and acquiree before the business combination) must not be included in the determination of the consideration.
 - In contrast to current IFRS 3, the amended version of this standard provides rules for rights that have been granted to the acquiree (e.g. to use its intellectual property) before the business combination and are re-acquired with the business combination.

Notes to the consolidated financial statements

- The revised IFRS 3 brings into scope business combinations involving only mutual entities and business combinations achieved by contracts alone.

The amended version of IFRS 3 has to be applied for Business Combinations with effective dates in annual periods beginning on or after 1 July 2009. The Group applied the amended standard from 1 January 2010. The amended standards did not have an impact on the Group's financial statements since the Group has no acquisitions or investment transactions.

- IFRS 2 (amended) Share-based Payment. The amendments related to Group Cash-settled Share-based Payment Transactions were published in June 2009. Previously effective IFRSs required attribution of group share-based payment transactions only if they are equity-settled. The amendments resolve diversity in practice regarding attribution of cash-settled share-based payment transactions and require an entity receiving goods or services in either an equity-settled or a cash-settled payment transaction to account for the transaction in its separate or individual financial statements. The Group has no share based compensations; therefore, we do not expect the amended standard to have an effect on the Group when applied. Amendments to IFRS 2 shall be applied retrospectively for annual periods beginning on or after 1 January 2010. The amendments also incorporate the guidance contained in IFRIC 8 (Scope of IFRS 2) and in IFRIC 11 (IFRS 2 - Group and Treasury Share Transactions). As a result, the Board withdrew IFRIC 8 and IFRIC 11.
- IFRS 5 (amended) Non-current assets held for sale and discontinued operations. Amendment to clarify that IFRS 5, specifies the disclosures required in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations. Also clarifies that the general requirements of IAS 1 still apply, particularly paragraph 15 (to achieve a fair presentation) and paragraph 125 (sources of estimation uncertainty) of IAS 1. The effective date for this amendment is the period beginning on or after 1 January 2010.

2.1.2. Standards, amendments and interpretations effective in 2010 but not relevant for the Group

- IAS 17 (amended) Leases. Deletion of specific guidance regarding classification of leases of land, so as to eliminate inconsistency with the general guidance on lease classification. As a result, leases of land should be classified as either finance or operating, using the general principles of IAS 17. Effective for periods beginning on or after 1 January 2010. The amendment is not relevant for the Group's financial statements.
- IAS 36 (amended) Impairment of assets. Amendment to clarify that the largest cash generating unit (or group of units) to which goodwill should be allocated for the purposes of impairment testing is an operating segment as defined by paragraph 5 of IFRS 8, 'Operating segments' (that is, before the aggregation of segments with similar economic characteristics permitted by paragraph 12 of IFRS 8). Effective for periods beginning on or after 1 January 2010. The amendment is not relevant for the Group's financial statements, since the Group does not have any goodwill.
- IAS 38 (amended) Intangible assets. Amendments to paragraphs 36 and 37 of IAS 38, to clarify the requirements under IFRS 3 (revised) regarding accounting for intangible assets acquired in a business combination. In addition, paragraphs 40 and 41 are amended to clarify the description of valuation techniques commonly used by entities when measuring the fair value of intangible assets acquired in a business combination that are not traded in active markets. The effective date for this amendment is the period beginning on or after 1 January 2010. The amendment is not relevant for the Group's financial statements, since the Group does not have any intangible assets acquired in a business combination.
- IAS 39 (amended) Financial Instruments: Recognition and Measurement. The major amendments of the standard are summarized below:
 - The IASB published an amendment in August 2008 to IAS 39 with respect to hedge accounting. The amendment "Eligible Hedged Items" allows to designate only changes in the cash flows or fair value of a hedged item above or below a specified price or other variable (IAS 39.AG99BA). The amendment of IAS 39 shall be applied retrospectively for annual periods beginning on or after 1 July 2009. The amendment will not affect the Group's accounts as the Group does not apply hedge accounting.
 - In addition, the IASB published an amendment in the treatment of loan pre-payment penalties as closely related derivatives. Namely, the amendment clarifies that, prepayment options, the exercise price of which compensates the lender for loss of interest by reducing the economic loss from investment risk, should be considered closely related to the host debt contract. The effective date for this amendment is the period beginning on or after 1 January 2010.

Notes to the consolidated financial statements

- Amendments to the scope exemption in paragraph 2(g) of IAS 39 to clarify that: (a) it only applies to binding (forward) contracts between an acquirer and a vendor in a business combination to buy an acquiree at a future date; (b) the term of the forward contract should not exceed a reasonable period normally necessary to obtain any required approvals and to complete the transaction; and (c) the exemption should not be applied to option contracts (whether or not currently exercisable) that on exercise will result in control of an entity, nor by analogy to investments in associates and similar transactions. The effective date for this amendment is the period beginning on or after 1 January 2010.
- Amendments regarding cash flow hedge accounting. Amendment to clarify when to recognise gains or losses on hedging instruments as a reclassification adjustment in a cash flow hedge of a forecast transaction that results subsequently in the recognition of a financial instrument. The amendment clarifies that gains or losses should be reclassified from equity to profit or loss in the period in which the hedged forecast cash flow affects profit or loss. The effective date for this amendment is the period beginning on or after 1 January 2010.
- IFRS for Small and Medium-sized Entities. In July 2009 the IASB issued its IFRS for Small and Medium-sized Entities, which is not relevant for the Group.
- IFRS 1 (amended) Additional Exemptions for First-time Adopters. The IASB issued the amendments to IFRS 1 in July 2009. As the Group has been reporting according to IFRS for many years, neither the original standard, nor any revision to that is relevant for the Group.
- IFRIC 17 Distributions of Non-cash Assets to Owners. This interpretation issued in November 2008 refers to the issue when to recognize liabilities accounted for non-cash dividends payable (e.g. property, plant, and equipment) and how to measure them. In addition, the interpretation refers to the issue how to account for any difference between the carrying amount of the assets distributed and the carrying amount of the dividend payable. IFRS 5 has also been amended to require that assets are classified as held for distribution only when they are available for distribution in their present condition and the distribution is highly probable. The interpretation shall be applied for annual periods beginning on or after 1 July 2009. As the Group does not distribute non-cash dividends, IFRIC 17 will have no impact on the Group's financial statements.
- IFRIC 18 Transfers of Assets from Customers. The Interpretation clarifies the requirements of IFRSs for agreements in which an entity receives from a customer an item of property, plant and equipment (or cash to be used explicitly for the acquisition of property, plant and equipment) that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services. The Interpretation is effective for annual periods beginning on or after 1 July 2009 and applies prospectively. However, limited retrospective application is permitted. IFRIC 18 is not expected to have any impact on the Group's financial statements.

2.1.3. Standards, amendments and interpretations that are not yet effective and have not been early adopted by the Group

- IAS 24 (revised) Related Party Disclosures. In November 2009, the IASB issued a revised version of IAS 24. Until now, if a government controlled, or significantly influenced, the entity was required to disclose information about all transactions with other entities controlled, or significantly influenced by the same government. The revised standard still requires disclosures that are important to users of financial statements but eliminates requirements to disclose information that is costly to gather and of less value to users. It achieves this balance by requiring disclosure about these transactions only if they are individually or collectively significant. Furthermore the IASB has simplified the definition of related party and removed inconsistencies. The revised standard shall be applied retrospectively for annual periods beginning on or after 1 January 2011. Earlier application is permitted.
- IFRS 9 Financial Instruments. The standard forms the first part of a three-phase project to replace IAS 39 (Financial Instruments: Recognition and Measurement) with a new standard, to be known as IFRS 9 Financial Instruments. IFRS 9 prescribes the classification and measurement of financial assets and liabilities. The remaining phases of this project, dealing with the impairment of financial instruments and hedge accounting, as well as a further project regarding derecognition, are in progress.

Financial assets - At initial recognition, IFRS 9 requires financial assets to be measured at fair value. After initial recognition, financial assets continue to be measured in accordance with their classification under IFRS 9. Where a financial asset is classified and measured at amortized cost, it is required to be tested for impairment in accordance with the impairment requirements in IAS 39. IFRS 9 defines the below rules for classification.

Notes to the consolidated financial statements

- IFRS 9 requires that financial assets are classified as subsequently measured at either amortized cost or fair value. There are two conditions needed to be satisfied to classify financial assets at amortized cost: (1) The objective of an entity's business model for managing financial assets has to be to hold assets in order to collect contractual cash flows; and (2) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Where either of these conditions is not satisfied, financial assets are classified at fair value.
- Fair Value Option: IFRS 9 permits an entity to designate an instrument, that would otherwise have been classified in the amortized cost category, to be at fair value through profit or loss if that designation eliminates or significantly reduces a measurement or recognition inconsistency ('accounting mismatch').
- Equity instruments: The default category for equity instruments is at fair value through profit or loss. However, the standard states that an entity can make an irrevocable election at initial recognition to present all fair value changes for equity investments not held for trading in other comprehensive income. These fair value gains or losses are not reported as part of a reporting entity's profit or loss, even when a gain or loss is realized. Only dividends received from these investments are reported in profit or loss.
- Embedded derivatives: The requirements in IAS 39 for embedded derivatives have been changed by no longer requiring that embedded derivatives be separated from financial asset host contracts.
- Reclassification: IFRS 9 requires reclassification between fair value and amortized cost when, and only when there is a change in the entity's business model. The 'tainting rules' in IAS 39 have been eliminated.

Financial liabilities - IFRS 9 "Financial Instruments" sets the requirements on the accounting for financial liabilities and replaces the respective rules in IAS 39 "Financial Instruments: Recognition and Measurement". The new pronouncement:

- Carries forward the IAS 39 rules for the recognition and derecognition unchanged.
- Carries forward most of the requirements in IAS 39 for classification and measurement.
- Eliminates the exception from fair value measurement for derivative liabilities that are linked to and must be settled by delivery of an unquoted equity instrument.
- Changes the requirements related to the fair value option for financial liabilities to address own credit risk.

An entity shall apply IFRS 9 for annual periods beginning on or after January 1, 2013. Earlier adoption is permitted. A reporting entity must apply IFRS 9 retrospectively. For entities that adopt IFRS 9 for periods before January 1, 2012 the IFRS provides transition relief from restating comparative information. The Group is currently analyzing the possible changes in the financial statements of the Group that will be a result of the adoption of the new standard.

- IFRS 7 (amended) - The IASB published an amendment to IFRS 7 Amendments to IFRS 7 Financial Instruments: Disclosures in October 2010. The amendment requires quantitative and qualitative disclosures regarding transfers of financial assets that do not result in entire derecognition, or that result in continuing involvement. This is intended to allow users of financial statements improve their understanding of such transactions (for example, securitizations), including understanding the possible effects of any risks that may remain with the entity that transferred the assets. The amendments also require additional disclosures if a disproportionate amount of such transactions are undertaken around the end of a reporting period. The application of the amendment is required for annual periods beginning on or after July 1, 2011. An earlier application is permitted. We do not expect that the adoption of the amended standard would result in significant changes in the financial statements disclosures of the Group.

2.1.4. Standards, amendments and interpretations that are not yet effective and not relevant for the Group's operations

- IAS 32 (amended) Financial Instruments: Presentation on classification of rights issue. The amendment clarifies the classification of rights issues as equity or liabilities for rights issues that are denominated in a currency other than the functional currency of the issuer. These rights issues are recorded as derivative liabilities before the amendment. The amendment requires that such right issues offered pro rate to all of an entity's existing shareholders are classified as equity. The classification is independent of the currency in which the exercise price is denominated. The application of the amendment is required for annual periods beginning on or after 1 February 2010. An earlier application is permitted. The amendment will have no impact on the Group's financial statements.

Notes to the consolidated financial statements

- IFRS 1 The IASB amended IFRS 1 in January 2010 and in December 2010. As the Group has been reporting according to IFRS for many years, neither the original standard, nor any revision to that is relevant for the Group.
- IFRIC 14 (amended) IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. In November 2009, the IASB issued an amendment to IFRIC 14, which corrects an unintended consequence of IFRIC 14. Without the amendments, in some circumstances entities are not permitted to recognize some voluntary prepayments for minimum funding contributions as an asset. The amendment permits such an entity to treat the benefit of such an early payment as an asset. The amendments are effective for annual periods beginning 1 January 2011. The amendments must be applied retrospectively to the earliest comparative period presented. The amended interpretation is not applicable to the Group as the Group has no funded defined post-retirement benefit schemes.
- IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments. This interpretation issued in November 2009 clarifies the requirements of IFRSs when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially. The interpretation is effective for annual periods beginning on or after 1 July 2010 with earlier application permitted. The interpretation shall be applied retrospectively. The interpretation is not applicable to the Group as the Group does not extinguish any of its financial liabilities with equity instruments.
- IAS 12 (amended). In December 2010, the IASB issued published the pronouncement "Deferred Tax: Recovery of Underlying Assets - Amendments to IAS 12". The new pronouncement "Deferred Tax: Recovery of Underlying Assets - Amendments to IAS 12" sets presumptions for the recovery (e.g. use or sale) of certain assets. This is relevant in cases where the type of recovery has different tax consequences. The pronouncement sets the rebuttable presumption that the carrying amount of investment property that is measured using the fair value model in IAS 40 will be recovered through sale. Moreover, the carrying amount of a non-depreciable asset measured using the revaluation model in IAS 16 is always deemed to be recovered through sale. The amendment supersedes SIC 21 and shall be applied for annual periods beginning on or after 1 January 2012. Earlier application is permitted. As the Group does not have investment properties or non-depreciable asset measured using the revaluation model in IAS 16, the amended standard will not have any impact on the Group's financial statements.

2.2. Consolidation

2.2.1. Subsidiaries

Subsidiaries are those enterprises controlled by the Company. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an enterprise, generally accompanying a shareholding of more than half of the voting rights, so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Intra-group balances and transactions, and any unrealised gains arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

The subsidiaries of the Company and the ownership interest are presented below:

	Country of incorporation	Ownership interest As at 31 December 2010	Ownership interest As at 31 December 2009
T-Mobile Macedonia AD	Macedonia	100	100
e-Makedonija	Macedonia	100	100

2.3. Foreign currency translation

2.3.1. Functional and presentation currency

The consolidated financial statements are presented in thousands of Macedonian denars, which is the Company's functional and presentation currency.

Notes to the consolidated financial statements

2.3.2. Transactions and balances

Transactions in foreign currencies are translated to denars at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the financial statement date are translated to denars at the foreign exchange rate ruling at that date. Foreign exchange differences arising on translation are recognised in the Profit for the year (Finance income/expenses). Non-monetary financial assets and liabilities denominated in foreign currency are translated to denars at the foreign exchange rate ruling at the date of transaction.

The foreign currencies deals of the Group are predominantly EURO (EUR) and United States Dollars (USD), based. The exchange rates used for translation at 31 December 2010 and 31 December 2009 were as follows:

	2010	2009
	MKD	MKD
1 USD	46.31	42.67
1 EUR	61.51	61.17
1 CHF	49.30	41.12

2.4. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets of the Group include, cash and cash equivalents, deposits with banks, equity instruments of another entity (available-for-sale and at fair value through profit or loss) and contractual rights to receive cash (trade and other receivables) or another financial asset from another entity.

Financial liabilities of the Group include liabilities that originate from contractual obligations to deliver cash or another financial asset to another entity (non-derivatives). In particular, financial liabilities include trade and other payables.

2.4.1. Financial assets

The Group classifies its financial assets in the following categories:

- (a) financial assets at fair value through profit or loss
- (b) loans and receivables
- (c) available-for-sale financial assets (AFS)

The classification depends on the purpose for which the financial asset was acquired. Management determines the classification of financial assets at their initial recognition.

Regular way purchases and sales of financial assets are recognized on the trade-date, the date on which the Group commits to purchase or sell the asset. Investments are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the Profit for the year.

The Group assesses at each financial statement date whether there is objective evidence that a financial asset is impaired. There is objective evidence of impairment if as a result of loss events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Impairment losses of financial assets are recognized in the Profit for the year against allowance accounts to reduce the carrying amount until the derecognition of the financial asset, when the net carrying amount (including any allowance for impairment) is derecognized from the Consolidated statement of financial position. Any gains or losses on derecognition are calculated and recognized as the difference between the proceeds from disposal and the (net) carrying amount derecognized.

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

Notes to the consolidated financial statements

(a) Financial assets at fair value through profit or loss

This category comprises those financial assets designated at fair value through profit or loss at inception. A financial asset is classified in this category if the Group manages such asset and makes purchase and sale decisions based on its fair value in accordance with the Group investment strategy for keeping investments within portfolio until there are favourable market conditions for their sale.

'Financial assets at fair value through profit or loss' are subsequently carried at fair value. Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are recognized in the Profit for the year (Finance income/expenses) in the period in which they arise.

Dividend income from financial assets at fair value through profit or loss is recognized in the Profit for the year when the Group's right to receive payments is established and inflow of economic benefits is probable.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except those with maturities over 12 months after financial statement date. These are classified as non-current assets.

The following items are assigned to the "loans and receivables" measurement category:

- cash and cash equivalents
- deposits with bank
- trade receivables
- other receivables
- employee loans
- receivables and loans to third parties

Loans and receivables are initially recognized at fair value and subsequently carried at amortized cost using the effective interest method.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, call deposits held with banks and other short-term highly liquid investments with original maturities of three months or less.

Should an impairment on cash and cash equivalents occur, it would be recognized in the Profit for the year (Finance expenses).

Trade and other receivables

Trade and other receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the trade receivable is impaired.

If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in the Profit for the year (Other operating expenses – Impairment losses on trade and other receivables).

The Group's policy for collective assessment of impairment is based on the aging of the receivables due to the large number of relatively similar type of customers.

Individual valuation is carried out for the largest customers and international customers and also for customers under litigation and bankruptcy proceedings. Itemized valuation is also performed in special circumstances.

Notes to the consolidated financial statements

When a trade receivable is established to be uncollectible, it is written off against Other operating expenses in the Profit for the Year (Impairment losses on trade and other receivables) with a parallel release of the cumulated impairment on the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against the recognized loss in the Profit for the year.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the previously recognized impairment loss shall be reversed by adjusting an allowance account. The reversal shall not result in a carrying amount of the financial asset that exceeds what the amortized cost would have been had the impairment not been recognized at the date the impairment is reversed. The amount of the reversal shall be recognized in the Profit for the year as a reduction to Other operating expenses (Impairment losses on trade and other receivables).

Amounts due to, and receivable from, other network operators are shown net where a right of set-off exists and the amounts are settled on a net basis (such as receivables and payables related to international traffic).

Employee loans

Employee loans are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

Difference between the nominal value of the loan granted and the initial fair value of the employee loan is recognized as prepaid employee benefits. Interest income on the loan granted calculated by using the effective interest method is recognized as finance income, while the prepaid employee benefits are amortized to Personnel expenses evenly over the term of the loan.

Impairment losses on Employee loans, if any, are recognized in the Profit for the year (Personnel expenses).

(c) Available-for-sale financial assets (AFS)

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless management intends to dispose of the investment within 12 months of the financial statement date. Purchases and sales of investments are recognised on the trade-date – the date on which the Group commits to purchase or sell the asset.

Subsequent to initial recognition all available-for-sale financial assets are measured at fair value, except that any instrument that does not have a quoted market price in an active market and whose fair value cannot be reliably measured is stated at cost, including transaction costs, less impairment losses. The intention of the Company is to dispose these assets when there are favourable market conditions for their sale. Changes in the fair value of financial assets classified as available for sale are recognised in equity. When financial assets classified as available for sale are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the Profit for the year as gains and losses from investment securities.

The Group assesses at each financial statement date whether there is objective evidence that a financial asset is impaired. There is objective evidence of impairment if as a result of loss events that occurred after the initial recognition of the asset have an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If any such evidence exists for AFS financial assets, the cumulative unrealized gain (if any) is reclassified from Other comprehensive income to Profit for the year, and any remaining difference is also recognized in the Profit for the year (Finance income). Impairment losses recognized on equity instruments are not reversed through the Profit for the year.

When AFS financial assets are sold or redeemed, therefore derecognized, the fair value adjustments accumulated in equity are reclassified from Other comprehensive income to Profit for the year (Finance income).

2.4.2. Financial liabilities

Trade and other payables

Trade and other payables (including accruals) are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. The carrying values of trade and other payables approximate their fair values due to their short maturity.

Notes to the consolidated financial statements

2.5. Inventories

Inventories are stated at the lower of cost or net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

The cost of inventories is based on weighted average cost formula and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition.

Phone sets are often sold for less than cost in connection with promotions to obtain new subscribers with minimum commitment periods. Such loss on the sale of equipment is only recorded when the sale occurs as they are sold as part of a profitable service agreement with the customer and if the normal resale value is higher than the cost of the phone set. If the normal resale value is lower than costs, the difference is recognized as impairment immediately.

Impairment losses on Inventories are recognized in Other operating expenses (Write down of inventories to net realisable value).

2.6. Non current assets held for sale

An asset is classified as held for sale if it is no longer needed for the future operations of the Group, and has been identified for sale, which is highly probable and expected to take place within 12 months. These assets are accounted for at the lower of carrying value or fair value less cost to sell. Depreciation is discontinued from the date of designation to the held for sale status. When an asset is designated for sale, and the fair value is determined to be lower than the carrying amount, the difference is recognized in the Profit for the year (Depreciation and amortization) as an impairment loss.

2.7. Property, plant and equipment (PPE)

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses (see note 2.9).

The cost of an item of PPE comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the costs if the obligation incurred can be recognized as a provision according to IAS 37 – Provisions, Contingent Liabilities and Contingent Assets.

The cost of self-constructed assets includes the cost of materials and direct labour.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the Profit for the year during the financial period in which they are incurred.

When assets are scrapped, the cost and accumulated depreciation are removed from the accounts and the loss is recognized in the Profit for the year as depreciation expense.

When assets are sold, the cost and accumulated depreciation are removed from the accounts and any related gain or loss, determined by comparing proceeds with carrying amount, is recognized in the Profit for the year (Other operating income).

Depreciation is charged to the Profit for the year on a straight-line basis over the estimated useful lives of items of property, plant and equipment. Assets are not depreciated until they are available for use. Land is not depreciated. The assets useful lives and residual values are reviewed, and adjusted if appropriate, at least once a year. For further details on the groups of assets impacted by the most recent useful life revisions see note 12.

Notes to the consolidated financial statements

The estimated useful lives are as follows:

	2010	2009
	Years	Years
Buildings	20-40	20-40
Aerial and cable lines	20-25	20-25
Telephone exchanges	10	10
Base stations	10	10
Computers	4	4
Furniture and fittings	4-10	4-10
Vehicles	4-10	4-10
Other	2-15	2-15

2.8. Intangible assets

Intangible assets that are acquired by the Group are stated at cost less accumulated amortisation and impairment losses (see note 2.9).

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

The useful lives of concession and licenses are determined based on the underlying agreements and are amortized on a straight line basis over the period from availability of the frequency for commercial use until the end of the initial concession or license term. No renewal periods are considered in the determination of useful life (see note 13).

The estimated useful lives are as follows:

	2010	2009
	Years	Years
Software and software licences	2-5	2-5
Concession	18	18
3G licence and 2G 1800 MHz licence	10	10

Amortisation is charged to the Profit for the year on a straight-line basis over the estimated useful lives of intangible assets. Intangible assets are amortised from the date they are available for use. The assets useful lives are reviewed, and adjusted if appropriate, at least once a year.

In determining whether an asset that incorporates both intangible and tangible elements should be treated under IAS 16 - Property, Plant and Equipment or as an intangible asset under IAS 38 - Intangible Assets, management uses judgment to assess which element is more significant and recognizes the assets accordingly.

2.9. Impairment of PPE and intangible assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment.

Assets that are subject to amortization or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units - CGUs).

Impairment losses are recognized in the Profit for the year (Depreciation and amortization). Non-financial assets that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Notes to the consolidated financial statements

2.10. Provisions and contingent liabilities

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

Provisions are measured and recorded as the best estimate of the expenditure required to settle the present obligation at the financial statement date. The provision charge is recognized in the Profit for the year within the expense corresponding to the nature of the provision.

No provision is recognized for contingent liabilities. A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

2.11. Share capital

Ordinary shares are classified as equity.

2.12. Treasury shares

When the Group purchases its equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes), is deducted from equity attributable to the Group's equity holders until the shares are cancelled or reissued. When such shares are subsequently reissued, any consideration received (net of any directly attributable incremental transaction costs and the related income tax effects) is included in equity attributable to the Group's equity holders.

2.13. Other reserves

Under local statutory legislation, the Group members are required to set aside 15 percent of its net statutory profit for the year in a statutory reserve until the level of the reserve reaches 1/5 of the share capital. These reserves are used to cover losses and are not distributed to shareholders except in the case of bankruptcy of the Group members.

2.14. Revenues

Revenues for all services and equipment sales (see note 17) are shown net of VAT, discounts and after elimination of sales within the Group. Revenue is recognized when the amount of the revenue can be reliably measured, and when it is probable that future economic benefits will flow to the Group and specific criteria of IAS18 on the sale of goods and rendering of services are met for the provision of each of the Group's services and sale of goods.

Customers of the Group are granted loyalty awards (credit points) based on their usage of the Group's services including timely payment of their invoices. Loyalty awards can be accumulated and redeemed to obtain future benefits (e.g. handsets, telecommunication equipment, etc.) from the operators of the Group. When customers earn their credit points, the fair value of the credit points earned are deducted from the revenue invoiced to the customer, and recognized as Other liabilities (deferred revenue). On redemption (or expiry) of the points, the deferred revenue is released to revenue as the customer collected (or waived) the undelivered element of the deemed bundle.

Revenues from operating leases are recognized on a straight line basis over the period the services are provided.

2.14.1. Fixed line and mobile telecommunications revenues

Revenue is primarily derived from services provided to customer subscribers and other third parties using telecommunications network, and equipment sales.

Customer subscriber arrangements typically include an equipment sale, subscription fee and charge for the actual voice, internet, data or multimedia services used. The Group considers the various elements of these arrangements to be separate earnings processes for IFRS purposes and recognizes the revenue for each of the deliverables using the residual method.

Notes to the consolidated financial statements

These units are identified and separated, since they have value on a standalone basis and are sold not only in a bundle, but separately as well. Therefore the Group recognizes revenues for all of these elements using the residual method that is the amount of consideration allocated to the delivered elements of the arrangements equals the total consideration less the fair value of the undelivered elements.

The Group provides customers with narrow and broadband access to its fixed, mobile and TV distribution networks. Service revenues are recognized when the services are provided in accordance with contractual terms and conditions. Airtime revenue is recognized based upon minutes of use and contracted fees less credits and adjustments for discounts, while subscription and flat rate revenues are recognized in the period they relate to.

Revenue and expenses associated with the sale of telecommunications equipment and accessories are recognized when the products are delivered, provided there are no unfulfilled company obligations that affect the customer's final acceptance of the arrangement.

Revenues from premium rate services (voice and non-voice) are recognized on a gross basis when the delivery of the service over the network is the responsibility of the Group, the Group establishes the prices of these services and bears substantial risks of these services, otherwise presented on a net basis.

Customers may also purchase prepaid mobile, public phone and internet credits ("prepaid cards") which allow those customers to use the telecommunication network for a selected amount of time. Customers must pay for such services at the date when the card is purchased. Revenues from the sale of prepaid cards are recognized when used by the customers or when the cards expired with unused traffic.

Third parties using the telecommunications network include roaming customers of other service providers and other telecommunications providers which terminate or transit calls on the network. These wholesale (incoming) traffic revenues are recognized in the period of related usage. A proportion of the revenue received is often paid to other operators (interconnect) for the use of their networks, where applicable. The revenues and costs of these terminate or transit calls are stated gross in these consolidated financial statements as the Group is the principal supplier of these services using its own network freely defining the pricing of the service, and recognized in the period of related usage.

2.14.2. System integration and IT revenues

Contracts for network services consist of the installation and operation of communication networks for customers. Revenues for voice and data services are recognized under such contracts when used by the customer.

Revenue from system integration contracts requiring the delivery of customized products and/or services is generally covered by fixed-price contracts and revenue is recognized based on percentage of completion taking into account the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs.

Revenue from hardware and sales is recognized when the risk of ownership is substantially transferred to the customer, provided there are no unfulfilled obligations that affect the customer's final acceptance of the arrangement. Any costs of these obligations are recognized when the corresponding revenue is recognized.

Revenues from construction contracts are accounted for using the percentage-of-completion method. The stage of completion is determined on the basis of the costs incurred to date as a proportion of the estimated total costs. Receivables from construction contracts are classified in the Consolidated statement of financial position as Trade and other receivables.

2.15. Employee benefits

2.15.1. Short term employee benefits and pensions

The Group, in the normal course of business, makes payments on behalf of its employees for pensions, health care, employment and personnel tax which are calculated according to the statutory rates in force during the year, based on gross salaries and wages. Food allowances, travel expenses and holiday allowances are also calculated according to the local legislation. The Group makes these contributions to the Governmental and private funds. The cost of these payments is charged to the Profit for the year in the same period as the related salary cost. No provision is created for holiday allowances for non-used holidays as according the local legislation the employer is obliged to provide condition for usage, and the employee to use the annual holiday within one year. This is also exercised as Group policy and according the historical data employees use their annual holiday within the one year legal limit. The Group does not operate any other pension scheme or post retirement benefits plan and consequently, has no obligation in respect of pensions. The Group has legal obligation to

Notes to the consolidated financial statements

pay to employees two average monthly salaries in Republic of Macedonia at their retirement date, for which appropriate liability is recognized in the financial statements measured at the present value of two average monthly salaries together with adjustments incorporated in the actuarial calculation. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high quality bonds that are denominated in the currency in which the benefits will be paid. In addition, the Group is not obligated to provide further benefits to current and former employees.

2.15.2. Bonus plans

The Group recognises a liability and an expense for bonuses taking into consideration the financial and operational results. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.15.3. Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the nominal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognizes termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without the possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy.

2.16. Marketing expenses

Marketing costs are expensed as incurred. Marketing expenses are disclosed in note 19.

2.17. Income taxes

2.17.1. Income tax

Companies do not have to pay income tax on their profit before tax (earned since 1 January 2009) until that profit is distributed in a form of dividend or other forms of profit distributions. If dividend is paid, 10% income tax is payable at the moment of the dividend payment, regardless of whether in monetary or non-monetary form, to the foreign non resident legal entities and, foreign and domestic individuals. The dividends paid out to the resident legal entities are tax exempted. Apart of distribution of dividends, the tax is still payable on the non-deductable expenses incurred in that fiscal year, decreased by the amount of tax credits and other tax relief's (see note 2.18).

2.17.2. Deferred income tax

Due to the changes in the Macedonian tax legislation effective from 1 January 2009, the tax rate for undistributed profits was effectively reduced to zero, as tax is only payable when profits are distributed. According IAS 12.52A, deferred tax assets and liabilities should be measured using the undistributed rate. This resulted in reversal of part of the deferred tax asset and all deferred tax liability balances as of 31 December 2009, and reversal of all deferred tax assets as of 31 December 2010. In line with the requirements of SIC 25, the Group accounted the impact of this change in the profit and loss in 2009 and 2010, respectively (see note 9).

2.18. Tax on non-deductable expenses

At the end of fiscal year the companies are liable to pay tax on non deductible expenses, regardless of their financial results. The basis is expenses which are not within the scope of the company business i.e. non deductible expenses (representation expenses, provisions, gifts etc) less tax credits and other tax relieves. The tax on non-deductable expenses is recognized in the Profit for the year (Other operating expenses) against Other taxes (see note 8).

Notes to the consolidated financial statements

2.19. Leases

2.19.1. Operating lease – Group as lessor

Assets leased to customers under operating leases are included in Property, plant and equipment in the Consolidated statement of financial position. They are depreciated over their expected useful lives on a basis consistent with similar fixed assets. Rental income is recognized on a straight-line basis over the lease term.

2.19.2. Operating lease – Group as lessee

Costs in respect of operating leases are charged to the Profit for the year on a straight-line basis over the lease term.

2.20. Earnings per share

Basic earnings per share is calculated by dividing profit attributable to the equity holders of the Company for the period by the weighted average number of common stocks outstanding.

2.21. Dividends

Dividends are recognised as a liability and debited against equity in the Group's financial statements in the period in which they are approved by the Company's shareholders.

2.22. Segments

The operating segments of the Group are based on the business lines, fixed line and mobile, which is consistent with the internal reporting provided to the chief operating decision maker, the Chief Executive Officer (CEO), who is advised by the Management Committee (MC) of the Company. The CEO is responsible for allocating resources to, and assessing the performance of, the operating segments. The accounting policies and measurement principles of the operating segments are the same as those applied for the Group described in the Significant accounting policies (see note 2). In the financial statements, the Group's segments are reported in a manner consistent with the internal reporting. The two operating segments, fixed line and mobile, are represented by the two separate legal entities, Makedonski Telekom AD – Skopje and T-Mobile AD Skopje, respectively.

The operating segments' revenues include revenues from external customers as well as the internal revenues generated from other segments. The operating segments, being two separate legal entities, charge revenues for the services delivered to the other operating segments identically as for external customers.

The operating segments' results are monitored by the CEO and the MC to EBITDA (Earnings before interest, tax, depreciation and amortization), which is defined by the Group as Operating profit without Depreciation and amortization expense.

Another important KPI monitored at segment level is capital expenditure (Capex), which is determined as the additions to PPE and Intangible assets.

2.23. Comparative information

In order to maintain consistency with the current year presentation, certain items may have been reclassified for comparative purposes. Material changes in disclosures, if any, are described in detail in the relevant notes.

3. FINANCIAL RISK MANAGEMENT

3.1. Financial risk factors

The Group does not apply hedge accounting for its financial instruments, all gains and losses are recognized in the Profit for the year except financial assets classified as available for sale that are recognised in Other comprehensive income. The Group is exposed in particular to credit risks related to its financial assets and risks from movements in exchange rates, interest rates, and market prices that affect its assets and liabilities. Financial risk management aims to limit these market risks through ongoing operational and finance activities.

Notes to the consolidated financial statements

The detailed descriptions of risks, the management thereof as well as sensitivity analyses are provided below. Sensitivity analyses include potential changes in profit before tax. The potential impacts disclosed (less tax) are also applicable to the Group's Equity.

3.1.1. Market risk

Market risk is defined as the 'risk that the fair value or value or future cash flows of a financial instrument will fluctuate because of changes in market prices' and includes interest rate risk, currency risk and other price risk.

As the vast majority of the revenues and expenses of the Group arise in MKD, the functional currency of the Company is MKD, and as a result, the Group objective is to minimize the level of its financial risk in MKD terms.

For the presentation of market risks, IFRS 7 requires sensitivity analyses that show the effects of hypothetical changes of relevant risk variables on profit or loss and shareholders' equity. The periodic effects are determined by relating the hypothetical changes in the risk variables to the balance of financial instruments at the financial statement date. The balances at the end of the reporting period are usually representative for the year as a whole, therefore the impacts are calculated using the year end balances as though the balances had been constant throughout the reporting period. As the global economic situation has not changed significantly compared to the end of the previous reporting period, the methods and assumptions used in the sensitivity calculations did not change significantly.

a) Foreign currency risk

The functional currency of the Company is the Macedonian denar.

The foreign exchange risk exposure of the Group is related to holding foreign currency cash balances, and operating activities through revenues from and payments to international telecommunications carriers as well as capital expenditure contracted with vendors in foreign currency.

The currencies giving rise to this risk are primarily EUR. The Group uses cash deposits in foreign currency, predominantly in EUR, and cash deposits in denars linked to foreign currency, to economically hedge its foreign currency risk as well as local currency risk in accordance with the available banks offers. The Group manages the foreign exchange risk exposure through maintaining higher amount of deposits in EUR as a proven stable currency and by striving to lower the number of contracts with foreign operators in USD as relatively unstable currency in the period and by executing payments in USD from cash reserves in that currency.

The foreign currency risk sensitivity information required by IFRS 7 is limited to the risks that arise on financial instruments denominated in currencies other than the functional currency in which they are measured.

The Group accumulated more cash in EUR and USD than its trade payables in EUR and USD. At 31 December 2010, if MKD would have been 1% (2009: 1%) weaker or stronger against EUR, profit would have been MKD 58,321 thousand (2009: 48,174 MKD thousand) in net balance higher or lower, respectively. At 31 December 2010, if MKD would have been 1% (2009: 1%) weaker or stronger against USD, profit would have been MKD 934 thousand (2009: MKD 417 thousand) in net balance higher or lower, respectively.

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Change in the interest rates and interest margins may influence financing costs and returns on financial investments.

The interest rate risk and return on investment is of secondary importance compared to the safety and liquidity objectives described above. The Group is minimizing interest rate risk through defining of fixed interest rates in the period of the validity of certain financial investments. The investments are limited to relatively low risk financial investment forms in anticipation of earning a fair return relative to the risk being assumed.

The Group has no interest bearing liabilities, while it incurs interest rate risk on cash deposits with banks and loans to employees. No policy to hedge the interest rate risk is in place. Changes in market interest rates affect the interest income on deposits with banks.

The Group had MKD 9,611,091 thousand deposits (including call deposits) as of 31 December 2010, 1% rise in market interest rate would have caused (ceteris paribus) the interest received to increase with approx. MKD 96,111 thousand annually, while similar decrease would have caused the same decrease in interest received. Amount of deposit is MKD

Notes to the consolidated financial statements

10,645,105 thousand (including call deposits) as of 31 December 2009, therefore 1% rise in market interest rate would have caused (ceteris paribus) the interest received to increase with approx. MKD 106,451 thousand annually, while similar decrease would have caused the same decrease in interest received.

c) Other price risk

The Group's investments are in equity of other entities that are publically traded on the Macedonian Stock Exchange, both on its Official and Regular market. The management continuously monitors the portfolio equity investments based on fundamental and technical analysis of the shares. All buy and sell decisions are subject to approval by the relevant Company's bodies. In line with the Group strategy, the investments within portfolio are kept until there are favourable market conditions for their sale.

As part of the presentation of market risks, IFRS 7 also requires disclosures on how hypothetical changes in risk variables affect the price of financial instruments. As of 31 December 2009 and 31 December 2010, the Group holds investments, which could be affected by risk variables such as stock exchange prices.

The Group had MKD 65,125 thousand investments in equity of other entities that are publically traded on the Macedonian Stock Exchange as of 31 December 2010, 20% rise in market price would have caused (ceteris paribus) MKD 13,025 thousand gain, while similar decrease would have caused the same loss in the Profit for the year. The amount of the investments in equity of other entities that are publically traded on the Macedonian Stock Exchange is MKD 61,376 thousand as of 31 December 2009, therefore 20% rise in market price would have caused (ceteris paribus) MKD 12,275 thousand gain, while similar decrease would have caused the same loss in the Profit for the year.

3.1.2. Credit risk

Credit risk is defined as the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Group is exposed to credit risk from its operating activities and certain financing activities.

Counterparty limits are determined based on the provided Letter of guarantees in accordance with the market conditions of those banks willing to issue a bank guarantee. The total amount of bank guarantees that will be provided should cover the amount of the projected free cash of the Group.

With regard to financing activities, transactions are primarily to be concluded with counterparties (banks) that have at least a credit rating of BBB+ (or equivalent) or where the counterparty has provided a guarantee where the guarantor has to be at least BBB+ (or equivalent).

In cases where Group's available funds are exceeding the total amount of the provided bank guarantees mentioned above, the financial investment of the available free cash is to be performed in accordance to the evaluation of the bank risk based on CAEL methodology ratings as an off – site rating system.

The depositing decisions are made based on the following priorities:

- To deposit in banks (Deutsche Telekom core banks, if possible) with provided bank guarantee from the banks with the best rating and the best quality wording of the bank guarantee.
- To deposit in banks with provided bank guarantee from the banks with lower rating and poorer quality wording of the bank guarantee.
- If the total amount of deposits can not be placed in banks covered with bank guarantees with at least BBB+ rating (or equivalent credit rating), then depositing will be performed in local banks without bank guarantee. In this case, the determination of counterparty limits per banks shall be performed in accordance with CAEL methodology (evaluation of bank risk components – capital, assets, earning and liquidity).

CAEL methodology evaluates banks' financial ratios as an integral part of the four CAEL components - Capital, Assets, Earnings and Liquidity. The final score of the banks (on a scale from 1 to 5) is related to the banks' operations and performance for the analysed period. The Group policy is to invest in banks, which final score varies within following 3 ranges:

- A - Banks with evaluation from 1.84 to 2.45 – investments not exceeding 80% from the bank shareholder's capital.
- B - Banks with evaluation from 2.46 to 3.07 – investments not exceeding 70% from the bank shareholder's capital.
- C - Banks with evaluation from 3.08 to 3.69 – investments not exceeding 60% from the bank shareholder's capital.

Notes to the consolidated financial statements

The process of managing the credit risk from operating activities includes preventive measures such as creditability checking and prevention barring, corrective measures during legal relationship for example reminding and disconnection activities, collaboration with collection agencies and collection after legal relationship as litigation process, court proceedings, involvement of the executive unit and factoring. The overdue payments are followed through a debt escalation procedure based on customer's type, credit class and amount of debt.

The credit risk is controlled through credibility checking – which determines that the customer is not indebted and the customers credit worthiness and through preventive barring – which determinates the credit limit based on the customer's previous traffic revenues.

The Group has no significant concentration of credit risk with any single counter party or group of counter parties having similar characteristics.

The Group's procedures ensure on a permanent basis that sales are made to customers with an appropriate credit history and not exceed an acceptable credit exposure limit.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the Consolidated statement of financial position. Consequently, the Group considers that its maximum exposure is reflected by the amount of debtors net of provisions for impairment recognized and the amount of cash deposits in banks at the financial statement date.

The following table represents Group exposure to credit risk in 2010 and 2009:

In thousands of denars	2010	2009
Deposits with banks	8,205,444	8,665,521
Cash and cash equivalents	1,405,647	1,979,584
Trade debtors – domestic	2,758,465	2,592,841
Trade debtors – foreign	93,681	70,793
Loans to employees	123,037	121,924
Receivables from related parties	198,785	58,821
Other receivables	13,837	18,617
	<u>12,798,896</u>	<u>13,508,101</u>

Cash and cash equivalents in the table above exclude cash on hand as no credit risk exists for this category.

Largest amount of one deposit in 2010 is MKD 1,383,862 thousand, denominated in EUR 22,500 thousand, (2009: MKD 1,260,000 thousand). In addition, the Group has deposits with 5 domestic banks (2009: 5 domestic banks).

In order to maintain consistency with the current year presentation the performance guaranties presented in 2009 as Deposits with bank in the amount of MKD 6,723 thousand and Cash and cash equivalents in the amount of MKD 653 thousand were excluded from the Deposits with bank and Cash and cash equivalents category in these financial statements and reclassified to Other receivables in the amount of MKD 7,376 thousand. The reclassification had no impact on equity or net profit.

3.1.3. Liquidity risk

Liquidity risk is the risk that an entity may encounter difficulty in meeting obligations associated with financial liabilities.

Liquidity risk is defined as the risk that the Group could not be able to settle or meet its obligations on time.

The investment portfolio shall remain sufficiently liquid to meet all operating requirements that can be reasonably anticipated. This is accomplished by structuring the portfolio so that financial instruments mature concurrently with cash needs to meet anticipated demands.

The Group's policy is to maintain sufficient cash and cash equivalents to meet its commitments in the foreseeable future. Any excess cash is mostly deposited in commercial banks.

The Group's liquidity management process includes projecting cash flows by major currencies and considering the level of necessary liquid assets, considering business plan, historical collection and outflow data. Monthly, semi-annually and annually cash projections are prepared and updated on a daily basis by the Cash Management Department.

Notes to the consolidated financial statements

3.2. Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The total amount of equity managed by the Company, as at 31 December 2010, is MKD 17,470,439 thousand, as per local GAAP (2009: MKD 17,970,698 thousand). Out of this amount MKD 9,583,888 thousand (2009: MKD 9,583,888 thousand) represent share capital and MKD 1,916,777 thousand (2009: MKD 1,916,777 thousand) represent statutory reserves, which are not distributable (see note 2.13). The Company has also acquired treasury shares (see notes 2.12 and 16.1). The transaction is in compliance with the local legal requirements that by acquiring treasury shares the total equity of the Company shall not be less than the amount of the share capital and reserves which are not distributable to shareholders by law or by Company's statute. In addition, according the local legal requirements dividends can be paid out to the shareholders in amount that shall not exceed the net profit for the year as presented in the financial statements of the Company, increased for the undistributed net profit from previous years or increased for the other distributable reserves, i.e. reserves that exceed the statutory reserves and other reserves defined by the Company's statute. The Company is in compliance with all statutory capital requirements.

3.3. Fair value estimation

Cash and cash equivalents, trade receivables and other current financial assets mainly have short term maturity. For this reason, their carrying amounts at the reporting date approximate their fair values.

The fair value of non current portion of trade receivables comprising of employee loans are determined by using discounted cash-flow valuation technique.

Financial assets available for sale include investment in equity instruments that are measured at fair value.

The fair value of publicly traded financial assets at fair value through profit and loss is based on quoted market prices at the financial statement date.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Group makes estimates and assumptions concerning the future. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The most critical estimates and assumptions are outlined below.

4.1. Useful lives of assets

The determination of the useful lives of assets is based on historical experience with similar assets as well as any anticipated technological development and changes in broad economic or industry factors. The appropriateness of the estimated useful lives is reviewed annually, or whenever there is an indication of significant changes in the underlying assumptions. We believe that the accounting estimate related to the determination of the useful lives of assets is a critical accounting estimate since it involves assumptions about technological development in an innovative industry and heavily dependent on the investment plans of the Group. Further, due to the significant weight of depreciable assets in our total assets, the impact of any changes in these assumptions could be material to our financial position, and results of operations. As an example, if the Group was to shorten the average useful life of its assets by 10%, this would result in additional annual depreciation and amortization expense of approximately MKD 340,281 thousand (2009: MKD 309,321 thousand). See note 12 for the changes made to useful lives in the reported years.

The Group constantly introduces a number of new services or platforms including, but not limited to, the Universal Mobile Telecommunications System (UMTS) based broadband services in the mobile communications and the fiber-to-the-home rollout. In case of the introduction of such new services, the Group conducts a revision of useful lives of the already existing platforms, but in the vast majority of the cases these new services are designed to co-exist with the old platforms, resulting in no change-over to the new technology. Consequently, the useful lives of the older platforms usually do not require shortening.

4.2. Estimated impairment of property, plant and equipment, and intangibles

We assess the impairment of identifiable property, plant, equipment and intangibles whenever there is a reason to believe that the carrying value may materially exceed the recoverable amount and where impairment of value is anticipated. The

Notes to the consolidated financial statements

calculations of recoverable amounts are primarily determined by value in use calculations, which use a broad range of estimates and factors affecting those. Among others, we typically consider future revenues and expenses, technological obsolescence, discontinuance of services and other changes in circumstances that may indicate impairment. If impairment is identified using the value in use calculations, we also determine the fair value less cost to sell (if determinable), to calculate the exact amount of impairment to be charged. As this exercise is highly judgmental, the amount of a potential impairment may be significantly different from that of the result of these calculations. Management has performed an impairment test based on a 10 years cash flow projection and used a perpetual growth rate of 2% (2009: 1%) to determine the terminal value after 10 years. Value in use was determined using discounted cash flow analysis. The discount rate used was 9.38% (2009: 8.55%).

4.3. Estimated impairment of trade and other receivables

We calculate impairment for doubtful accounts based on estimated losses resulting from the inability of our customers to make the required payments. For the largest customers and international customers, impairment is calculated on an individual basis, while for other customers it is estimated on a portfolio basis, for which we base our estimate on the ageing of our account receivables balance and our historical write-off experience, customer credit-worthiness and recent changes in our customer payment terms (see note 2.4.1 (b)). These factors are reviewed periodically, and changes are made to the calculations when necessary. If the financial condition of our customers were to deteriorate, actual write-offs of currently existing receivables may be higher than expected and may exceed the level of the impairment losses recognized so far (see note 3.1.2).

4.4. Provisions

Provisions in general are highly judgmental, especially in case of legal disputes. The Group assesses the probability of an adverse event as a result of a past event and if the probability of an outflow of economic benefits is evaluated to be more than 50%, the Group fully provides for the total amount of the estimated liability. As the assessment of the probability is highly judgmental, in some cases the evaluation may not prove to be in line with the eventual outcome of the case.

4.5. Subscriber acquisition costs

Subscriber acquisition costs primarily include the loss on the equipment sales (revenues and costs disclosed separately) and fees paid to subcontractors that act as agents to acquire new customers. The Group's agents also spend a portion of their agent fees for marketing the Group's products, while a certain part of the Group's marketing costs could also be considered as part of the subscriber acquisition costs. The up-front fees collected from customers for activation or connection are marginal compared to the acquisition costs. These revenues and costs are recognized when the customer is connected to the Group's fixed or mobile networks. No such costs or revenues are capitalized or deferred. These acquisition costs (losses) are recognized immediately as they are not accurately separable from other marketing costs. The total amount of agent fees in 2010 is MKD 338,550 thousand (2009: MKD 373,557 thousand).

5. CASH AND CASH EQUIVALENTS

In thousands of denars	2010	2009
Call deposits	1,405,647	1,979,584
Cash on hand	8,425	11,837
	<u>1,414,072</u>	<u>1,991,421</u>

The interest rate on call deposits is in range from 0.50% p.a. to 2.00% p.a. (2009: from 2.21% p.a. to 4.10% p.a.). These deposits have maturities of less than 3 months.

In order to maintain consistency with the current year presentation the performance guaranties presented as Call deposits in 2009 in the amount of MKD 653 thousand were excluded from the Call deposits category in these financial statements and reclassified to Other receivables (see note 7). The reclassification had no impact on equity or net profit.

Notes to the consolidated financial statements

The carrying amounts of the cash and cash equivalents are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	1,360,206	1,816,681
EUR	42,579	168,803
USD	11,283	5,925
Other	4	12
	<u>1,414,072</u>	<u>1,991,421</u>

Following is the breakdown of call deposits by categories and by credit rating of the Guarantor (see note 3.1.2):

In thousands of denars	2010	2009
Credit rating of the Guarantor : A+	816,177	-
Credit rating of the Guarantor : A	475,581	602,777
Credit rating of the Guarantor : A-	80,983	252,875
Credit rating of the Guarantor : BB+	32,906	-
Credit rating of the Guarantor : BBB+	-	1,123,932
	<u>1,405,647</u>	<u>1,979,584</u>

6. DEPOSITS WITH BANKS

Deposits with banks represent cash deposits in reputable domestic banks, with interest rates in range from 1.00% p.a. to 4.35% p.a. (2009: from 2.00% p.a. to 4.85% p.a.) and with maturity between 3 and 12 months.

The carrying amounts of the deposits with banks are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	2,019,238	3,219,120
EUR	<u>6,186,206</u>	<u>5,446,401</u>
	<u>8,205,444</u>	<u>8,665,521</u>

In order to maintain consistency with the current year presentation the performance guaranties presented as Deposits with banks in 2009 in the amount of MKD 6,723 thousand were excluded from the Deposits with bank category in these financial statements and reclassified to Other receivables (see note 7). The reclassification had no impact on equity or net profit.

Following is the breakdown of deposits with banks by categories and by credit rating of the Guarantor (see note 3.1.2):

In thousands of denars	2010	2009
Credit rating of the Guarantor : A+	2,235,141	1,235,598
Credit rating of the Guarantor : A	1,843,416	590,050
Credit rating of the Guarantor : A-	4,125,897	3,720,308
Credit rating of the Guarantor : BB+	990	-
Credit rating of the Guarantor : BBB+	-	3,119,565
	<u>8,205,444</u>	<u>8,665,521</u>

Notes to the consolidated financial statements

7. TRADE AND OTHER RECEIVABLES

In thousands of denars	2010	2009
Trade debtors – domestic	4,611,686	4,657,312
Less: allowance for impairment	(1,853,221)	(2,064,471)
Trade debtors – domestic – net	2,758,465	2,592,841
Trade debtors – foreign	93,681	70,793
Receivables from related parties	198,785	58,821
Loans to third parties	3,088	3,033
Less: allowance for impairment	(3,088)	(3,033)
Loans to third parties– net	-	-
Loans to employees	123,036	121,924

	<u>3,434,964</u>	<u>3,037,531</u>
Less non-current portion: Other receivables	(8,714)	(6,841)
Less non-current portion: Loans to employees	(99,363)	(101,076)
Less non-current portion: Trade debtors -domestic	(207,202)	-
Current portion	<u>3,119,685</u>	<u>2,929,614</u>

Receivables from related parties represent receivables from Magyar Telekom Group and Deutsche Telekom Group (see note 29).

Loans to employees are collateralised by mortgages over real estate or with promissory note.

Loans to third parties represent loan with refence interest rate of 6 months EURIBOR with margin of 0.3%. Loans granted to employees carry effective interest rates of 6.25% p.a., 7% p.a. and 9.45% p.a. (2009: 4.55% and 7% p.a.).

Other receivables contain restricted cash in amount of MKD 10,391 thousand (2009: MKD 14,217 thousand) representing performance guaranties issued for sales projects.

In order to maintain consistency with the current year presentation the performance guaranties presented in 2009 as Deposits with bank (see note 6) in the amount of MKD 6,723 thousand and Call deposits (see note 5) in the amount of MKD 653 thousand were excluded from the Deposits with bank and Call deposits category in these financial statements and reclassified to Other receivables in the amount of MKD 7,376 thousand. In addition, MKD 2,195 thousand presented in 2009 as Other receivables were excluded from the Other receivables category in these financial statements and reclassified as VAT receivable (see note 8). The reclassification had no impact on equity or net profit.

All non-current receivables are due within 15 years of the financial statement date.

As of 31 December 2010, domestic trade debtors of MKD 2,470,668 thousand (2009: MKD 2,643,922 thousand) are impaired. The ageing of these receivables is as follows:

In thousands of denars	2010	2009
Less than 30 days	339,428	353,533
Between 31 and 180 days	366,614	337,366
Between 181 and 360 days	124,699	185,326
More than 360 days	1,639,927	1,767,697
	<u>2,470,668</u>	<u>2,643,922</u>

The total amount of the provision for domestic trade debtors is MKD 1,853,221 thousand (2009: MKD 2,064,471 thousand). Out of this amount MKD 1,697,080 thousand (2009: MKD 1,919,553 thousand) relate to provision made according the ageing structure of the above receivables, while, the amount of MKD 97,552 thousand (2009: MKD 83,835 thousand) is from

Notes to the consolidated financial statements

customers under liquidation and bankruptcy which are fully impaired. In addition, the Group has a specific provision calculated in respect of a certain group of customers in amounting to MKD 58,589 thousand (2009: MKD 61,083 thousand).

The amount of impairment compared to the gross value of the domestic trade receivables is mainly a result of receivables which are overdue more than 360 days. The total amount of fully impaired receivables is MKD 1,563,368 thousand (2009: MKD 1,656,505 thousand). These receivables are mainly from two way disconnected customers, dismantled customers, litigated customers and customers that are no longer using the Group services.

The fair values of trade and other receivables are as follows:

In thousands of denars	2010	2009
Trade debtors – domestic	2,758,465	2,592,841
Trade debtors – foreign	93,681	70,793
Receivables from related parties	198,785	58,821
Loans to employees	123,036	121,924
Other receivables	13,837	18,617
Financial assets	3,187,804	2,862,996
Advances given to suppliers	36,091	104,597
Prepayments and accrued income	211,069	69,938
	<u>3,434,964</u>	<u>3,037,531</u>

Movement in allowance for impairment of domestic trade debtors

In thousands of denars	2010	2009
Impairment losses at 1 January	2,064,471	2,016,635
Charged to expense	147,407	199,091
Write off	(358,657)	(151,255)
Impairment losses at 31 December	<u>1,853,221</u>	<u>2,064,471</u>

Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.

As of 31 December 2010, foreign trade receivables in amount of MKD 49,011 thousand (2009: MKD 53,579 thousand) were past due but not impaired. These relate to a number of international customers assessed on individual basis in accordance with past Group experience and current expectations. The analysis of these past due foreign trade receivables is as follows:

In thousands of denars	2010	2009
Less than 30 days	17,758	19,159
Between 31 and 60 days	3,318	11,200
Between 61 and 90 days	1,839	11,899
Between 91 and 180 days	11,001	460
Between 181 and 360 days	7,448	3,349
More than 360 days	7,647	7,512
	<u>49,011</u>	<u>53,579</u>

There are no other past due but not impaired receivables except above mentioned.

The Group has renegotiated domestic trade receivables in carrying amount of MKD 46,056 thousand (2009: MKD 34,656 thousand). The carrying amount of loans and receivables, which would otherwise be past due, whose terms have been renegotiated is not impaired if the collectability of the renegotiated cash flows are considered ensured.

The carrying amounts of the group's non-current trade and other receivables are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	315,279	102,263
EUR	-	5,654
	<u>315,279</u>	<u>107,917</u>

Notes to the consolidated financial statements

The carrying amounts of the group's current trade and other receivables are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	2,822,730	2,782,974
EUR	286,501	138,122
USD	5,745	3,206
Other	4,709	5,312
	<u>3,119,685</u>	<u>2,929,614</u>

The credit quality of trade receivables that are neither past due nor impaired is assessed based on historical information about counterparty default rates.

Following is the credit quality categories of neither past due nor impaired domestic trade receivables:

In thousands of denars	2010	2009
Group 1	1,500,640	1,542,870
Group 2	178,600	324,133
Group 3	254,575	146,387
	<u>1,933,815</u>	<u>2,013,390</u>

Following is the credit quality categories of neither past due nor impaired foreign trade receivables:

In thousands of denars	2010	2009
Group 1	42,041	14,966
Group 2	2,629	2,248
	<u>44,670</u>	<u>17,214</u>

Group 1 – fixed line related customers that on average are paying their bills before due date and mobile related customers with no disconnections in the last 12 month.

Group 2 – fixed line related customers that on average are paying their bills on due date and mobile related customers with up to 3 disconnections in the last 12 month.

Group 3 – fixed line related customers that on average are paying their bills after due date and mobile related customers with more than 3 disconnections in the last 12 month.

8. OTHER TAXES

Commencing from 1 January 2009 and during 2010 the Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year, while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. Therefore as of 31 December 2010 the tax computed on non-deductible expenses are presented as part of Other operating expenses in the Profit for the year and Other taxes in the Financial position statement (see note 23).

8.1. Other taxes receivable

In thousands of denars	2010	2009
VAT receivable	62,611	2,195
Tax receivables for non-deductible expenses	<u>32,121</u>	<u>-</u>
	<u>94,732</u>	<u>2,195</u>

Notes to the consolidated financial statements

8.2. Other taxes payable

In thousands of denars	2010	2009
VAT payable	25,433	72,576
Other taxes payable	3,328	2,505
	<u>28,761</u>	<u>75,081</u>

9. DEFERRED INCOME TAX

Recognised deferred income tax (assets)/liabilities

Deferred income tax (assets)/liabilities are attributable to the following items:

In thousands of denars	Assets		Liabilities		Net	
	2010	2009	2010	2009	2010	2009
Property, plant and equipment	-	(1,951)	-	-	-	(1,951)
Trade and other receivables	-	(1,426)	-	-	-	(1,426)
Deferred revenue	-	(16,448)	-	-	-	(16,448)
Financial assets at fair value through profit and loss	-	(1,555)	-	-	-	(1,555)
Trade and other payables	-	(5,818)	-	-	-	(5,818)
Provisions	-	(33,577)	-	-	-	(33,577)
Tax (assets)/liabilities	-	(60,775)	-	-	-	(60,775)
Net tax assets/(liabilities)	-	(60,775)	-	-	-	(60,775)

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The offset amounts are as follows:

In thousands of denars	2009
Deferred income tax assets:	
Deferred income tax asset to be recovered after more than 12 months	22,069
Deferred income tax asset to be recovered within 12 months	38,706
	<u>60,775</u>
Deferred tax liabilities:	
Deferred income tax liability to be recovered after more than 12 months	-
Deferred income tax liability to be recovered within 12 months	-
	<u>-</u>
Deferred income tax assets/(liabilities) net	<u>60,775</u>

Due to the changes in the Macedonian tax legislation, part of the deferred tax asset and all the liability balances were reversed as of 31 December 2009 and all deferred tax assets were reversed as of 31 December 2010 (see note 2.17.2).

Movement in temporary differences during the year

In thousands of denars	Balance 1 January 2010	Recognised in income	Balance 31 December 2010
Property, plant and equipment	(1,951)	1,951	-
Trade and other receivables	(1,426)	1,426	-
Deferred revenue	(16,448)	16,448	-
Financial assets at fair value through profit and loss	(1,555)	1,555	-
Trade and other payables	(5,818)	5,818	-
Provision	(33,577)	33,577	-
	<u>(60,775)</u>	<u>60,775</u>	<u>-</u>

Notes to the consolidated financial statements

In thousands of denars	Balance 1 January 2009	Recognised in income	Balance 31 December 2009
Property, plant and equipment	488,638	(490,589)	(1,951)
Intangible assets	(6,861)	6,861	-
Inventory	(34)	34	-
Trade and other receivables	(219,084)	217,658	(1,426)
Deferred revenue	(87,183)	70,735	(16,448)
Financial assets at fair value through profit and loss	1,591	(3,146)	(1,555)
Trade and other payables	(13,200)	7,382	(5,818)
Provision	(116,032)	82,455	(33,577)
	<u>47,835</u>	<u>(108,610)</u>	<u>(60,775)</u>

Due to the changes in the Macedonian tax legislation, the temporary differences in 2009 relate to non-deductible expenses giving rise to future tax credits, mainly for provisions charged to the Profit for the year (see note 2.17 and note 23).

10. INVENTORIES

In thousands of denars	2010	2009
Materials	193,627	129,636
Inventory for resale	322,214	444,615
Write down of inventories to net realisable value	<u>(10,847)</u>	<u>(44,912)</u>
	<u>504,994</u>	<u>529,339</u>

Movement in allowance for inventories to net realizable value:

In thousands of denars	2010	2009
Allowance at 1 January	44,912	30,993
Charged to expense	(25,727)	39,018
Write off	<u>(8,338)</u>	<u>(25,099)</u>
Allowance at 31 December	<u>10,847</u>	<u>44,912</u>

Allowance for inventory relates to trade goods. Write down of inventories to net realizable value is based on the analysis of lower cost and net realizable value at the financial statement dates.

11. ASSETS HELD FOR SALE

Assets held for sale represent property, plant and equipment which are unusable within the Company and are identified for sale. Management intentions are to sell these assets within one year, subject to extension in certain circumstances. There is a plan to sell these assets and management has started to actively market them at a reasonable price. The assets held for sale presented in the Consolidated statement of financial position are part of the fixed line segment. The mobile segment has no assets in this category.

Notes to the consolidated financial statements

At 1 January 2010	6,353	2,517,106	9,562,539	1,335,813	985,471	14,407,282
At 31 December 2010	6,353	2,553,313	9,950,173	1,286,258	1,116,089	14,912,186

The transfer between asset categories had no impact on depreciation expense.

The review of the useful lives of property, plant and equipment during 2010 affected the lives of a several types of assets. The assets affected by the change of useful life were mainly modems/routers, electronic securities systems for monitoring and

Notes to the consolidated financial statements

burglary protection, fiscal printers, air-conditioner and fix line phone sets. The change on the useful life on the affected assets was made due to technological changes and business plans of the Group member companies.

The review results in the following change in the original trend of depreciation in the current and future years.

In thousands of denars

	2010	2011	2012	2012	After 2013

At 31 December 2010	1,898,240	690,087	1,811	2,590,138

The transfer between asset categories had no impact on depreciation expense.

Notes to the consolidated financial statements

The review of the useful lives of intangible assets during 2010 confirmed the useful lives of these assets.

14. TRADE AND OTHER PAYABLES

In thousands of denars	2010	2009
Trade payables		
-Domestic	899,102	662,766
-Foreign	822,654	661,959
Liabilities to related parties	175,618	137,293
Other liabilities	139,650	60,771
Financial liabilities	2,037,024	1,522,789
Accrued expenses	1,046,838	974,856
Deferred revenue	647,976	1,002,535
Advances received	53,104	46,370
Other	34,765	34,765
	<u>3,819,707</u>	<u>3,581,315</u>
Less non-current portion: Deferred revenue	<u>(97,802)</u>	<u>(96,596)</u>
Current portion	<u>3,721,905</u>	<u>3,484,719</u>

Non-current deferred revenues have maturity up to 10 years from the date of the Consolidated statement of financial position.

Liabilities to related parties represent liabilities to Magyar Telekom Group and Deutsche Telekom Group (see note 29).

In order to maintain consistency with the current year presentation MKD 75,081 thousand were excluded from the Trade and other payables category in these financial statements and reclassified to Other taxes (see note 8). The reclassification had no impact on equity or net profit.

The ageing analysis of domestic and foreign trade payables are as follows:

In thousands of denars	2010	2009
Less than 90 days	1,625,501	1,264,121
Between 90 and 180 days	56,110	14,359
More than 181 days	40,145	46,245
	<u>1,721,756</u>	<u>1,324,725</u>

The table above does not represent a contractual maturity but rather an aging analysis where the major part of the payables are within 90 days which is the Company's regular term for payment to suppliers.

The carrying amounts of the current portion of trade and other payables are denominated in the following currencies:

In thousands of denars	2010	2009
MKD	2,910,473	2,479,110
EUR	683,174	941,561
USD	110,465	50,799
Other	17,793	13,249
	<u>3,721,905</u>	<u>3,484,719</u>

15. PROVISION FOR OTHER LIABILITIES AND CHARGES

In thousands of denars	Legal cases	Other	Total
1 January 2010	975,209	268,907	1,244,116
Additional provision	279,281	26,230	305,511
Unused amount reversed	(342,418)	(6,024)	(348,442)
Used during period	<u>(57,671)</u>	<u>(227,972)</u>	<u>(285,643)</u>
31 December 2010	<u>854,401</u>	<u>61,141</u>	<u>915,542</u>

Notes to the consolidated financial statements

In thousands of denars	Legal cases	Severance	Other	Total
1 January 2009	994,298	153,720	246,053	1,394,071
Additional provision	236,642	2,673	26,178	265,493
Unused amount reversed	(26,795)	(54,729)	(3,068)	(84,592)
Used during period	(228,936)	(101,664)	(256)	(330,856)
31 December 2009	975,209	-	268,907	1,244,116

Analysis of total provisions:

In thousands of denars	2010	2009
Non current (legal cases and other)	527,340	317,115
Current	388,202	927,001
	915,542	1,244,116

Provisions for legal cases mainly relate to certain legal and regulatory claims brought against the Group. There are numerous legal cases for which provisions were recognized, none of which are individually material, therefore not disclosed. For certain legal cases information required under IAS 37 is not disclosed, if we have concluded that the disclosure can be expected to seriously prejudice the outcome of the proceedings.

Based on legal advice, the management does not expect that the outcome of these legal claims will give rise to any significant loss beyond the amounts provided at 31 December 2010.

Other includes provision made for the legal obligation of the Group to pay to employees two average monthly salaries in Republic of Macedonia at their retirement date (see note 2.15.1) and provision made for MTIP (see note 30). The provision is recognized against Personnel expenses in the Profit for the year. In addition, as a result of the findings of the Investigation, the identified impact was recognized under Provision for other liabilities and charges, MKD 33,862 thousand as of 31 December 2010 (2009: MKD 248,379 thousand) (see note 1.2).

16. CAPITAL AND RESERVES

Share capital consists of the following:

In thousands of denars	2010	2009
Ordinary shares	9,583,878	9,583,878
Golden share	10	10
	9,583,888	9,583,888

Share capital consists of one golden share with a nominal value of MKD 9,733 and 95,838,780 ordinary shares with a nominal value of MKD 100 each.

The golden share with a nominal value of MKD 9,733 is held by the Government of the Republic of Macedonia. In accordance with Article 16 of the Statute, the golden shareholder has additional rights not vested in the holders of ordinary shares. Namely, no decision or resolution of the Shareholders' Assembly related to: generating, distributing or issuing of share capital; integration, merging, separation, consolidation, transformation, reconstruction, termination or liquidation of the Company; alteration of the Company's principal business activities or the scope thereof; sale or abandonment either of the principal business activities or of significant assets of the Company; amendment of the Statute of the Company in such a way so as to modify or cancel the rights arising from the golden share; or change of the brand name of the Company; is valid if the holder of the golden share, votes against the respective resolution or decision. The rights vested in the holder of the golden share are given in details in the Company's Statute.

Notes to the consolidated financial statements

As of 31 December 2010, the ordinary shares of the Company were held as follows:

In thousands of denars	2010	%
Stonebridge AD Skopje, in liquidation	4,887,778	51.00
Government of the Republic of Macedonia	3,336,497	34.81
The Company (treasury shares)	958,388	10.00
International Finance Corporation (IFC)	179,698	1.88
Other minority shareholders	221,527	2.31
	<u>9,583,888</u>	<u>100.00</u>

16.1. Treasury shares

The Company acquired 9,583,878 of its own shares, representing 10% of its shares, through the Macedonian Stock Exchange during June, 2006. The total amount paid to acquire the shares, net of income tax, was MKD 3,843,505 thousand. The shares are held as treasury shares.

As a result of the findings of the Investigation, for one consultancy contract, the payments of which was erroneously capitalized as part of treasury shares in 2006 has been retrospectively derecognized from treasury shares (see note 1.2).

The amount of treasury shares of MKD 3,738,358 thousand (after restatement), has been deducted from shareholders' equity. The Company has the right to reissue these shares at a later date. All shares issued by the Company were fully paid.

17. REVENUES

In thousands of denars	2010	2009
Fixed line revenues		
Voice retail	3,389,509	4,355,216
Voice wholesale	1,755,359	1,120,376

Notes to the consolidated financial statements

18. PERSONNEL EXPENSES

In thousands of denars	2010	2009
Salaries	1,056,628	972,933
Contributions on salaries	335,535	329,775
Bonus payments	253,211	214,737
Other staff costs	168,313	160,588
Capitalised personnel costs	(117,197)	(101,542)
	<u>1,696,490</u>	<u>1,576,491</u>

Other staff costs mainly include holiday's allowance, termination benefits for 52 employees leaving the Group in 2010 (2009: 16 employees) and other benefits.

Bonus payments also include the cost for the Magyar Telekom's Mid Term Incentive Plan ("MTIP") (see note 30).

19. OTHER OPERATING EXPENSES

In thousands of denars	2010	2009
Purchase cost of goods sold	1,597,978	1,921,616
Services	1,077,111	1,116,201
Marketing and donations	492,468	651,034
Materials and maintenance	442,402	472,281
Premium rate services	316,116	327,787
Energy	244,825	213,289
Fees, levies and local taxes	180,866	472,308
Impairment losses on trade and other receivables	147,407	199,091
Rental fees	115,213	125,342
Consultancy	96,736	97,117
Tax on non-deductable expenses	92,586	-
Insurance	21,528	21,558
Other	71,085	21,850
	<u>4,896,321</u>	<u>5,639,474</u>

Services mainly include agent commissions, expenses for maintenance of IT equipment, postal expenses and other service fees (such as cleaning, security and other).

In order to maintain consistency with the current year presentation expenses presented in 2009 as Other in the amount of MKD 10,838 thousand were excluded from the Other operating expenses category in these financial statements and reclassified to Finance expenses (see note 21). The reclassification had no impact on equity or net profit.

Commencing from 1 January 2009 and during 2010 the Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year, while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. Therefore as of 31 December 2010 the tax computed on non-deductable expenses are presented as part of Other operating expenses in the Profit for the year and as part of Other taxes in the Financial position statement (see note 23).

20. OTHER OPERATING INCOME

Other operating income represents gain on sale of PPE.

Notes to the consolidated financial statements

21. FINANCE EXPENSES

In thousands of denars	2010	2009
Interest expense	131,765	10,964
Bank charges and other commissions	49,067	32,953
Fair value and available for sale - loss	646	3,133
	<u>181,478</u>	<u>47,050</u>

In order to maintain consistency with the current year presentation expenses presented in 2009 in Other operating expenses in the amount of MKD 10,838 thousand were excluded from the Other operating expenses category in these financial statements and reclassified to Interest expense (see note 19). The reclassification had no impact on equity or net profit.

22. FINANCE INCOME

In thousands of denars	2010	2009
Interest income	382,028	429,083
Net foreign exchange gain	47,781	4,739
Dividend income	2,789	3,118
Fair value gain	3,749	-
	<u>436,347</u>	<u>436,940</u>

Dividend income is from financial asset at fair value through profit and loss. Interest income is generated from financial assets classified as loans and receivables.

23. INCOME TAX EXPENSE

Recognized in the Profit for the year:

In thousands of denars	2010	2009
Current tax expense		
Current year	<u>17,416</u>	<u>115,677</u>
Deferred tax expense		
Origination and reversal of temporary differences	<u>60,776</u>	<u>(108,610)</u>
Total income tax in profit for the year	<u>78,192</u>	<u>7,067</u>

Commencing from 1 January 2009 and during 2010 The Government of the Republic of Macedonia has introduced several modifications and changes in the Profit Tax Law. According these changes the base for computation of income tax are non-deductible expenses incurred during the fiscal year while the income tax is payable at the moment of profit distribution in a form of dividend to a foreign legal entities, foreign and domestic individuals. Dividend distribution among domestic companies is tax exempted. In addition, the income tax shall apply at the moment of the distribution of the profits in a form of dividends. Subsequently, as long as the undistributed profits are retained within the company the income tax would not be applied (see note 2.17).

Up to now the tax authorities had carried out a full-scope tax audits at the Company for 2005 and the years preceding. Additionally, audit of personal income tax was carried out by the tax authorities for the period 1 January 2005 to 31 March 2006. During 2010 there was tax audit conducted by the Public revenue office for income tax for 2008 and 2009, withholding tax for 2007 and 2008 and VAT for 2009.

The tax authorities may at any time inspect the books and records within 5 years subsequent to the reported tax year, and may impose additional tax assessments and penalties. In a case of tax evasion or tax fraud the statute of limitations may be extended up to 10 years. The Company's management is not aware of any circumstances, which may give rise to a potential material liability in this respect other than those provided for in these financial statements.

Notes to the consolidated financial statements

24. DIVIDENDS

The Shareholders' Assembly of the Company, at its meeting, held on 2 July 2010 adopted a Resolution for the dividend payment for the year 2009. The Resolution on dividend payment for 2009 is in the amount of MKD 6,470,029 thousand from the net profit for the year 2009. The dividend was paid out on July 2010. Up to date of issuing of these financial statements, no dividends have been declared for 2010.

25. REPORTABLE SEGMENTS AND INFORMATION

25.1. Reportable segments

The Group's reportable segments are: fixed line and mobile segment.

The fixed line segment provides local, national and international long distance telephone services, VoIP services, leased line services, Internet services and TV distribution services under the T-Home brand.

The mobile segment provides mobile telecommunication services under the T-Mobile brand.

25.2. Information regularly provided to the chief operating decision maker

The following tables present the segment information by reportable segment regularly provided to the CEO and the MC, reconciled to the corresponding Group numbers.

Revenues

In thousands of denars	2010	2009
Total Fixed Line revenues	8,483,703	8,719,050
Less: Fixed Line revenues from other segment	(694,405)	(664,929)
Fixed Line revenues from external customers	7,789,298	8,054,121
Total Mobile revenues	10,490,872	10,932,990
Less: Mobile revenues from other segment	(1,071,048)	(974,417)
Mobile revenues from external customers	9,419,824	9,958,573
Total revenues of the Group	17,209,122	18,012,694

None of the Group's external customers represent a significant source of revenue.

Segment results (EBITDA)

In thousands of denars	2010	2009
Fixed Line	3,953,869	4,205,513
Mobile	5,081,012	5,168,554
Total EBITDA of the Group	9,034,881	9,374,067
Depreciation and amortization of the Group	3,161,352	2,847,707
Total operating profit of the Group	5,873,529	6,526,360
Finance income - net	254,869	389,890
Profit before income tax of the Group	6,128,398	6,916,250

Capital expenditure (CAPEX) on PPE and Intangible assets

In thousands of denars	2010	2009
Fixed Line	2,187,437	1,839,607
Mobile	1,223,128	1,464,555
Total capital expenditure on PPE and Intangible assets of the Group	3,410,565	3,304,162

Notes to the consolidated financial statements

The amounts disclosed as “Capital expenditure on PPE and Intangible assets” correspond to the “Investment” line disclosed in notes 12 and 13.

26. LEASES AND OTHER COMMITMENTS

26.1. Operating lease commitments – where the Group is the lessee:

Operating lease commitments – where the Group is the lessee, are mainly from lease of buildings, business premises and other telecommunications facilities.

The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

In thousands of denars	2010	2009
Not later than 1 year	105,382	101,712
Later than 1 year and not later than 5 years	266,612	279,822
Later than 5 years	104,623	117,166
	<u>476,617</u>	<u>498,700</u>

26.2. Operating lease commitments – where the Group is the lessor:

Operating lease commitments – where the Group is the lessor are mainly from lease of land sites for base stations.

The future aggregate minimum lease receivables under non-cancellable operating leases are as follows:

In thousands of denars	2010	2009
Not later than 1 year	21,790	18,385
Later than 1 year and not later than 5 years	85,322	71,935
Later than 5 years	63,942	65,402
	<u>171,054</u>	<u>155,722</u>

26.3. Capital commitments

The amount authorized for capital expenditure as at 31 December 2010 was MKD 437,188 thousand (2009: MKD 445,004 thousand).

27. ADDITIONAL DISCLOSURES ON FINANCIAL ASSETS

The Group classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- (a) quoted prices (unadjusted) in active markets for identical assets (Level 1);
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly (Level 2); and
- (c) inputs for the asset that are not based on observable market data (Level 3).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The significance of an input is assessed against the fair value measurement in its entirety.

There was no transfer between Level 1 and Level 2 financial assets.

Notes to the consolidated financial statements

27.1. Financial assets – Carrying amounts and fair values

The table below shows the categorization of financial assets as at 31 December 2009.

Assets In thousands of denars	Financial assets				Carrying amount	Fair value
	Loans and receivables	Held- to- maturity	Available-for- sale (Level 2)	At fair value through profit and loss (Level 1)		
Cash and cash equivalents	1,991,421	-	-	-	1,991,421	1,991,421
Deposits with banks	8,665,521	-	-	-	8,665,521	8,665,521
Trade and other receivables	2,929,614	-	-	-	2,929,614	2,929,614
Available-for-sale financial assets	-	-	896	-	896	896
Financial assets at fair value through profit and loss	-	-	-	61,376	61,376	61,376

The table below shows the categorization of financial assets as at 31 December 2010.

Assets In thousands of denars	Financial assets				Carrying amount	Fair value
	Loans and receivables	Held- to- maturity	Available-for- sale (Level 2)	At fair value through profit and loss (Level 1)

Trade and other receivables	3,119,685	-	-	-	3,119,685	3,119,685
Available-for-sale financial assets	-	-	305	-	305	305
Financial assets at fair value through profit and loss	-	-	-	65,125	65,125	65,125

Loans and receivables are measured at amortized cost, while available-for-sale and held-for-trading assets are measured at fair value.

Cash and cash equivalents, trade receivables and other current financial assets mainly have short times to maturity. For this reason, their carrying amounts at the end of the reporting period approximate their fair values.

Financial assets available for sale include insignificant investment in equity instruments, measured at fair value.

Financial assets at fair value through profit or loss include investments in equity instruments in the amount of MKD 65,125 thousand (2009: MKD 61,376 thousand) calculated with reference to the Macedonian Stock Exchange quoted bid prices. Changes in fair values of other financial assets at fair value through profit or loss are recorded in finance income/expenses in the Profit for the year (see note 21 and 22). The cost of these equity investments is MKD 31,786 thousand (2009: MKD 31,786 thousand).

27.2. Other disclosures about financial instruments

The Group is also exposed to risks that arise from the possible drawdown of guarantees in a nominal amount of MKD 10,391 thousand as at 31 December 2010 (2009: MKD 14,217 thousand). These guarantees were issued by Macedonian banks on behalf of Makedonski Telekom, or its subsidiary, as collaterals to secure the fulfilment of the Group's certain contractual obligations. The Group has been delivering on its contractual obligations and expects to continue doing so in the future, therefore no drawdown of the guarantees has happened so far, and is not expected to happen in the future.

Notes to the consolidated financial statements

There were no financial assets or liabilities, which were reclassified into another financial instrument category.

No financial assets were transferred in such a way that part or all of the financial assets did not qualify for de-recognition.

28. CONTINGENCIES

The Company has contingent liabilities in respect of legal and regulatory claims arising in the ordinary course of business. It is not anticipated by the management of the Company that any material liabilities will arise from the contingent liabilities other than those provided for (see note 15).

T-Mobile Macedonia has contingent liabilities in respect to routine legal proceedings arising in the ordinary course of business. The major contingent liability in amount of MKD 978,661 thousand relate to legal case with Newsphone S DOO Skopje for possible damage compensation with regards to lost future profits as a result of termination of contract by the T-Mobile Macedonia. Based on legal advice, the Management expects that it is not probable that an outflow of resources embodying economic benefits will be required to settle these obligations.

29. RELATED PARTY TRANSACTIONS

All transactions with related parties arise in the normal course of business and their value is not materially different from the terms and conditions that would prevail in arms-length transactions.

Transactions with related parties include provision and supply of telecommunication services and equipment, loans granted and supply of management consultancy services. The amounts receivable and payable are disclosed in the appropriate notes (see note 7 and 14).

Notes to the consolidated financial statements

30. KEY MANAGEMENT COMPENSATION

The compensation of key management from the Company, including taxation charges and contributions, is presented below:

In thousands of denars	2010	2009
Short-term employee benefits (including taxation)	115,636	99,672
State contributions on short-term employee benefits	6,185	5,599
Share-based payments	1,591	2,689
	<u>123,412</u>	<u>107,960</u>

The remuneration of the members of the Company's Board of Directors amounted to MKD 4,650 thousand (2009: MKD 6,120 thousand) included in Short-term employee benefits.

The share-based payments represent compensation of key management from the Company as part of a Mid Term Incentive Plan (MTIP) launched by Magyar Telekom Plc., whereby the targets to be achieved are based on the performance of the Magyar Telekom Plc. shares. Participants include top and senior managers of the Magyar Telekom Group.

Notes to the consolidated financial statements

The MTIP is operated by Magyar Telekom Plc. while the compensation of key management from the Company related to the MTIP is incurred by the Company (for MTIP programs launched 2008 and 2009) and is included in Personnel expenses (Bonus Payments) recognized against Other provisions (see notes 18 and 15).

31. EVENTS AFTER THE FINANCIAL STATEMENT DATE

There are no events after the financial statement date that would have impact on the 2010 profit for the year, Consolidated statement of financial position or cash flows.

ANNUAL REPORT

on the operations of the Group of Makedonski Telekom AD - Skopje in 2010

On 13 February 2006, Magyar Telekom Plc., the controlling owner of Makedonski Telekom AD - Skopje (the Company), (via Stonebridge Communications AD - Skopje (under liquidation), majority shareholder of the Company), announced that it was investigating certain contracts entered into by another subsidiary of Magyar Telekom Plc. to determine whether the contracts were entered into in violation of Magyar Telekom Plc. policy or applicable law or regulation. Magyar Telekom's Audit Committee retained White & Case, as its independent legal counsel to conduct the internal investigation. Subsequent to this on 19 February 2007, the Board of Directors of the Company, based on the recommendation of the Audit Committee of the Company and the Audit Committee of Magyar Telekom Plc., adopted a resolution to conduct an independent internal investigation regarding certain contracts in Macedonia.

For further information about the internal investigation, please refer to the financial statements of the Company for the year ended 31 December 2009.

According to the information provided to the Company by Magyar Telekom Plc., on 2 December 2009, the Audit Committee of Magyar Telekom Plc., provided the Magyar Telekom's Board of Directors with a "Report of Investigation to the Audit Committee of Magyar Telekom Plc." dated 30 November 2009 (the "Final Report"). The Audit Committee indicated that it considers that, with the preparation of the Final Report based on currently available facts, White & Case has completed its independent internal investigation.

According to the information provided to the Company by Magyar Telekom Plc., the Final Report includes the following findings and conclusions related to Magyar Telekom's Macedonian affiliates, based upon the evidence available to the Audit Committee of Magyar Telekom Plc. and its counsel:

- As previously disclosed, there is evidence that certain former employees intentionally destroyed documents relating to activities undertaken in Macedonia by Magyar Telekom Plc. and its affiliates.
- Between 2000 and 2006 a small group of former senior executives at Magyar Telekom and Magyar Telekom's Macedonian affiliates, authorized the expenditure of approximately EUR 24 million through over twenty suspect consultancy, lobbying, and other contracts (including certain contracts between Magyar Telekom and its subsidiaries on one hand, and affiliates of a Cyprus-based consulting company on the other hand). The Final Report concludes that "the available evidence does not establish that the contracts under which these expenditures were made were legitimate."
- "The evidence shows that, contrary to their terms, a number of these contracts were undertaken to obtain specific regulatory and other benefits from the government of Macedonia. The Companies generally received the benefits sought and then made expenditures under one or more of the suspect contracts. There is evidence that the remaining contracts were also illegitimate and created a pool of funds available for purposes other than those stated on the face of the agreements." However, the Magyar Telekom Audit Committee's counsel did not have access to evidence that would allow it to identify the ultimate beneficiaries of these expenditures.
- In entering into these contracts and approving expenditures under them, the former senior executives knowingly caused, structured, or approved transactions that shared most or all of the following characteristics:
 - intentional circumvention of internal controls;
 - false and misleading corporate documents and records;
 - lack of due diligence concerning, and failure to monitor performance of, contractors and agents in circumstances carrying a high risk of corruption; lack of evidence of performance; and
 - expenditures that were not for the purposes stated in the contracts under which they were made, but rather were intended to obtain benefits for the Magyar Telekom subsidiaries that could only be conferred by government action.
- The Final Report states that "the Investigation did not uncover evidence showing receipt of payments by any Macedonian government officials or political party officials."

As previously disclosed, Magyar Telekom has taken remedial steps to address issues previously identified by the independent investigation, including steps designed to revise and enhance the Magyar Telekom Group's internal controls. According to

information provided to the Company by Magyar Telekom, the Audit Committee of Magyar Telekom has not made recommendations relating to Magyar Telekom's compliance program or internal controls in connection with the issuance of the Final Report and Magyar Telekom is considering, in consultation with its Audit Committee, whether and to what extent the Final Report warrants additional remedial actions, including any personnel actions and/or changes in internal control policies and procedures at Magyar Telekom or its subsidiaries that have been or will be implemented to address the findings of the Final Report.

In relation to the issuance of the Final Report and the information provided to the Company by Magyar Telekom, in January 2010 the Chairman of the Company's Board of Directors requested third party legal and tax expertise for assessment of the potential accounting and tax implications arising from the transactions conducted by the Company and its subsidiary subject to the Final Report.

The external experts prepared reports (the "Reports") on their assessment and submitted the Reports to the Chairman of the Company's BoD and the Management of the Company and its subsidiary accordingly. As a result, based on the analysis of the Tax and Legal experts and information available to the Management related to the transactions subject of the Final Report, amount of MKD 248,379 thousand has been identified as potential tax impact (together with related penalty interest) as of 31 December 2009 arising from the transactions conducted by the Company and its subsidiary subject to the Final Report. In 2010 the amount related to the identified potential tax impact (together with related penalty interest) amounted to MKD 261,834 thousand out of which MKD 227,972 thousand related to the Company were paid in 2010 upon an executive decision issued by the Public Revenue Office. In addition, the value of one contract of MKD 105,147 thousand capitalised within treasury shares is now corrected and accounted for as though these payments had been expensed in 2006 rather than capitalized as part of treasury shares as originally reported. The other contracts that were identified by the Final Report and the reports of the tax and legal experts related to transactions undertaken by the Company and its subsidiary were expensed in the related periods (2001-2007).

In May 2008, the Ministry of Interior ("MOI") of the Republic of Macedonia ("RoM") submitted to the Company an official written request for information and documentation regarding certain payments for consultancy services and advance dividend, as well as certain procurements and contracts. In June 2008 the Company submitted copies from the requested documents. In the same period, T-Mobile Macedonia has also received similar requests for provision of certain documentation to the Ministry of Interior of RM and they were submitted accordingly.

In October 2008 the Investigation Judge from the Primary Court Skopje 1 – Skopje (the criminal court), has issued an official written order to the Company to handover certain original documentation. Later in October 2008, the Company officially and personally handed over the requested documentation. Additional MOI requests in written were submitted and the Company provided the requested documentation.

We understand, based on public information available as of 10 December 2008, that the MOI Organized Crime Department submitted the files to the Basic Public Prosecution Office of Organized Crime and Corruption, with a proposal to bring criminal charges against Attila Szendrei (former CEO of Makedonski Telekom AD - Skopje), Rolf Plath (former CFO of Makedonski Telekom AD - Skopje), Mihail Kefaloyannis (former member of the Board of Directors in Stonebridge and former member of the Board of Directors in Telemakedonia) and Zoltan Kisjuhász (former CEO of Stonebridge and former non-executive member of the Board of Directors of Makedonski Telekom AD - Skopje) on the account of a reasonable doubt for committed criminal act. These individuals are proposed to be charged with having „abuse of office and authorizations" in their position in Makedonski Telekom AD - Skopje by concluding consultancy contracts for which there was no intention or need for any services in return.

The Primary Court Skopje 1 in Skopje, Investigative Department for Organized Crime delivered a summon to the Company in connection with the criminal charges against the above stated persons and asked for a statement whether the Company has suffered any damages on the basis of the said consultancy contracts.

After several postponements of the court hearing related to the investigation procedure handled in the Primary Court Skopje 1 Skopje, on the hearing held on 13 April 2009, the representatives of Makedonski Telekom AD Skopje declared the position of the Company that taking into consideration the ongoing independent internal investigation conducted by White & Case, approved by the Company's BoD, it was premature to preannounce any damage which may be caused by means of the implementation of the mentioned contracts or with reference to them. Upon completion of the independent internal investigation, the Company will inform the court on its final position in respect of the possible damage and the criminal prosecution of the accused persons. On 9 April 2010 the Company received notification from the Bureau of judicial expertise that based on the order of the Primary Court Skopje 1 Skopje the Bureau will perform expertise on the case. The expertise was performed on 11 May 2010 and the experts from Ministry of Justice of the Republic of Macedonia – Court Expertise Office – Skopje, asked from some additional documents from the Company's side in order to prepare the expertise. The Company received Notification from the Court Expertise Office – Skopje that the expertise will continue on 18 October 2010. The experts asked additional information related to certain agreements concluded in 2005 and 2006, and related invoices. The Company has collected and submitted requested information/documentation to the Court Expertise Office on 1 November 2010. After

preparation the expertise will be submitted from the responsible Judge to the Public Prosecutor. The Public Prosecutor should decide whether he/she will initiate prosecution act against accused persons or not depending on the expertise and other relevant proofs collected in the phase of investigation.

MOI of the RoM - Organized Crime Department, approached to the Company during August 2009, with request some additional documentation to be submitted to the MOI. The Company collected and submitted requested documentation on 27 August 2009.

The Chairman of the Company's BoD and the Company's Management have received an information that the contents of the Final Report has also been made available to the Macedonian Public Prosecution Office. The Company's Management cannot foresee whether the Macedonian Public Prosecution Office will initiate any legal procedure or the type and scope of legal actions on the basis of the information contained in the Final Report.

We have become aware of no information as a result of a request from any regulators or other external parties, other than as described above, from which we have concluded that the financial statements may be misstated, including from the effects of a possible illegal act.

This Annual Report on the operation refers to the Group of Makedonski Telekom AD - Skopje, which includes Makedonski Telekom AD - Skopje (hereinafter referred to as: "MKT"), T-Mobile Macedonia AD Skopje (hereinafter referred to as: "TMMK") and the e-Macedonia Foundation - Skopje (hereinafter jointly referred as the: "the Group").

MKT is a joint stock company incorporated and domiciled in the Republic of Macedonia for the provision of telecommunication services.

The Group's immediate parent company is AD Stonebridge Communications - Skopje, under voluntary liquidation, solely owned by Magyar Telekom Plc., registered in Hungary. The ultimate parent company is Deutsche Telekom AG registered in the Federal Republic of Germany.

MKT is the primary fixed line service provider in Macedonia. Its exclusive rights in fixed line telecommunication services expired in December 2004. These exclusive rights included local, national and international long-distance public voice services, voice over IP services, leased line services and building and operating public voice network services. MKT's objectives for the forthcoming years comprise being a leading provider of technology in Macedonia and providing quality services with attractive prices in order to be prepared for the increasing competition.

MKT provides traditional fixed line telecommunication services and content services within the scope of the fixed line network, broadband services and integrated solutions, including TV over Internet Protocol ("IPTV"). At the end of 2010, MKT had 340,142 PSTN lines and 38,558 ISDN channels, compared to 366,418 and 41,076 respectively, at the end of 2009. The fixed line penetration was marked with a similar movement, stabilizing at 17.2% at the end of 2010. The number of ADSL connections increased to 152,668 at the end of 2010, compared to 132,788 as of 31 December 2009. The number of IPTV customers at the end of 2010 reached 30,486 customers (including 3 Play, IPTV only and 2 MAX) compared to 14,334 customers at the end of 2009. The number of FTTH customers reached 2,127 customers at the end of 2010.

In 2010, approximately 23% of the total revenues of the Group were comprised of the voice revenues from domestic fixed line telecommunication services. The mobile services contributed with 51%, while the international telecommunication services contributed with 8% to the total revenues. The internet and data services contributed with 11% of the total revenues, while 7% of the total revenues were derived from other services.

The revenue from domestic fixed line telecommunication services still marks a downward movement mainly due to the increasing mobile substitution and the intensified competition on the telecommunications market. The increased revenue of MKT from international traffic is a result of the increased volume of traffic and the increased termination rates. The portion of the revenues from mobile services decreased due to the intensified competition and the decreased subscriber base. The Internet and data revenue has grown, mainly due to the increased number of ADSL subscribers and the growing number of IPTV subscribers, but it still represents a small portion of the total revenues. In June 2006, through the Macedonian Stock Exchange, MKT acquired 9,583,878 of its own shares, representing

10% of its shares. The amount of MKD 3,738,358 thousand related to the purchase of these shares is deducted from the shareholders' equity as treasury shares. MKT has the right to reissue these shares at a later date.

In 2008, MKT adopted the T-Home brand and on 1 May 2008 it changed its legal name from AD Makedonski Telekomunikacii - Skopje into Makedonski Telekom AD – Skopje, wherein its products are now marketed under the brand T-Home.

TMMK is the leading mobile service provider in Macedonia, dedicated to provide up-to-date technologies and advanced service offerings, commensurate to the highest technological and service standards of the T-Mobile Group.

TMMK had customer base of 1,295,285 at the end of 2010, compared to 1,381,094 at the end of 2009. The mobile market penetration in Macedonia is over 122 percent, which shows the trend of individuals owning multiple SIM cards. As a result of the market saturation, we especially focus on retaining the customers in order to protect our market share. The Agency uses the market share calculation method based on the total number of active SIM cards which were used in the previous three months.

The decline in the number of TMMK subscribers in 2010 is due to the very aggressive pricing offers by the competitors. The pricing offers are accompanied by strong marketing campaigns with a focus on a very low price level.

The Macedonian mobile market was characterized by highly competitive campaigns and offers in 2010. Due to the increased competitiveness and in order to prevent the churn and encourage the usage. TMMK launched various campaigns, price plans and additional services specially designed to meet the subscribers' needs, with a focus on value instead of price. These offers are targeting different customer segments.

In 2010, TMMK introduced several products that differentiate TMMK on the mobile market and provide additional value for the customers.

TMMK is continuously working on creating a market demand for mobile Internet and stimulating mobile data usage via device/data price plans.

T-Mobile Macedonia introduced its first quadruple bundled product, Family Max which is a joint offer containing fixed line, mobile telephony, high speed ADSL Internet and IPTV for one monthly subscription.

Regulation and Pricing

A new Macedonian law concerning electronic communications (Law on Electronic Communications - "LEC") was enacted on 5 March 2005. Thus, by means of certain transitional provisions, the country's telecommunication regulations were harmonized with the EU regulatory framework. Furthermore, a number of strict obligations for the existing operators were stipulated.

In the second half of 2006, the Government of the Republic of Macedonia enacted a number of bylaws and rulebooks regulating various electronic communications areas. On 4 May 2007, the LEC was amended and criminal responsibility was introduced for the responsible person within the legal entity on account of not publishing the reference interconnection offer and the local loop unbundling access offer. Additional amendments of the LEC were adopted on 4 August 2008, by which the Concession Contracts of MKT, TMMK and Cosmofon (which was rebranded into ONE in November 2009), concluded pursuant to the old Telecommunications Act with the Ministry of Transport and Communications, ceased to be valid as of 4 September 2008. All the relevant provisions in favour of MKT arising from the Concession Contracts were included in the LEC amendments. On 5 September 2008, the Agency for Electronic Communications ("the Agency"), ex officio, issued a notification to MKT regarding those public electronic communication networks and/or services which have been allocated thereto under the Concession Contracts. Radiofrequency licenses were issued to the operators for the bands granted under the Concession Contracts in a form prescribed by the LEC.

The latest changes of the LEC were amended and published in the Official Journal of the RoM No.83 on 23 June 2010. The introduced obligations were in line with the amended EU Regulatory Framework, comprising the following: opening ducts, poles and other network access remedies; accounting separation for all legal entities; an obligation for data storage for the operator in terms of keeping traffic data for a period of 24 months.

At end of 2010, changes in the RUO and RIO rulebooks were also proposed according to the changes in the LEC and the new BEREC's NGA recommendation. There is a proposed migration procedure and optional measures as fibre unbundling and fibre bit stream access.

Regulation of Fixed Line Business

On 31 December 2004, MKT's monopoly rights on the Macedonian telecommunications market expired, thus making it possible for other network and service providers to enter the Macedonian telecommunications markets, upon the submission of a notification to the Agency and the registration thereof. Due to the new notification procedure introduced by the Agency in November 2009 and the obligation for re-notification of the entities, until 4 January 2011 the Agency had registered 144 network operators and 21 providers of public fixed telephone services.

Under the LEC, MKT has been designated as a Significant Market Power ("SMP") operator on the market of fixed line voice telephone networks and services, including the market of access to the networks for data transmission and leased lines. MKT as an SMP operator has the obligation to enable its subscribers to access publicly available telephone services of any interconnected operator with an officially signed interconnection contract.

According to current by-laws, MKT has an obligation to publish reference offers for the wholesale products for interconnection, unbundling local loop, local bit-stream access, wholesale line rental and wholesale leased lines. The changes in the by-laws for bit-stream access, made on 7 June 2010, resulted with decreased fees for bit-stream access and introduction of technical specifications for new services (IPTV, VoIP and VoD). Therefore, the wholesale partners will be more competitive on the broadband market. Furthermore, a new Rulebook on access and use of specific network assets was published by the Agency on 7 December 2010, with which an obligation was imposed on MKT to offer access to ducts and dark fibre.

During 2010, the Agency imposed the following remedies related to RIO and RUO: sharing costs for IC links and symmetry of fixed termination rates between the operators.

During December 2010, the Agency published the results from its own developed LRIC Bottom – up costing model. On 17 January 2011, the Agency sent a Decision letter to MKT for changing the wholesale fees included in the Reference Interconnection Offer ("RIO").

The latest changes in RUO with the decrease of the one-off fees were published in March 2010, after the Agency's approval. On 16 April 2007, MKT signed the first RUO based unbundling agreement with an alternative fixed network operator. On 17 January 2011, the Agency sent a Decision letter to MKT for changing the wholesale fees included in the Reference Offer for Unbundled Access to Local Loop ("RUO").

Based on Article 41 of the LEC, the Agency initiated the procedure for analyses of the relevant markets. MKT was announced as an SMP on all relevant markets in terms of the fixed segment. MKT and the fixed alternative operators were assigned as operators with Significant Market Power ("SMP") on the market for termination calls in their networks (the relevant market 9 from the former European Commission recommendation). The reference offers from the alternative operators (ONE, OnNet and Neotel) are approved and published accordingly. New remedy streams were imposed, such as intensifying retail regulation (especially for bundles), VoIP and NGA networks. On 7 May 2010, the Agency brought a final decision for the value of WACC and it was determined for MKT, TMMK and ONE. New WACC rates decreased to:

- For MKT WACC (pre-tax) it shall be 13.40%;

- For TMMK and ONE, WACC (pre-tax) it shall be 14.00%

Number portability was implemented on MKT's and TMMK's networks and the commercial start of the service in Macedonia took place on 1 September 2008.

On 30 June 2009, the Agency enacted a Decision for setting the maximal amount of the one-time fee for the number portability service for fixed and mobile operators, in the amount of 200 Macedonian denars (approximately 3.25 EUR), which was previously established individually by the operators.

A new Numbering Plan was enacted in November 2009. The major changes incorporate an abbreviated, premium rate and free phone numbers to be assigned only to operators and service providers, but not to end users. MKT will continue hosting numbers upon the prior consent of the end users to which the numbers were assigned.

In 2007, the Agency granted six regional and two national authorizations for radio frequency utilization in the 3.4-3.6 GHz band for the implementation of fixed wireless access, WiMAX.

Based on the analysis and the Agency's program for 2011, the Agency is planning to impose retail price regulation on MKT.

The SMP operators are obliged to keep separate accounting records for their wholesale and retail activities.

Regulated retail prices

As of 2008, the fixed voice market in Macedonia has become highly competitive. The new fixed line operators Cosmofon and OnNet (now ONE) launched fixed line and bundled services at decreased prices. The major CATV (Cabletel and Telekabel) and other alternative operators also started to offer fixed voice and bundled products at attractive prices.

Until August 2008, the regulatory framework for the retail tariff regulation for MKT was provided for in the Concession Contract. With the changes of the LEC published on 4 August 2008, the existing Concession Contracts of MKT, including the retail price cap regulation, are no longer valid as of 4 September 2008.

According to the LEC and the newly enacted bylaw pertaining to retail price regulation, the Agency may prescribe one of the following manners of retail regulation of fixed telephony services:

- Price cap;
- Individual price approval;
- Cost based prices; or
- Benchmark prices

In the middle of 2010, the Agency introduced Guidelines on Price Squeeze Testing. With such regulation, the Agency intends to have a stronger impact on the retail pricing schemes of all national operators and thus to establish some basic rules regarding price squeeze issues. This is one of the main targets of the Agency annual program for 2011.

Regarding the individual pricing offers, especially tenders, MKT is faced with a constant pressure from the competitors and it is under observation by the Competition Authority and the Agency.

Regulated Wholesale Prices

The Long Run Incremental Costs methodology ("LRIC") was introduced as cost obligation in 2007.

With the latest changes and the published results, the interconnection fees were decreased, both for IC links and for

traffic services: origination, termination and transit. The new fees are based on the Bottom-up LRIC model developed by the Agency and they are expected to be applicable earliest from March 2011.

The Agency imposed new decreased monthly fees for local loop unbundling ("LLU"). The current monthly fee for LLU from MKD 430 will be decreased to MKD 331.08 (23% decrease). The new wholesale fees are based on the Bottom-up LRIC model developed by the Agency and they are expected to be applicable earliest from March 2011.

The level of the wholesale regulated prices directly depends on MKT's retail regulated prices.

Regulation of Mobile Business

The retail services provided by the mobile network operators in Macedonia are currently not subject to price regulation. From 2007, TMMK and Cosmofon (now ONE) were designated with an SMP status, whereby several obligations were imposed on them, such as interconnection and access, non-discrimination in interconnection and access, accounting separation and price control and cost accounting.

TMMK submitted the Reference Interconnection Offer ("RIO") to the Agency on 29 February 2008. Based on the second round analysis of call termination services in public mobile communication networks (market 16 from the former European Commission recommendation), on 30 July 2010, TMMK received a Decision for changing the RIO by which the MTR was defined with a glide path decrease in a timeframe of four years (until 2013). In September 2010, the price for the national MTR was decreased to 3.2 MKD and it will continue decreasing by 0.1 MKD each year down to 2.9 MKD/min by September 2013. At the same time, the Agency regulated the MTR's for ONE and VIP with a respective 4 year glide path, while introducing asymmetry between all three mobile operators which will lead to equal MTR of 2,9 MKD in September 2013. On 7 July 2010, the Agency concluded the market analysis of the market for access and call origination service in the public mobile communication networks (market 15 from the former European Commission recommendation) and on 28 July 2010 it brought a decision by which TMMK was designated with SMP status on Market 15 and several obligations were imposed thereto. As a result of the SMP designation, TMMK was obliged to prepare and publish a Referent Access Offer ("RAO"). TMMK submitted the offer to the Agency on 28 August 2010. The Agency requested certain changes of the RAO. TMMK prepared and sent the changed offer on 27 October.

According to the information from the Agency published on 11 November 2010 and the analyses of the Market 15, a virtual mobile operator was announced with the assignment of 100,000 numbers to WTI Macedonia for the provision of services.

In November 2007, the Agency published a public tender for granting one license for 3G radiofrequencies utilization. Cosmofon (now ONE) won the tender and started the 3G commercial operations from 12 August 2008. On 2 September 2008, a decision for granting three 3G licences for a one-off fee in the amount of 10 million EUR each was published. On 15 September 2008, a new tender for additional three 3G licenses was published. TMMK won one license which was granted to it on 17 December 2008, for which TMMK paid EUR 10 million as a one-off fee. TMMK started commercial operations of the 3G services on 11 June 2009. The validity of the license is 10 years i.e. until 17 December 2018, with a possibility for an extension for 20 years in accordance with the LEC.

On 10 January 2009, a public tender for awarding two licences for 2G radiofrequencies in the 1800 MHz band was published. TMMK was awarded one license on 6 June 2009. TMMK paid EUR 2 million as a one-off fee for the 2G license in the 1800 MHz band. The validity period is 10 years, with a possibility for an extension for 20 years in accordance with the LEC. Furthermore, on 10 January 2009, a tender for one license in the 1800-1805 MHz for broadband wireless access on the whole territory of the Republic of Macedonia was published. The one-off fee was set at EUR 30,000. On 5 May 2009, the Agency brought a Decision under which it pronounced Mobik Telekomunikacii as the best bidder on the tender.

The Republic of Macedonia signed the Stabilization and Association Agreement with the European Union and its Member States on 9 April 2001. The Macedonian Parliament ratified the Agreement on 12 April 2001, reaffirming the strategic interest and the political commitment to the integration with the European Union. The Stabilization and Association Agreement was ratified and it has been in force since 1 April 2004.

On 17 December 2005, the EU decided to grant the Republic of Macedonia an EU candidate status. Following the candidate status, the EU must set a date for the start of the negotiations regarding the full accession, encompassing all aspects of the EU membership, including trade, environment, competition and health. Macedonia, as a candidate country, should harmonize its legislation with the EU.

On 14 October 2009, the European Commission issued the 2009 Progress Report. Macedonia received a recommendation from the European Commission for the opening of the accession negotiations. The country made significant progress and substantially addressed the key reform priorities, known as eight plus one benchmarks.

Based on the Progress Report, the competition on the electronic communications markets increased as a result of the liberalisation process, to the benefit of the consumers. The Director of the Agency was appointed in an open competition procedure. The Agency adopted implementing legislation on retail tariffs, bit-stream access and wholesale line rental. The laws regulating the issues related to authorisations in terms of construction works and the right of way are unclear, particularly in terms of the division of the responsibilities between the Ministry of Transport and Communications and the municipalities. This hinders the investments in the telecommunications networks. In the area of electronic communications, the country is now well advanced.

Competition

The competition in the telecommunications business is well developed in almost all segments. Several main players shape the telecommunications market in Macedonia.

Telekom Slovenije purchased 100% of the shares of Cosmofon and became the owner of two major competitors, Cosmofon and OnNet, and it is now offering various services under the brand name One: mobile and fixed voice, mobile and fixed broadband internet and TV. In June 2008, Telekom Slovenije started an aggressive fixed voice offer ALLO, which is when the first major impact in the fixed voice happened. In August 2008, they started to offer services based on 3G technology. In November 2009, Telekom Slovenije launched a TV service based on DVB-T under the brand Boom TV. Since then, Telekom Slovenije has been present in all main telecommunication services: mobile, fixed voice, broadband and TV.

The CaTV operators also have a significant role on the telecommunications market and, as providers of cable television as their main service, they are well established on the Macedonian market. Most of them offer internet broadband services and, since Q4 2008, some of them also started offering fixed voice services. Telekabel and Cabletel are the biggest CaTV providers among over 70 active CaTV operators trying to gain nation-wide role.

The third major competitor is the mobile operator VIP which has limited its services to mobile base services only. With an aggressive pricing policy they have achieved a significant user market share since the entry (18,2% in Q3 2010, source: Report for electronic communication development Q3 2010, Agency for Electronic Communications). VIP has a Global System for Mobile Communications ("GSM") license only, compared to T-Mobile and One who have GSM with Universal Mobile Telecommunications System ("UMTS").

Number portability has become available as of 1 September 2008, allowing faster and easier fluctuation among different operators, and contributing to a better competitive environment. In addition, there is a possibility of new entrants on the mobile market in the form of a virtual mobile operator (MVNO) and a national roaming operator (NR).

With all the main telecommunication services of MKT and TMMK, such as providing different bundle offers – a combination of different services, MKT and TMMK still have the biggest market share in fixed voice (76%; source

internal best expert estimates); fixed broadband internet (51%; source internal best expert estimates) and mobile market share (58%, source: Report for electronic communication development Q3 2010, Agency for Electronic Communications). MKT entered the TV market in November 2008 with its first triple play offer 3Max (a combination of fixed voice, broadband internet and IPTV). By the end of 2010, the IPTV market share of MKT was estimated to approximately 8% of the total TV market (source: internal best expert estimates).

Marketing and Sales

Operating in such a highly competitive environment in all telecommunication segments, MKT is focused on introducing and promoting new services and retaining the existing customers. The main focus in 2010 was put on the sales and/or migrations to the bundled double and triple play services, through several major campaigns for achieving the planned sales results, as well as for increasing the awareness of the benefits provided with the services. The IPTV services are continuously extended with new content and features. Several activities for the single voice users were introduced during 2009 by offering attractive loyalty contracts, which continued in 2010 and managed to stabilize the churn and to increase the loyalty customer base.

MKT remains the leader in innovations. The launching of the first three-screen campaign within the Group provided a unique experience for the customers – the World Championship 2010 was exclusively covered on all 3 media – Internet, Mobile TV and IPTV in High Definition.

On the mobile services market, as a response to the aggressive price movements of the competition, new tariff portfolios for the residential family and business segment were created, which attracted 84.000 customers in less than 6 months. In percentage, 20% of the total post-paid base in the TMMK community are using the new tariffs. One of the main focuses was also the mobile data segment, where we showed an increase of approximately 60% in 2010 compared to 2009.

MKT has developed different sales channels in order to serve the customers from different segments. MKT uses a direct sales channel, such as own retail network, direct sales agents and key account managers; indirect sales channel based on indirect master dealers with their own network of shops, partner shops and free lancers; on-line sales channel and call centre which performs telesales.

The main sales channel is the MKT and TMMK shop network. There are 46 joint shops (43 shops and 3 kiosks). Since 1 October 2010, all shops have been offering the complete TMMK and MKT product portfolio under the same conditions and with the same customer service level. A new retail DT concept was introduced in four shops in 2010. One of the shops was also redesigned as a "café and shop", in addition to the one opened on 23 January 2009.

Another channel of the distribution network of TMMK and MKT is the dealers' cooperation. At the end of 2010, the network consisted of 11 master dealers with 105 shops as TMMK partners and 15 master dealers with 116 shops as MKT partners. The majority of the master dealers' shops are joint shops offering the full MKT and TMMK portfolio, except for cash collection. TMMK's prepaid and post-paid packages (with or without handsets) are available in all dealer shops. In addition, prepaid vouchers are also available in more than 6,500 kiosks which sell prepaid packages without handsets.

A part of the MKT product portfolio (e.g. telephone sets, photo equipment, computers, printers, network equipment) is available to the customers using payment by instalments through their telephone bill.

In 2010, the direct agents put a strong emphasis on the sale of Fiber to the Home ("FTTH") products for the residential and Small-Office-Home-Office and Small and Medium Enterprises ("SOHO"/"SME") customers. The direct sales agents and key account managers are deeply involved in the sale of telecommunication and Internet services with customized Information and Communication Technologies ("ICT") solutions and data services especially for the SME segment. In addition, TMMK is using subsidized handsets and a high quality service as strong tools for customer retention and churn prevention both in the residential and the business segment.

Marketing based on customer needs and habits is used to build strong customer relations. Loyalty schemes and

handset upgrade programs are also increasingly used in order to increase the customer satisfaction and to decrease the customer churn rate.

Research and Development

MKT continues to maintain its network at a high technological level in order to provide a solid base for a wide range of products and services that will satisfy the customers' demands. In the next development period, the main focus will be on network development in all segments: Access, Transport and Service Platforms.

FTTH is foreseen as the main direction for the development of fixed access network. Beside Skopje, FTTH is planned to be implemented in other regions in the country as well.

The increasing demand for video and data services requires increasing the capacity of the transport network. The IP/MPLS Network, as a base for the transport of IP services, will continue to be developed and extended in accordance with the expected traffic growth. An additional focus will be put on QoS, thus increasing the network security and availability.

The DWDM network is the main transport for IP/MPLS and Ethernet traffic. The further network development is in the direction of implementing a new Optical Transport Network.

In terms of Service Platforms, the main focus will be on the development of IPTV with new applications and an IMS Platform. The IMS Platform will be used:

- For the provision of VoIP as part of the 2Play and 3Play services;
- For the provision of new services and applications in the future; and
- As a base for PSTN network migration towards the entire IP network.

In the next development period, the migration towards the NGN IP-based network will continue with increased broadband penetration, followed by the implementation of NGOSS.

Research and development projects at TMMK are being implemented in close cooperation with the suppliers and the state educational institutions.

In co-operation with the local partners, TMMK has developed solutions for handling low balance prepaid customers, as well as a solution that will enable us to offer Unstructured Supplementary Service Data ("USSD") based services.

In 2010, TMMK was the first operator to offer full quadruple play product on the Macedonian market, encompassing mobile voice and data, fixed line voice, broadband Internet and TV in one product.

In co-operation with its partners TMMK has launched Mobile Payment services, as well as successfully completed the e-commerce development, thus enabling the residential customers to pay invoices through the TMMK web site. The next development phase will focus on the e-shop, allowing purchase of products on the Internet with payment cards.

TMMK is working on implementing 3G-based services for their subscribers. The first service that was implemented in June 2010 was mobile TV.

TMMK is implementing the VPN service in the network. The VPN is an Intelligent Network ("IN") based service, which is targeting the business subscribers with advanced services.

Information technology

Following the corporate integration strategy, the IT areas of MKT and TMMK have been focused on the consolidation of the IT systems and infrastructure, while reducing the complexity of the IT architecture and improving the IT security

standards.

Integration of the IT infrastructure and architecture is a prerequisite for the implementation of common processes on MKT Group level and increasing the process efficiency.

The main achievements in 2010 were:

- Implementation of a common exchange and domain - The domain @telekom.mk has been established as common domain for the MKT Group, all TMMK users/servers are migrated to @telekom.mk domain and all MKT and TMMK mails are migrated to Common Exchange 2010;
- Integration and implementation of a common corporate IT network - Interconnection between the MKT and TMMK corporate network infrastructure and building a new common corporate network infrastructure. A common network provides a stable, highly available, reliable and secure network infrastructure and improves the functioning of all business critical applications and processes;
- Development of Target IT Architecture for the CRM, Billing and ERP domains and alignment with the Deutsche Telekom standards;
- In order to provide reliable premises for the installation of HW equipment for the new IT and OSS systems, the Data Center has been extended with additional 160 m2 which will satisfy the needs for Data Center space in the next 4 years.

IT has taken a significant role in the implementation of the new of Fix/Mobile Converged products and services:

- "Family +" – first fully fledged corporate 4Play package including fixed line, mobile line, broadband DSL and MaxTV;
- Three screen TV streaming for FIFA 2010 – Football on HD on MaxTV, mobile streaming and Internet streaming;
- Joint Loyalty Program;
- E-commerce and instalment payment.

The IT security standards have been improved by implementing several security relevant systems that decrease the operational risks and improve customer and personal data protection. The first phase of the implementation of an Identity and Central Access Rights Management System was finished with the integration of all MKT IT systems containing customer data, and it is planned to continue with the other MKT systems and extension for the TMMK IT systems as well.

The CRM and Billing domain was in the focus during 2010.

In 2010, the T-Mobile Billing System upgrade project was finished, which brought new rating and billing enablers into our product portfolio, like cost control, split billing, enhanced roaming rating, etc.

During 2010, MKT and TMMK started a three year project for the implementation of a new consolidated CRM system as part of the Deutsche Telekom Group NG CRM Project. This system should enable a 360-degree customer insight and further sharpen the customer focus of MKT and TMMK.
